

## ***To My Doctor:***

Your patient has agreed to join Shibboleth as a lifestyle weight loss and maintenance program. However, you are the real expert. **You know your patient, and you can personalize this plan to fit his or her needs.**

Shibboleth was based on Travis Martin's personal experience with weight loss. At 29 years old, Travis had the heart of a 60-year-old. His doctor convinced him to change his lifestyle and Travis' successful journey involved both research and many conversations with his doctor.

Based on his experience, Travis encourages constant feedback between doctors and patients. He wants your input and knowledge to help your patient change their lifestyle habits.

Please look through this worksheet with your patient. We want your patient to engage in weekly classes and get involved with others in the program. Shibboleth is about community, not isolation.

Attached is a partial list of Shibboleth-approved foods from the grocery store that can also be used in the hundreds of approved recipes located on our website. This is a general list and your patient may not be able to eat certain foods on it. **Feel free to eliminate foods your patient can't have and we will help your patient focus on what the CAN have.**

Also, we encourage **60-128 oz.** of water per day. Please advise your patient if they require a different amount or have water restrictions.
