

Protective Pond Netting Kits

Keep predators and debris out of your ponds with Protective Pond Netting Kits from Nixalite®

You spent good money putting in your water garden or fish pond. Now protect it from predators, falling leaves and other debris with the **Protective Pond Netting Kits** from **Nixalite®**.

These kits come in 3 sizes; 7'x10', 14'x20' and 28'x30'. Choose the kit size that will cover your water feature completely. Combine kits to cover larger areas. The box includes the netting, anchor stakes and instructions (on the back of the box).

The netting is a durable woven black poly resin that resists tearing, mold, rot and mildew. The small diamond mesh keeps out even the smallest fish-eating birds. Each kit includes push-in anchor stakes that go around the outside edges to hold the netting in place. Use over fish ponds, water gardens, rainwater collection points, even small shrubs and plants can be enclosed with these kits.

Each kit includes netting and stakes. Larger net kits come with more anchor stakes.

A Basic Installation

- Step 1:** Unroll the netting
- Step 2:** Place the netting over the pond or object
- Step 3:** Pull the netting tight and secure with the anchor stakes included with each kit

Many Different Uses

- Catches falling leaves & debris
- Protects expensive fish from predatory birds
- Helps maintain water quality
- Use with other wildlife control methods to regain complete control of your property

If you have any questions about the netting kits or their uses, please contact Nixalite.
