

New Jersey Department of Community Affairs Division of Codes and Standards Landlord-Tenant Information Service

2009 RENT CONTROL SURVEY

The State of New Jersey does not have a law controlling or governing rent increases or rent leveling. However, any municipality within the State of New Jersey may adopt an ordinance controlling rent increases. Your municipal clerk can tell you if a rent control ordinance exists within your municipality.

The attached survey is for your use; any questions regarding rent increases or procedures must be directed to the local rent leveling or rent control board. The increase percentage indicated on this survey may be different than the actual increase. Please check with the local municipality as to the percentage and other restrictions. If you disagree with the approved amount you may file an appeal through the process that is outlined in your local ordinance. If you still disagree, you may file an action in the Superior Court in the county where the building is located to determine if the increase is unreasonable.

If no rent control or rent leveling exist, you may withhold paying the increased amount, but continue to pay the regular amount of rent, and allow your landlord to pursue an eviction for non payment of rent, or you may file an action in the County Superior Court, Landlord/Tenant Section, and let the Court determine if the increase is unconscionable.

Vacancy Decontrol provides for the lifting of controls when the dwelling unit becomes vacant. Once controls are lifted, increased demand will usually result in higher rents being asked and paid.

Consumer Price Index (CPI) is the measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services (U.S. Dept. of Labor). Where CPI is indicated on the survey, the increase is based on the NY, NY-Northeastern NJ or the Phila, PA-NJ region CPI.
