Protect small gardens, shrubs and trees from birds. Quick, easy & low cost.

Bare Hand Vineyard Net
Safe & humane bird exclusion for vineyards, berry crops and other row crops.

Welded Wire Mesh barrier
Metal wire barrier for pest birds and nuisance animals. Stainless and galvanized steel.

Not sure which to use? Contact Nixalite.

Bird Netting is one of the most versatile methods of bird exclusion available. It can be installed on, over or around an endless list of objects, openings and structures to keep birds out and surfaces clean.

Along with the netting, we offer a complete line of hardware and accessories to make your bird netting installation more efficient. The sketches below show examples of how versatile bird netting can be.

Landscaping

- Trees
- Shrubs
- Hedges

***Support System:** When enclosing large areas with bird netting (i.e. small orchards, water tanks, ponds, etc.) the support system is absolutely critical to the success and longevity of the netting enclosure! The larger the area, the more comprehensive the support system must be. A well supported netting enclosure lasts longer and is more effective at bird exclusion. Contact Nixalite for recommendations.
