

NBCF

2015 ANNUAL REPORT

Helping Women Now.[®]

Our mission is to provide help and inspire hope to those affected by breast cancer through early detection, education, and support services.

The vision of NBCF is to be a God-honoring charity serving those who may be affected by breast cancer. We strive to help the helpless and give hope to those without hope.

Our core values are compassion, integrity, and wisdom. Compassion for those with whom we interact. Integrity in what we say and how we fulfill our commitments. Wisdom, knowledge, and understanding in our approach to addressing challenges and opportunities.

LETTER FROM THE FOUNDER

Taking the Fork in the Road

“Yes, I am a strong woman,” she said without hesitation. “I had to be to survive.”

Janelle Hail
Co-founder and CEO

The Fork in the Road

Yogi Berra was not only a baseball legend, but he left his unique brand of humor on us all. One of his famous quotes was, “When you come to a fork in the road, take it.” There was always enough truth in his quotes to make you stop and think while grinning at his quips.

A few years ago I was traveling with family and business colleagues through several countries in Europe. While scurrying to catch a train, I had to make a quick detour away from the group. Up and down numerous flights of stairs, I stopped at the bottom of the last flight and noticed a broken plastic fork at the base. *When I return, I will remember which staircase to take because of the fork.* Sure enough, it was a landmark for my return.

Many times people stop at a fork in the road and stare at it, but fail to be decisive, for fear of taking the wrong turn. Stalling out can be more dangerous than taking a wrong turn. Experts move you toward the right pathway to give you forward momentum.

Giving Back

This year I met a nurse, an older Vietnamese woman, whose life was changed because she saw a fork in the road and took it. At the age of 25 she was pregnant with the only son she would ever have. She and her husband fled to South Vietnam to escape Communist rule. She was told she and her husband would be able to go to America. At the last minute their papers were cancelled.

She was a nurse who worked for the Red Cross and the U.S. Embassy. Her father was an executive in the military, so the Communists assumed she was with the CIA. They interrogated her for three days.

“I’m just a nurse,” she said. “I have no other motives.”

She told me they thought she would use her nursing skills to kill people. Finally, they left her alone, but did not allow her to continue nursing.

Fourteen years later, sponsored by her sister and allowed to legally immigrate with her husband to America, she started over with her training, Nursing 101. After years of re-training and nursing in America, her nineteen-year-old

son was tragically killed in an accident. He was studying pre-med at Yale University.

At this point in her story, a wave of wonder fell across me, that this woman could go through so much heartache and not be bitter at her plight.

“You are a strong woman,” I said.

“Yes, I am a strong woman,” she said without hesitation. “I had to be to survive.”

This dear nurse was my husband’s critical care nurse during a lengthy hospital stay this year. I admired her for her diligence in her job and her attentiveness to detail before I ever knew her story.

As I held back the tears, I asked her if I could hug her. For a brief moment, she allowed me to break down walls of defense between patient and nurse, and we were two human beings embracing life.

What is Your Fork in the Road?

Her story didn’t end. She became associated with a Catholic group of Vietnamese people who meet annually. They were mutually grateful for an opportunity to be in America and have a life of freedom. The theme of the association this year is “Giving Back.”

You may have reached that fork in the road, where you don’t know what to do about your healthcare or that of someone you care about. Or, you may be confused about which charity to support that will use your money wisely and help others who need answers.

NBCF can take you out of the masses of people and connect you to the right resources. We will navigate you through tall, looming buildings in the city to quiet resting places found in parks, forests, and lakes.

Over the next few pages, you will find the heart of NBCF, the life of our service to humanity, and our dedication to the finest resources of education and research. We are “Helping women now. Providing help and inspiring hope to those affected by breast cancer through early detection, education, and support services.”

Beyond The Shock[®]

Beyond The Shock is a free, comprehensive, online guide to understanding breast cancer. It is a resource for women who have been diagnosed with breast cancer, a place for loved ones to gain a better understanding of the disease, and a tool for doctors to share information.

Early Detection Plan

One of the best ways to improve the chances that breast cancer can be found early and treated successfully is to follow an individualized screening plan. When breast cancer is diagnosed in the earliest, localized stage, the 5-year relative survival rate is 100%. This contributes to why there are around 3 million breast cancer survivors today. NBCF's Early Detection Plan (EDP) is an empowering tool that enables women to be proactive about their health and their approach to early detection of breast cancer.

Available in English and Spanish on iTunes and Google Play, the EDP is one of the top-rated medical apps. The EDP utilizes emails and push notifications to help keep track of appointments. Users can also search for screening facilities in their area using the GPS and facility finder or keep track of important information or questions in the notes section.

EDP 3.0

Includes Spanish language support and improved clinic search function

National Mammography

PROGRAM

Breast cancer has become one of the leading health crises for women in the United States. The disease affects over 12% of all women in the United States. There is currently no known cure for breast cancer, and its early diagnosis is critical to survival. According to the National Cancer Institute (NCI), getting a high-quality mammogram is the most effective way to detect breast cancer early. NBCF recommends women age 40 and older receive annual mammogram screenings to help detect breast cancer early. However, millions of women in the U.S. are uninsured or underinsured and simply can't afford the cost. These women are at a significantly higher risk of dying from breast cancer if later diagnosed. Currently, NBCF provides funding for breast screening and diagnostic procedures to 61 medical facilities across the U.S. NBCF also funds biopsies in select locations, and partners with medical facilities that ensure continued quality healthcare through survivorship.

Patient Navigation

Patient navigation helps guide patients through and around barriers in the complex cancer care system to help ensure timely diagnosis, treatment, and support. This is also critical to survival and early detection, and the medical community in the U.S. is seeing huge successes through patient navigation programs. NBCF currently funds 34 patient navigator programs across the U.S.

“We are indebted to NBCF for the funding they provide that enables us to navigate such a large and complex volume of patients each year, as well as reach thousands in local and regional communities so that we can undo the myths, instill facts, and get more women in to breast imaging, diagnosed early, so we can save their lives.”

LILLIE D. SHOCKNEY
Administrative Director, Johns Hopkins Breast Center

Bernice and patient navigator, Evelyn at Parkland Hospital, Dallas

Patient and patient navigator at Queen's Medical Center, Honolulu

12
Days between Screening & Diagnostic Follow-Up
Time between screening and diagnostic follow-up was an average of 109 days at Parkland Hospital in Dallas before Patient Navigators were introduced.

NAVIGATOR DUTIES

- Educate underserved women about the importance of screenings
- Eliminate barriers of financing, transportation, childcare, and language to women receiving screenings
- Answer questions about a diagnosis of breast cancer
- Ensure the patient keeps treatment appointments regardless of barriers
- Follow-up with survivors

Breast Health Education

NBCF partners with Convoy of Hope® to educate those in need about the importance of early detection of breast cancer. Each year Convoy of Hope hosts dozens of community events and provides free groceries, shoes, health and dental screenings, haircuts, family portraits, hot meals, and job placement assistance. NBCF hosts a Pink Tent at each of these events where guests receive personalized Early Detection Plans, breast self-exam training, pre-qualification for mammography services, a pink tote with NBCF's Hope Journal, and breast self-exam shower cards.

“I’m alive today because of the NBCF tent.”

GUEST AT COEUR D’ALENE, IDAHO EVENT

Guest visited the NBCF tent in 2014 and learned how to do a breast self-exam. Using these skills she found a lump, went to her doctor, and found out she had breast cancer.

Pink Ribbon Red Ribbon

INITIATIVE

In 2012, NBCF became a Collaborating Partner of Pink Ribbon Red Ribbon®, an initiative of the George W. Bush Institute. Pink Ribbon Red Ribbon is the leading public-private partnership aimed at catalyzing the global community to reduce deaths from cervical and breast cancer in sub-Saharan Africa by raising awareness of these diseases and increasing access to quality services to detect and treat them. This partnership has allowed NBCF to make a significant impact in Sub-Saharan Africa in the last three years.

While we have been successful at spreading the message of early detection across the U.S., there are many areas around the world that need our life-saving message. There is a critical need to join hands with scientists, doctors, researchers, and advocates around the world, to join forces against this disease and make a global impact on the lives of women. Through awareness, screening programs, and advancement in treatment, we have much to offer other countries, but we also desire to learn from doctors and scientists that are diagnosing and treating the disease in countries where resources are limited. Our partnership with Pink Ribbon Red Ribbon allows us to do this and offer the message of hope to women around the world.

GLOBAL INITIATIVES & THE UNIVERSITY OF TEXAS

MD Anderson

CANCER CENTER

NBCF continues to help women now by funding targeted research. Diseases like triple-negative breast cancer have been very difficult to treat, and doctors need to know more about its cause. Women diagnosed with triple-negative breast cancer often face a difficult prognosis. Improvements in treatment options are needed now. That's why NBCF is focused on funding research projects that seek to improve the outcome of this disease and further advancements in personalized therapies. Last year, NBCF funded these research projects:

Triple-Negative Breast Cancer

Led by Dr. Khandan Keyomarsi, this program focuses on African women with triple-negative breast cancer and the study of two potential biomarkers to determine if they can be used as prognostic indicators for this very difficult-to-treat disease. The program also includes an education component for graduate training in disparities research that will help address and

eliminate breast cancer health disparities in women of African descent.

Breast Cancer in Africa

Led by Dr. Shubhra Ghosh, MD Anderson is working with a global coalition of cancer societies, research institutes and patient groups to educate health professionals across many disciplines. This effort will lead to the implementation of prevention, early detection, diagnosis, treatment, and care of cancer patients in Africa.

Moon Shots Program

MD Anderson is applying comprehensive team science to improve treatment and clinical outcomes for triple-negative breast cancer (TNBC) and high-grade serous ovarian cancer (HGSOC). This dual focus stems from recent studies that point to remarkable similarities in the underlying molecular events that cause these two rare, aggressive cancers.

Our Catalysts

We believe that everyone can make a difference. Young or old, individual or organization, even a small spark can ignite a large flame. Those who blaze the trail to make a mark on their communities for good are NBCF's Catalysts for Hope. Catalysts bring change and encouragement, they unite and rally around survivors, and their good work cannot go unrecognized.

We know that many of our fundraisers have a personal and sometimes first-hand experience with breast cancer, and we are so thankful that these local leaders take the time and effort to support NBCF and help spread the message of education and early detection.

NBCF Catalysts are our grassroots efforts, reaching into local communities and creating a connection with other friends, family, supporters, and advocates to make an impact on a national level thanks to NBCF's Programs.

Financial Review

Fiscal-year 2015 was a year of growth for the National Breast Cancer Foundation. Through the contributions of our generous corporate sponsors, fundraisers and individual donors, we made significant strides in Helping Women Now®. We were able to allocate 85% of our total spending directly to Program Services to fulfill this mission.

We expanded our National Mammography and Patient Navigator Programs by 13 facilities, for a total of 84 locations. We continue to remove barriers of language and culture that may prevent women from accessing the resources needed to detect their breast cancer in the earliest stages. Several of the newly added facilities are located in communities with a high percentage of Hispanic women. We also continue to improve

our educational tools and recently launched a Spanish language version of our Early Detection Plan mobile app so that more women can access this valuable way to be proactive about their breast health. Our Convoy of Hope partnership continued this year, serving over 6,400 women. We are grateful for the dedicated volunteers who helped us serve these women and their families.

Charity Navigator awarded NBCF their highest 4-star rating for the 11th year, and GreatNonprofits designated us a Top Nonprofit. We are confident that NBCF will continue to offer hope and help to women and families affected by breast cancer. On behalf of all who will receive help from NBCF in the coming year, thank you again for supporting our mission.

Thank You

Thank you for helping those touched by breast cancer, and delivering hope and healing to the many people affected by this disease. We are grateful that you made the decision to support NBCF's mission, as we work diligently and tirelessly to help those in need. Your support allows us to guide patients from the shock and uncertainty of breast cancer, through the confusion of deciding where to go, and onward towards survivorship. Our donors, fundraisers, partners, and supporters have a variety of backgrounds, and this diversity of wisdom, expertise, and resources is channeled directly to those in need. You play a vital role in the success of our mission, and we thank you for your valuable donation and the hope it brings to the women we serve.
