“The average time to get a vaccine approved is 10 years and 96% of proposed vaccines fail to be approved due to safety or efficacy issues. The first COVID vaccines are due to be ready Nov 1st 2020. Most people are already connecting the dots.....”

Jason Christoff

chriskirckof • [Follow](#) 

chriskirckof Vaccines are all designed to cause harm to the person receiving them. No vaccine on the market is safe as they all contain toxic adjuvants and all failed to be studied properly. So knowing that what do you think a covid vaccine which is being rushed onto the market at light speed is going to do to people? They know there will be a second wave because that's been the plan all along and the vaccine is going to create it.

trullk What's your response to those who say that the amount of toxic ingredients in the vax doesn't make it toxic?

1. **California** – Children ages 12 and up can receive vaccines related to sexually transmitted diseases without parental oversight.
2. **Delaware** – Children ages 12 and up can receive vaccines related to STDs without parental oversight.
3. **Minnesota** – Children of any age can receive the hepatitis B vaccine without their parents' permission.
4. **New York** – Children of any age can receive vaccines related to STDs without parental oversight.

A woman accused my unvaxd children of spreading measles and polio and killing other kids, even though they don't have any of these diseases. My solution?
