

Elevate Your Network Management Experience

Nex-Tech NOC Cloud is a cutting-edge Network Management System (NMS) designed to provide seamless and efficient management of your network infrastructure. Whether you're a small broadband provider or a large carrier, our platform offers comprehensive tools and features to keep your network running smoothly.

Key Features

1. EASY ACCESSIBILITY

- Web Browser Access: Connect to your network management system from any web browser, anytime, anywhere.
- Mobile-Friendly Interface: Stay connected and manage alerts easily and quickly from your mobile device.

2. REAL-TIME DATA & MONITORING

- Instant Network Data: Get up-to-the-minute information about your network's performance and status.
- Alarm Management: View, filter, and search through alarms to quickly identify and address issues.

3. REPORTING

- Detailed Reporting: Generate comprehensive reports to gain insights and improve network management.
- Daily Alarm Summary: Offers a comprehensive overview of all alarms triggered in the past 24 hours, enabling a proactive approach to network troubleshooting.

4. INTEGRATED TICKETING SYSTEM

- Efficient Issue Tracking: Create, track, and manage support tickets directly within the platform for streamlined problem resolution.

5. NOTIFICATIONS

- Multiple Channels: Receive instant notifications via voice, text, and email to stay informed of critical alarms and updates.
- Escalation Layers: Add escalation alerts when notifications go unacknowledged.

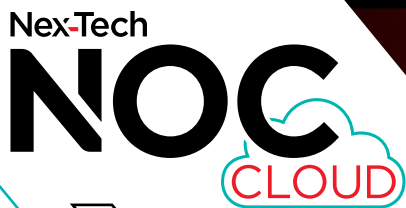

Benefits

- Enhanced Flexibility: Manage your network efficiently from any location with web browser access.
- Improved Response Times: Quickly identify and resolve network issues with real-time data and advanced alarm management.
- Informed Decisions: Utilize detailed reports and analytics to make data-driven decisions.
- Seamless Integration: Experience a unified approach to network management with our integrated ticketing system and multi-channel notifications.
