THOMAS P. DINAPOLI  
*State Comptroller*

STATE OF NEW YORK  
OFFICE OF THE STATE COMPTROLLER

September 1, 2015

**To the Citizens, Governor and Members of the  
Legislature of the State of New York:**

**I** hereby present the Comprehensive Annual Financial Report for the State of New York, for the fiscal year ended March 31, 2015.

Under generally accepted accounting principles, the State's General Fund ended State Fiscal Year (SFY) 2014-15 with a fund balance of \$6.1 billion, the highest level in at least two decades. The net position for the State's governmental activities, a basic indicator of financial condition, rose by \$4.7 billion to \$32.6 billion. This year's timely budget adoption, following four consecutive years of on-time enactment, continues to send a signal that the State has moved beyond the recurring fiscal gridlock of recent decades.

In the sixth year of national economic recovery, New York State's short-term financial condition continues to improve. After closing deep budget gaps just a few years ago, the State now faces the unusual and more welcome challenge of how best to capitalize on an extraordinary inflow of one-time resources from monetary settlements with a number of financial institutions and other entities for violations of New York banking laws—more than \$8 billion from SFY 2013-14 to SFY 2015-16, most of that unanticipated. Still, while the short-term outlook has improved, long-term issues including the need to align structural revenues and expenditures require continued attention.

The SFY 2015-16 Enacted Budget includes more than \$7.4 billion in new and increased authorizations for State-Supported borrowing—an increase of 6.4 percent from previously authorized levels. At March 31, 2015, total State-Supported debt outstanding was \$57.4 billion. The substantial increase in authorization to borrow has been made despite the influx of unanticipated settlement dollars that could have been used to offset some of this increase. Given the State's shrinking statutory debt capacity and unmet capital needs, it is critical that New York prioritize its use of debt and capital resources to ensure that they are used as effectively as possible.

The Office of the State Comptroller will continue to provide oversight of these important issues in an independent and impartial manner, in an effort to ensure that the public's interest is always protected.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom DiNapoli".

Thomas P. DiNapoli  
State Comptroller

## FINANCIAL OVERVIEW

This report has been prepared by the Office of the State Comptroller, as required by Chapter 405, Laws of 1981, in accordance with generally accepted accounting principles (GAAP) for governments as promulgated by the Governmental Accounting Standards Board (GASB). Responsibility for both the accuracy of the presented data and the completeness and fairness of the presentation, including all disclosures, included within this Comprehensive Annual Financial Report rests with the Office of the State Comptroller.

The basic financial statements contained in this report have been audited by KPMG LLP. Their audit was conducted in accordance with generally accepted governmental auditing standards (GAGAS) and their auditors' report precedes the basic financial statements. An independent audit provides reasonable assurance that the State's basic financial statements for the year ended March 31, 2015 are free of material misstatement. Independent audit procedures include examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall basic financial statement presentation. An audit also includes consideration of internal controls over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State's internal controls over financial reporting. Accordingly, the independent auditor expressed no opinion with respect to internal controls over financial reporting. The independent auditor believed that their audit provided a reasonable basis for rendering an unmodified opinion that the State's basic financial statements for the fiscal year ended March 31, 2015 are fairly presented in conformity with GAAP.

The basic financial statements include a narrative introduction, overview, and analysis that is required by GAAP and referred to as Management's Discussion and Analysis (MD&A). This transmittal letter is intended to complement the MD&A and should be read in conjunction with it. The State's MD&A can be found immediately following the independent auditors' report.

### Profile of New York State

New York State was one of the original 13 states, ratifying the United States Constitution and entering the Union on July 26, 1788. The State has a land area of 49,576 square miles and the largest park system (home of the Adirondack Park) in the nation. Geographically, New York State is divided into 62 counties (five of which are boroughs of New York City). Within these counties are 62 cities (including New York City), 932 towns, 549 villages and 695 school districts. The State's major economic sectors are the industrial-commercial, service, financial and agricultural sectors.

New York's government comprises three branches—executive, legislative and judicial. The executive branch includes the Executive (including 20 State departments), the Department of Audit and Control, and the Department of Law, which are headed respectively by the Governor, Comptroller and Attorney General. The departments of the State report to the Governor; however, the departments of Audit and Control and Law report to their respective elected officials, and the Education Department and the State University of New York report to the Board of Regents. The Board of Regents is elected by the State Legislature. The legislative branch comprises two houses, the Senate with 62 senators and the Assembly with 150 members. Members of the Legislature are elected to two-year terms.

The Chief Judge of the Court of Appeals, which is the highest court of the State, heads the judicial branch. The Governor, with the advice and consent of the State Senate, appoints the Chief Judge and six Associate Judges to 14-year terms. In New York State, the courts of original jurisdiction, or trial courts, hear cases in the first instance and the appellate courts hear appeals from the decisions of other courts.

### Economic Condition and Outlook

In 2014, the nation's real Gross Domestic Product (GDP) grew by 2.4 percent, the fastest pace in four years. In comparison, New York's real GDP grew by a slightly more robust 2.5 percent, ranking its economic growth 13th among the 50 states. This growth was primarily driven by strong economic growth in New York City and its surrounding suburbs. Along with this stronger economic growth, there was strong job growth, with both the nation and New York realizing the highest rate of job growth since 2000. Although economic growth in New York slightly exceeded that of the nation in 2014, job growth in New York lagged slightly behind national job growth. Employment in New York reached its highest-ever level of nearly 9.1 million jobs on an annual average basis. Similar to economic growth, most of the job gains were concentrated in New York City and Long Island. While some upstate metropolitan areas, such as Ithaca, Albany, Rochester and Buffalo experienced job growth, others, such as Binghamton, Syracuse and Utica-Rome, were still struggling with job losses.

The securities industry in New York City, with its high-paid jobs, large bonuses and strong corporate profits, is an important contributor to the State's revenues and has a significant impact on the downstate economy. In State Fiscal Year (SFY) 2013-14, the Office of the State Comptroller estimated that activities related to the securities industry contributed 19 percent of the State's tax revenues (from personal income and corporate Article 9A tax payments). In SFY 2014-15, the State also benefited from more than \$4.9 billion in legal settlements from financial firms, stemming from violations of New York State banking and insurance laws.

## **The Reporting Entity and Its Services**

The funds and entities included in this Comprehensive Annual Financial Report are those for which the State is accountable, based on criteria for defining the financial reporting entity prescribed by the GASB. The criteria include legal standing, fiscal dependency and financial accountability. Based on these criteria, the various funds and entities shown in this report are considered as part of the reporting entity (see Notes 1 and 14 of the Notes to the Basic Financial Statements).

The State provides a range of governmental services in such areas as education, public health, public welfare, public safety, and transportation, among others, and also administers the New York State and Local Retirement System.

## **Component Units**

Component units are discretely presented and reported as public benefit corporations (Corporations), which includes Public Authorities, and are legally separate entities that are not operating departments of the State. Corporations have been established for a variety of purposes such as economic development, capital construction, financing, and public transportation. The powers of the Corporations generally are vested in their governing boards. The Governor, with the approval of the State Senate, appoints a majority of the members of the Board of most major Corporations, and either the Governor or the Board selects the chairperson and chief operating officer. Corporations are not subject to the State constitutional restrictions on the incurrence of debt which apply to the State, and may issue bonds and notes within legislatively authorized amounts.

Corporations submit annual reports on their operations and finances accompanied by an independent auditors' report to the Governor, the Legislature and the State Comptroller. Corporations are generally supported by revenues derived from their activities, although the State has provided financial assistance, in some cases of a recurring nature, to certain Corporations for operating and other expenses, and in fulfillment of its commitments on moral obligation indebtedness. The Corporations have been presented in the accompanying financial statements as component units of the State. The amounts presented in this report were derived from the Corporations' most recent audited financial statements. At year-end, these entities reported a net position of \$39.2 billion. For further information, refer to Note 14 of the Notes to the Basic Financial Statements.

## **Budgetary and Other Control Systems**

The State Constitution requires the Governor to submit a cash basis balanced Executive Budget that contains a complete plan of expenditures for the ensuing fiscal year, and identifies the anticipated revenues sufficient to meet the proposed expenditures. Included in the proposed budget are provisions for spending authority for unanticipated revenues or unforeseen emergencies in accordance with statutory requirements. The Executive Budget also includes both cash basis and GAAP basis financial plans for the ensuing fiscal year, as well as a three-year financial projection for governmental funds and a five-year capital plan. The accounting policies used in developing the GAAP basis financial plans are generally consistent with those used in preparing the annual GAAP financial statements. Generally, the financial plans are updated quarterly. The Legislature enacts appropriation bills and revenue measures embodying those parts of the Executive Budget it has approved. Expenditures are controlled at the major account level (e.g., personal service, grants to local governments) within each program or project of each State agency in accordance with the underlying approved appropriation bills.

In developing the State's accounting system, consideration was given to the adequacy of internal controls. Internal accounting controls are designed to provide reasonable, but not absolute, assurance regarding the safeguarding of assets against loss from unauthorized use or disposition and the reliability of financial records for preparing financial statements and maintaining accountability for assets. The concept of reasonable assurance recognizes that the cost of control should not exceed the benefits derived. The State's internal accounting controls are periodically tested to ensure adherence to internal control policies and procedures.

In 1987, the Legislature passed the New York State Governmental Accountability, Audit and Internal Control Act, which commits the State to enhancing existing systems of internal controls in all State governmental entities. As a result, there is now a requirement for managers in all branches and components of government to maintain comprehensive internal control systems and to regularly evaluate the effectiveness and adequacy of these systems by internal reviews and external audits. Finally, the legislation promotes accountability by assuring that all external audits are made available to the public.

### **General Governmental Results**

An operating surplus of \$6.6 billion is reported in the General Fund for the fiscal year ended March 31, 2015. As a result, the General Fund now has an accumulated fund balance of \$6.1 billion. The State completed its fiscal year ended March 31, 2015 with a combined Governmental Funds operating surplus of \$6.5 billion as compared to a combined Governmental Funds operating surplus in the preceding fiscal year of \$1.2 billion. The combined operating surplus of \$6.5 billion for the fiscal year ended March 31, 2015 included an operating surplus in the General Fund of \$6.6 billion, in the Federal Special Revenue Fund of \$3 million, in the General Debt Service Fund of \$192 million and an operating deficit in Other Governmental Funds of \$355 million. For further information, refer to the MD&A which immediately follows the independent auditors' report.

The State's financial position as shown in its Governmental Funds Balance Sheet as of March 31, 2015 includes a fund balance of \$14.2 billion comprised of \$42.1 billion of assets less liabilities of \$25.6 billion and deferred inflows of resources of \$2.3 billion. The Governmental Funds fund balance includes a \$6.1 billion accumulated General Fund balance.

### **Certificate of Achievement**

The Office of the State Comptroller was honored for the 26th consecutive year to receive the Certificate of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association for the State's 2014 Comprehensive Annual Financial Report. This prestigious award represents the highest form of recognition in the area of governmental financial reporting, and reflects a commitment by the Office of the State Comptroller to communicate the State's financial results and position clearly to the taxpayers through public disclosure.

### **Acknowledgments**

This report could not have been prepared without the cooperation of all State agencies, the Legislature, and the Judiciary. I especially appreciate the professionalism and dedication demonstrated by my staff in the preparation of this report.

## Independent Auditors' Report

The Audit Committee  
New York State Legislature:

### Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of New York (the State) as of and for the year ended March 31, 2015, and the related notes to the basic financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditors' Responsibility*

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the New York Local Government Assistance Corporation, the Tuition Savings Program, and certain of the discretely presented component units as identified in note 14 to the basic financial statements. The New York Local Government Assistance Corporation represents less than 1 percent of the assets of the governmental activities and the aggregate remaining fund information, and less than 1 percent and 1 percent, respectively, of the revenues of the governmental activities and the aggregate remaining fund information. The Tuition Savings Program represents 9 percent and 8 percent, respectively, of the assets and the revenues of the aggregate remaining fund information. The certain discretely presented component units identified in note 14 of the basic financial statements represent 61 percent and 70 percent, respectively, of the assets and the revenues of the aggregate discretely presented component units. The financial statements of these entities were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for the New York Local Government Assistance Corporation, the Tuition Savings Program, and the certain discretely presented component units identified in note 14 of the basic financial statements, are based solely on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements of the Lottery enterprise fund and of certain discretely presented component units as identified in note 14 of the basic financial statements were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### ***Opinions***

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of New York as of March 31, 2015, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with U.S. generally accepted accounting principles.

### ***Other Matters***

#### *Required Supplementary Information*

U.S. generally accepted accounting principles require that the management's discussion and analysis and required supplementary information listed in the accompanying table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board (GASB), who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the management's discussion and analysis and required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### *Other Supplementary Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The other supplementary information listed in the accompanying table of contents, and the introductory and statistical sections, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and the other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of the other auditors, the other

supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated July 24, 2015 on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

## *(unaudited)*

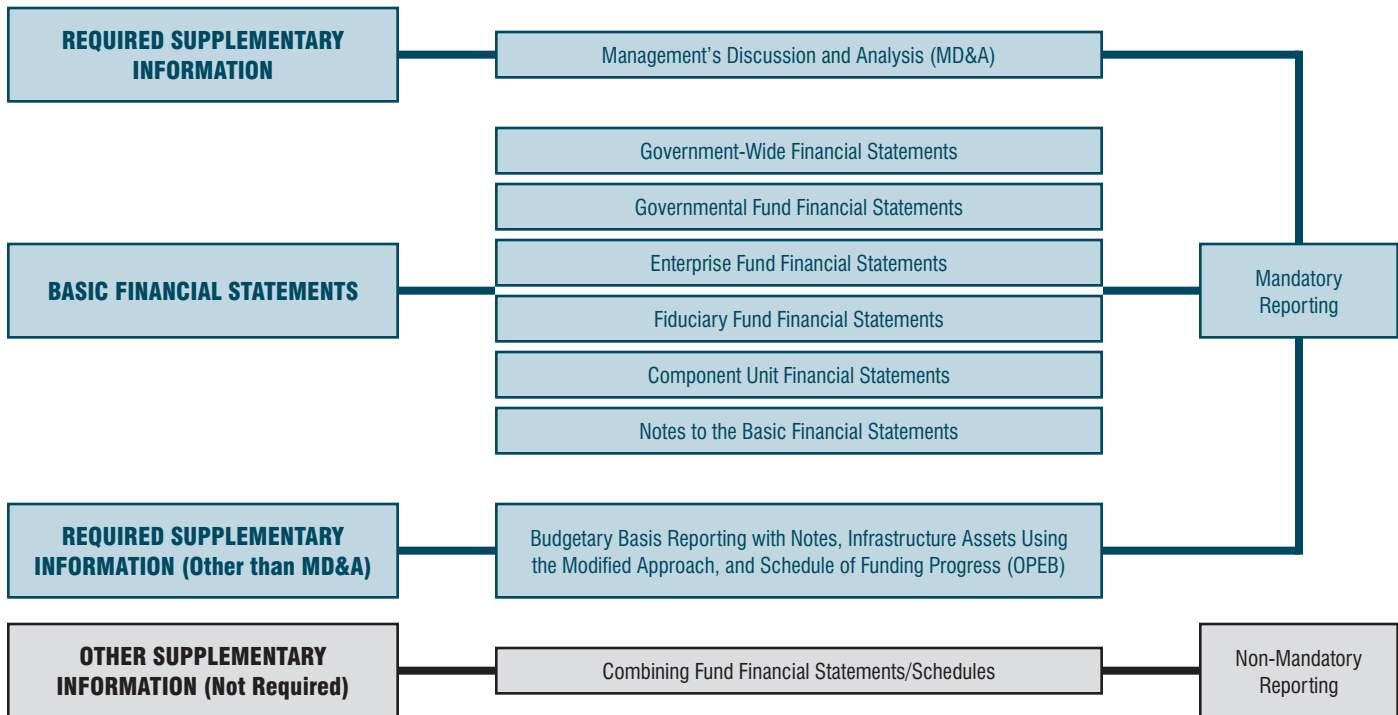

Management's discussion and analysis (MD&A) provides a narrative overview and analysis of the financial activities of the State of New York (State) for the fiscal year ended March 31, 2015. The MD&A is intended to serve as an introduction to the State's basic financial statements, which have the following components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. The MD&A is designed to (a) assist the reader in focusing on significant financial matters, (b) provide an overview of the State's financial activities, (c) identify any material changes from the original budget, and (d) highlight individual fund matters. The following presentation is by necessity highly summarized, and in order to gain a thorough understanding of the State's financial condition, the following financial statements, notes and required supplementary information should be reviewed in their entirety.

### FINANCIAL HIGHLIGHTS

- New York State reported net position of \$33.3 billion, comprised of \$154.6 billion in total assets and \$826 million in deferred outflows of resources, less \$121.5 billion in total liabilities and \$555 million in deferred inflows of resources (Table 1).
- The State's net position increased by \$6.3 billion as a result of this year's operations. The net position for governmental activities increased by \$4.7 billion (16.9 percent) and net position for business-type activities increased by \$1.6 billion (191.7 percent) (Table 2) due to current year operations.
- The State's governmental activities had total revenues of \$143.4 billion, which exceeded total expenses of \$137 billion, excluding transfers to business-type activities of \$2.7 billion and a special item of \$1 billion, by \$6.4 billion (Table 2).
- The total cost of all the State's programs, which includes \$22.2 billion in business-type activities, was \$159.2 billion (Table 2).
- The General Fund reported a surplus this year of \$6.6 billion, which increased the accumulated fund balance to \$6.1 billion.
- Total debt outstanding at year-end was \$57.4 billion, comprised of \$43.4 billion in governmental activities and \$14 billion in business-type activities (Table 5).

## USING THIS ANNUAL REPORT

This annual report consists of a series of financial statements and supplementary information. The Statement of Net Position and the Statement of Activities (on pages 31 and 32, respectively) provide information about the activities of the State as a whole and present a longer-term view of the State's finances. Fund financial statements start on page 34. For governmental activities, these statements show how services were financed in the short-term, as well as how much may remain for future spending. Fund financial statements also report the State's operations in more detail than the government-wide statements by providing information about the State's most significant funds. The remaining statements provide financial information about activities for which the State acts solely as a trustee for the benefit of those outside the government and about public benefit corporations for which the State is accountable. The layout and relationship of the financial statements and supplementary information is visually illustrated as follows:

## Reporting the State as a Whole

### The Statement of Net Position and the Statement of Activities

The analysis of the State, as a whole, begins on page 22. One of the most important questions asked about the State's finances is: "Is the State, as a whole, better off or worse off as a result of the year's activities?" The Statement of Net Position and the Statement of Activities report information about the State as a whole and about its activities in a way that helps answer this question. These statements include all assets, deferred outflows of resources, liabilities and deferred inflows of resources, using the accrual basis of accounting, which is similar to the accounting method used by most private-sector companies. All of the current year's revenues and expenses are taken into account, regardless of when cash was received or paid.

These two statements report the State's net position and changes in it. One can think of the State's net position—the difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources—as one way to measure the State's financial health, or financial position. Over time, increases or decreases in the State's net position are one indicator of whether its financial health is improving or deteriorating. One may need to consider other non-financial factors, such as changes in the State's tax structure, population, employment, and the condition of the State's roads, bridges and buildings, in order to assess the overall health of the State.

In the Statement of Net Position and the Statement of Activities, operations of the State are divided into three kinds of activities:

- Governmental Activities**—Most of the State's basic services are reported here, including education, public health, public welfare, public safety, transportation, environment and recreation, support and regulation of business, general government, and interest on long-term debt. Federal grants, personal income taxes, consumption and use taxes, business and other taxes, transfer of lottery revenues, and bond proceeds finance most of these activities.

- **Business-type Activities**—The State charges a fee to customers to help it cover all or part of the cost of certain services it provides. The State’s Lottery Fund, Unemployment Insurance Benefit Fund, the State University of New York (SUNY) and the City University of New York (CUNY) Senior Colleges are reported here.
- **Component Units**—The State includes 42 separate legal entities in its report, as disclosed in Notes 1 and 14 of the Notes to the Basic Financial Statements. Although legally separate, these “component units” are important because the State is financially accountable for them and may be affected by their financial well-being. In addition, the State blends two other component units in the governmental activities because they provide services exclusively to the State.

## Reporting the State’s Most Significant Funds

### Fund Financial Statements

Financial statements prepared at the fund level provide additional details about the State’s financial position and activities. By definition, funds are accounting entities with a self-balancing set of accounts created for the purpose of carrying on specific activities or achieving specific goals. Information presented in the fund financial statements differs from the information presented in the government-wide statements because the perspective and basis of accounting used to prepare the fund financial statements are different than the perspective and basis of accounting used to prepare the government-wide statements. The State’s governmental and proprietary fund types use different perspectives and accounting bases. The funds presented in the fund financial statements are categorized as either major or non-major funds as required by generally accepted accounting principles (GAAP). The State uses three fund types for operations—governmental, proprietary and fiduciary. The analysis of the State’s major funds begins on page 24. The fund financial statements begin on page 34 and provide detailed information about the most significant funds, not the State as a whole.

- **Governmental Funds**—Most of the State’s basic services and expenditures are reported in governmental funds, which focus on how money flows into and out of those funds and the balances remaining at year-end that are available for spending. Governmental fund financial statements are prepared using the current financial resources measurement focus and the modified accrual basis of accounting, which measures cash and all other financial assets that can readily be converted to cash. Assets and liabilities that do not impact current financial resources, such as capital assets and long-term liabilities, are not recognized in the governmental funds statements. The governmental funds statements provide a detailed short-term view of the State’s general government operations and the basic services the State provides. Governmental funds information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the State’s programs. The relationships (or differences) between governmental activities (reported in the Statement of Net Position and the Statement of Activities) and governmental funds are presented in the reconciliations following the fund financial statements.
- **Proprietary Funds**—These funds are utilized when the State charges customers to recover its costs of providing services. Proprietary funds report on business-type activities, which include enterprise type funds and internal service type funds. The State has no internal service type funds on a GAAP basis and, therefore, has only one proprietary fund type—Enterprise. The State’s enterprise funds are the same as the business-type activities reported in the government-wide statements. Proprietary Funds statements are prepared using the economic resources measurement focus and the accrual basis of accounting. In addition to a Statement of Net Position and a Statement of Revenues, Expenses and Changes in Fund Net Position, Proprietary Funds are also required to report a Statement of Cash Flows (page 42).

### Reporting the State’s Fiduciary Responsibilities

The State is the trustee, or fiduciary, for its employees’ pension plans. It is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. All the State’s fiduciary activities are reported in separate Statements of Fiduciary Net Position and Changes in Fiduciary Net Position on pages 44 and 45, respectively. We exclude these activities from the State’s government-wide financial statements because the State cannot use these assets to finance its operations. The State is responsible for ensuring that the assets reported in these funds are used for their intended purposes.

## Component Units of the State

The State has created numerous public benefit corporations—two of which provide services exclusively to the State government itself, the New York Local Government Assistance Corporation (LGAC) and the Tobacco Settlement Financing Corporation (TSFC), and the rest of which also provide services directly to citizens. The financial position and activities of the LGAC and the TSFC have been blended within the Statement of Net Position and the Statement of Activities in the governmental activities column and in the governmental funds. The financial position and activities of the public benefit corporations that provide services directly to citizens have been presented in the Statement of Net Position and the Statement of Activities under the component units column and also in more detail in the component units Combining Statement of Net Position and the component units Combining Statement of Activities. These component units have been discretely presented in the State's financial statements because their nature and significance to the State cause them to have an effect on the fiscal condition of the State and the State is accountable for them.

## OVERALL FINANCIAL POSITION AND RESULTS OF OPERATIONS

Governmental entities are required by GAAP to report on their net position. The Statement of Net Position presents the value of all of New York State's assets and deferred outflows of resources, and liabilities and deferred inflows of resources, with the difference between them reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of changes in a government's financial position. The State reported net position of \$33.3 billion, comprised of \$70.6 billion in net investment in capital assets, and \$5.1 billion in restricted net position, offset by an unrestricted net position deficit of \$42.4 billion.

Net position reported for governmental activities increased by \$4.7 billion, increasing to \$32.5 billion from \$27.8 billion from last fiscal year. Unrestricted net position for governmental activities—the part of net position that can be used to finance day-to-day operations without constraints established by debt covenants, enabling legislation, or other legal requirements—had a deficit of \$39.8 billion at March 31, 2015. The following table (Table 1) was derived from the current and prior year government-wide Statements of Net Position:

**Table 1**

\*As of June 30, 2014 and 2013 for SUNY and CUNY activities

The net position deficit in unrestricted governmental activities, which decreased by \$5 billion in 2015, exists primarily because the State has issued debt for purposes not resulting in a capital asset related to State governmental activities and the obligation related to other postemployment benefits (\$13.6 billion). Such outstanding debt included: securitizing the State's future tobacco settlement receipts (\$1.7 billion); eliminating the need for seasonal borrowing by the LGAC (\$2.3 billion); and borrowing for local highway and bridge projects (\$4 billion), local mass transit projects (\$1.6 billion), and a wide variety of grants and other expenditures not resulting in State capital assets (\$13.2 billion). This deficit in unrestricted net position of governmental activities can be expected to continue for as long as the State continues to have obligations outstanding for purposes other than the acquisition of State governmental capital assets.

The net position for business-type activities increased by \$1.6 billion (191.7 percent) to \$771 million in 2015 as compared to a deficit of \$841 million in 2014. The increase in net position for business-type activities was caused primarily by employer contributions and other revenue exceeding unemployment benefit payments for the Unemployment Insurance Fund (\$1.8 billion), Lottery revenues exceeding expenses, including education aid transfers (\$83 million) and CUNY Senior College operating revenues and State support exceeding operating expenses (\$11 million). This was partially offset by SUNY expenses exceeding operating revenues and State support (\$232 million).

The following table (Table 2) was derived from the current and prior year government-wide Statements of Activities:

### Governmental Activities

In fiscal year 2015, the State's total revenues for governmental activities of \$143.4 billion exceeded its total expenses of \$137 billion by \$6.4 billion (Table 2). However, as shown in the Statement of Activities on page 32, the amount that State taxpayers ultimately financed for activities through State taxes and other State revenues was \$74.8 billion. Overall, the State's governmental program revenues, including intergovernmental aid, fees for services and capital grants, were \$68.6 billion in 2015. The State paid for the remaining "public benefit" portion of governmental activities with \$72.5 billion in taxes and \$2.3 billion in other revenues, including investment earnings. Additionally, \$1 billion was available as a special item from the State Insurance Fund (SIF) reserve release.

Table 3 presents the cost of State support for each of the State's five largest programs: education, public health, public welfare, public safety, and transportation, as well as each program's net cost (total cost less revenues generated by the activities). The net cost shows the financial obligation that was placed upon the State's taxpayers by each of these functions.

**Table 3**  
**Governmental Activities for the Fiscal Years Ended March 31, 2015 and 2014**  
(Amounts in millions)

	2015		2014	
	Total Cost of Services	Program Revenues	Net Cost of Services	Net Cost of Services
Education .....	\$ 32,672	\$ 3,652	\$ 29,020	\$ 27,778
Public health .....	58,442	37,859	20,583	19,745
Public welfare .....	14,146	11,120	3,026	2,725
Public safety .....	7,662	2,579	5,083	5,040

All others .....	14,750	10,089	4,661	6,405
<b>Totals</b> .....	<b>\$ 136,987</b>	<b>\$ 68,602</b>	<b>\$ 68,385</b>	<b>\$ 66,315</b>

### Business-type Activities

The cost of all business-type activities this year was \$22.2 billion, a decrease of \$1.6 billion as compared to \$23.8 billion in 2014 (Table 2). Decreases in unemployment benefit payments for the Unemployment Insurance Fund and in Lottery prizes, commissions and fees and other operating expenses, were offset by increases in SUNY educational and general expenses, hospital and clinic costs and interest on capital related debt, and by increases in CUNY Senior Colleges educational and general expenses. As shown in the Statement of Activities on page 32, the amount reported as transfers that General Fund tax revenues ultimately financed for business-type activities was \$2 billion after activity costs were paid by those directly benefiting from the programs (\$13.9 billion), and after grants and contributions (\$6.5 billion). The decrease in revenues from operating grants and contributions was primarily due to the decrease in Federal funding into the Unemployment Insurance Fund. The small decrease in revenues from charges for services (\$37 million) was primarily caused by decreases in Lottery ticket and video gaming sales.

## THE STATE'S FUNDS

The State uses fund accounting to ensure and demonstrate compliance with legal and finance-related requirements. As the State completed the year, its governmental funds (as presented in the balance sheet on page 34) reported a combined fund balance of \$14.2 billion. Included in this year's total change in fund balance is a surplus of \$6.6 billion in the State's General Fund, resulting from expenditures exceeding revenues by \$5.5 billion, which was offset by other financing sources of \$11.1 billion and a special item for State Insurance Fund (SIF) reserve release of \$1 billion to the General Fund. The General Fund reported increases in personal income taxes (\$3.6 billion), consumption and use taxes (\$98 million) and miscellaneous revenues and the special item (\$3.9 billion) offset by decreases in business taxes (\$109 million) and other taxes (\$44 million). Compared to the prior year, personal income tax revenue increased due to greater income tax withholdings and estimated tax payments. The increase in miscellaneous revenues and the special item is due to revenue sources related to financial settlements with a number of banks and other associated entities for violations of New York banking laws (\$6.3 billion) and the State Insurance Fund reserve release (\$1 billion). Total General Fund revenues increased \$7.4 billion while expenditures increased \$830 million. Local assistance expenditures increased by nearly \$511 million, due primarily to the timing of education assistance expenditures offset by transportation, public health and public welfare expenditures. State operations expenditures increased \$319 million due to higher expenditures related to personal service and fringe benefits costs related to the repayments of the deficit reduction withheld from employees in the 2011-12 fiscal year. The State ended the 2014-15 fiscal year with a General Fund accumulated fund balance of \$6.1 billion.

The Enterprise Funds financial statements provide the same type of information found in the government-wide financial statements, but in more detail. The change in net position of the Enterprise Funds has already been discussed in the preceding discussion of business-type activities.

### General Fund Budgetary Highlights

The State's financial plan, which uses the cash basis of accounting, is updated quarterly throughout the year as required by the State Finance Law. The quarterly updates to the 2014-15 financial plan reflected revisions to the original financial plan based on actual operating results to date and an updated analysis of underlying economic, revenue, and spending trends, as well as other actions and developments. This discussion includes comparisons to estimates from two different financial plan updates in 2014-15: the original financial plan (issued May 9, 2014) and the final financial plan (issued February 25, 2015).

General Fund receipts exceeded disbursements by \$5.1 billion in 2014-15. The General Fund ended the fiscal year with a closing cash fund balance of \$7.3 billion, which consisted of \$1.8 billion in the State's rainy day reserve funds (\$1.3 billion in the Tax Stabilization Reserve Account and \$540 million in the Rainy Day Reserve Fund), \$74 million in the Community Projects Fund, \$21 million in the Contingency Reserve Fund, and \$5.4 billion in the Refund Reserve Account. Total General Fund receipts for the year (including transfers from other funds) were approximately \$67.9 billion. Total General Fund disbursements for the year (including transfers to other funds) were approximately \$62.9 billion.

Net operating results were \$5.2 billion more favorable than anticipated in the original financial plan, with the original plan projecting a net operating deficit of \$180 million. Total receipts and transfers from other funds exceeded original financial plan estimates by \$5 billion and total disbursements and transfers to other funds were less than original financial plan estimates by \$286 million.

Several factors contributed to higher than projected total receipts; however, the majority of the positive variance was driven by \$4.7 billion higher than expected non-tax collections received as a result of monetary settlements reached by the Department of Financial Services, the Department of Law, and the Manhattan District Attorney's Office with banks, insurance companies, and other financial institutions for violations of New York banking and insurance laws. In addition, actual base tax growth for 2014-15 finished at 4.0 percent, which was higher than the original financial plan estimate of 3.2 percent. Higher overall tax collections were primarily attributable to higher business tax collections across all components, which were particularly driven by a stronger underlying liability for the corporate franchise tax, higher audits for the bank tax, and fewer than anticipated corporate franchise tax refunds paid.

Lower than projected disbursements occurred in multiple spending categories including local assistance, State operations, and general state charges. Lower spending in these categories was partially offset by higher than projected transfers, including transfers to support capital financing needs, and transfers related to the early payment of certain FY 2016 debt service obligations.

Net operating results were \$469 million less favorable than anticipated in the final financial plan, with net operating results in the final financial plan projected at \$5.5 billion. Total receipts and disbursements were lower than the final financial plan estimates (by \$794 million and \$325 million, respectively). Lower receipts were primarily due to the delay of certain monetary settlement payments to the State which were expected to be received prior to March 31, 2015, partly offset by other monetary settlements received by the State which were unanticipated in the final financial plan. Lower than projected total disbursements mainly reflected lower spending for local assistance and State operations, partly offset by higher transfers to support capital financing needs.

The State's current year General Fund GAAP surplus of \$6.6 billion reported on page 36 differs from the General Fund's cash basis operating surplus of \$5.1 billion reported in the reconciliation found under Budgetary Basis Reporting on page 106. This variation results from differences in basis of accounting, entity and perspective differences between budgetary reporting versus those established as GAAP and followed in preparation of this financial statement.

## CAPITAL ASSET AND DEBT ADMINISTRATION

### Capital Assets

As of 2015, the State has \$101.8 billion invested in a broad range of capital assets, including equipment, buildings, construction in progress, land preparation, and infrastructure, which primarily includes roads and bridges (Table 4). This amount represents a net increase (including additions and deductions) of \$1.4 billion over last year.

**Table 4**

\*As of June 30, 2014 and 2013 for SUNY and CUNY activities

State-owned roads and bridges that are maintained by the Department of Transportation (DOT) are being reported using the modified approach. As allowed by the reporting provisions in the Governmental Accounting Standards Board Statement (GASBS) No. 34, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments*, infrastructure assets that meet prescribed criteria do not have to be depreciated but must be maintained at levels defined by State policy. The State is responsible for maintaining more than 42,700 lane miles of highway and 7,902 bridges.

Highway condition is rated using a scale of 1 (very poor) to 10 (excellent) based on the prevalence of surface-related pavement distress. For bridges, a rating of 6 to 7 is excellent, which indicates that no repairs are necessary. A rating of 3 to 5 is fair to good, which indicates that minor repairs are required. A rating of 1 to 2 is deficient, which indicates major repairs or replacements are necessary. Refer to the Required Supplementary Information (RSI) for additional information regarding infrastructure assets using the modified approach. Pavement condition rating parameters for the current year are between 6.7 and 7.2, while bridge pavement condition parameters are between 5.3 and 5.6. Capital spending for highway and bridge maintenance and preservation projects was approximately \$1.5 billion in 2015.

The State’s 2015-16 fiscal year capital budget calls for it to spend \$11.2 billion for capital projects, of which \$4.7 billion is for transportation projects. To pay for these capital projects, the State plans to use \$685 million in general obligation bond proceeds, \$5.4 billion in other financing arrangements with public authorities, \$1.4 billion in Federal funds, and \$3.7 billion in funds on hand or received during the year. More detailed information about the State’s capitalization policy for capital assets is presented in Note 1 of the Notes to the Basic Financial Statements.

#### Debt Administration

The State has obtained long-term financing in the form of voter-approved General Obligation debt (voter-approved debt) and other obligations that are authorized by legislation but not approved by the voters (non-voter-approved debt), including lease/purchase and contractual obligations where the State’s legal obligation to make payments is subject to and paid from annual appropriations made by the Legislature or from assignment of revenue in the case of Tobacco Settlement Revenue Bonds. Equipment capital leases and mortgage loan commitments, which represent \$302 million as of March 31, 2015, do not require legislative or voter approval. Other obligations include certain bonds issued through State public authorities and certificates of participation. The State administers its long-term financing needs as a single portfolio of State-supported debt that includes general obligation bonds and other obligations of both its governmental activities and business-type activities. Most of the debt reported under business-type activities, all of which was issued for capital assets used in those activities, is supported by payments from resources generated by the State’s governmental activities—thus it is not expected to be repaid from resources generated by business-type activities. The State Finance Law allows the bonded portion of this single combined debt portfolio, which includes debt reported in both governmental and business-type activities, to include debt instruments which result in a net variable rate exposure in an amount that does not exceed 15 percent of total outstanding State-supported debt, and interest rate exchange agreements (swaps) that do not exceed 15 percent of total outstanding State-supported debt. At March 31, 2015, the State had \$193 million in State-supported (net) variable rate bonds outstanding and \$1.9 billion in interest rate exchange agreements, in which the State issues variable rate bonds and enters into a swap agreement that effectively converts the rate to a fixed rate. Risks related to these transactions are explained in Note 7.

At March 31, 2015, variable rate bonds, net of those subject to the fixed rate swaps, were equal to 0.4 percent of the State-supported debt portfolio. Variable rate bonds that were converted to a synthetic fixed rate through swap agreements of \$1.9 billion were equal to 4 percent of the total State-supported debt portfolio.

At March 31, 2015, the State had \$57.4 billion in bonds, notes, and other financing agreements outstanding compared with \$58.3 billion in the prior year, a decrease of \$932 million as shown below in the table.

**Table 5**

\*As of June 30, 2014 and 2013 for SUNY and CUNY activities

In addition to the debt outlined above, the State reported \$870 million for collateralized borrowings (\$430 million in governmental activities and \$440 million in business-type activities) for which specific revenues have been pledged. In the prior year, the State reported \$440 million for collateralized borrowings, all of which were in governmental activities.

During the 12 month period reported, the State issued \$5 billion in bonds, of which \$1.8 billion was for refunding and \$3.2 billion was for new borrowing. See Note 16 for State debt issued subsequent to the reporting period.

\*As of June 30, 2014 and 2013 for SUNY and CUNY activities

The State's assigned general obligation bond ratings on March 31, 2015 were as follows: AA+ by Standard & Poor's Investor Services (S&P), Aa1 by Moody's Investor Service, Inc., and AA+ by Fitch Investor Service. The State Constitution, with exceptions for emergencies, limits the amount of general obligation bonds that can be issued to that amount approved by the voters for a single work or purpose in a general election. Currently, the State has \$2.7 billion in authorized but unissued bond capacity that can be used to issue bonds for specifically approved purposes. The State may issue short-term debt without voter approval in anticipation of the receipt of taxes and revenues or proceeds from duly authorized but not issued general obligation bonds.

The State Finance Law, through the Debt Reform Act of 2000 (the Act), also imposes phased-in caps on the issuance of new State-supported debt and related debt service costs. The Act also limits the use of debt to capital works and purposes, and establishes a maximum length of term for repayment of 30 years. The Act applies to all State-supported debt. The Act does not apply to debt issued prior to April 1, 2000 or to other obligations issued by public authorities where the State is not the direct obligor.

## **ECONOMIC FACTORS AFFECTING THE STATE**

In 2014, the nation's real Gross Domestic Product grew by 2.4 percent, the fastest pace in four years. The nation added more than 2.6 million jobs, which was an annual growth rate of 1.9 percent and the strongest since 2000. The national unemployment rate fell to 5.7 percent in March 2015, the lowest level since August 2008 but still 1.1 percentage points higher than the average for 2007.

New York's real Gross State Product grew by a somewhat more robust 2.5 percent in 2014 (following uneven growth during the recovery), driven by strong economic growth in New York City and its surrounding suburbs. In 2014, New York's growth in Gross State Product ranked 13th among the 50 states. New York added 143,000 jobs in 2014, an annual growth rate of 1.7 percent and the fastest rate of job growth since 2000. New York has added more than twice as many jobs (670,000) through the end of 2014 than were lost during the Great Recession. In 2014, employment reached a record 9.1 million jobs.

Three-quarters of the job gains during the economic recovery have been concentrated in New York City and Long Island, with employment in both areas well above prerecession levels. While job growth elsewhere in New York State has been weaker, the rest of the State has recovered almost all of the jobs lost during the recession. Some upstate metropolitan areas, such as Ithaca, Albany, Rochester and Buffalo, have experienced stronger job growth. Other upstate metropolitan areas, such as Binghamton, Syracuse and Utica-Rome, still have not recovered the jobs lost in the Great Recession. Furthermore, many of these areas, which rely heavily on jobs in the manufacturing sector, have been struggling with job losses and industrial shifts for decades (the State has lost more than half a million manufacturing jobs since 1990).

More than two-thirds of job growth during the recovery has been concentrated in industries that pay less than the statewide average salary, such as in restaurants, health care and retail stores. The professional and business services sector was the only high-wage sector that had significant job growth, contributing almost one quarter of the jobs added. The public sector, which has been losing jobs since 2009, continued to contract in 2014, albeit at a slower pace than in previous years.

The State's unemployment rate has fallen from a recessionary peak of 8.9 percent in December 2009 to 5.7 percent in March 2015, but it remains more than one percentage point above its prerecession level. Across New York State's 62 counties, unemployment rates in March 2015 were highest in Hamilton and Bronx counties (9 percent) and lowest in Tompkins County (3.8 percent). As of March 2015, more than a third of the unemployed people in New York were considered to be long-term unemployed (i.e., out of work for six months or more), a higher share than before the recession.

The securities industry in New York City, with its high-paid jobs, large bonuses and strong corporate profits, is an important contributor to the State's revenues and has a significant impact on the downstate economy. In State Fiscal Year (SFY) 2013-14, the Office of the State Comptroller estimated that securities industry-related activities contributed 19 percent of the State's tax revenues (from personal income and corporate Article 9A tax payments). In SFY 2014-15, the State also benefited from more than \$4.9 billion in legal settlements from financial firms, stemming from violations of New York State banking and insurance laws.

## **CONTACTING THE STATE'S FINANCIAL MANAGEMENT**

This financial report is designed to provide our citizens, taxpayers, customers, investors and creditors with a general overview of the State's finances and to show the State's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the State Comptroller's Communications Office at 110 State Street, 15th Floor, Albany, New York 12236 or visit our website at [www.osc.state.ny.us](http://www.osc.state.ny.us).

# Reconciliation of the Balance Sheet

## GOVERNMENTAL FUNDS TO THE STATEMENT OF NET POSITION

March 31, 2015

(Amounts in millions)

<b>Total fund balances—governmental funds</b> .....	<b>\$ 14,191</b>
Amounts reported for governmental activities in the statement of net position are different because:	
Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds .....	86,651
Deferred inflows of resources related to the State's revenues that will be collected after year-end, but are not available soon enough to pay for the current period's expenditures are deferred in the funds .....	1,743
Medicaid cost recoveries are not available soon enough to reduce current period expenditures that are due to the Federal government .....	(176)
Deferred outflows of resources related to derivative instruments and deferred losses on refundings of bonds payable and obligations under lease/purchase and other financing arrangements are not reported in the funds .....	679
Some liabilities (listed below) are not due and payable in the current period and therefore are not reported in the funds:	
Interest payable .....	(405)
Due to business-type activities .....	(619)
Long-term liabilities due within one year .....	(4,371)
Tax refunds payable .....	(1,152)
Accrued liabilities .....	(5,185)
Payable to local governments .....	(241)
Due to Federal government .....	(1,100)
Pension contributions payable .....	(2,499)
Other postemployment benefits .....	(13,602)
Pollution remediation .....	(865)
Collateralized borrowings .....	(401)
Obligations under lease/purchase and other financing arrangements .....	(36,982)
Bonds payable .....	(2,888)
Derivative instruments .....	(224)
<b>Total net position—governmental activities</b> .....	<b>\$ 32,554</b>

See accompanying notes to the basic financial statements.

# Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances (Deficits)

## GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

Year Ended March 31, 2015

(Amounts in millions)

<b>Net change in fund balances—total governmental funds</b> .....	<b>\$</b>	<b>6,459</b>	
Amounts reported for governmental activities in the statement of activities are different because:			
Capital outlays are reported as expenditures in governmental funds and the sale of capital assets is recorded as revenue in governmental funds. However, in the statement of activities, the cost of capital assets is allocated over their estimated useful lives as depreciation expense. In the current period, these amounts are:			
Depreciation expense, net of asset disposal .....	\$	(356)	
Disposal of assets .....		(702)	
Purchase of assets .....		1,474	
		<u>1,474</u>	416
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net position. Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net position. This amount is the net effect of proceeds and repayments:			
Repayment of principal .....	\$	3,658	
Long-term debt proceeds .....		(4,136)	
Payments to escrow agents for refundings .....		1,737	
		<u>1,737</u>	1,259
Increase in revenues in the statement of activities that do not reduce current financial resources and are not reported in the funds .....			
			(1,452)
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds:			
Local assistance grants .....	\$	511	
State operations .....		(3,671)	
Capital construction .....		1,764	
Transfers to business-type activities .....		(570)	
		<u>(570)</u>	(1,966)
<b>Change in net position of governmental activities</b> .....	<b>\$</b>		<b><u>4,716</u></b>

See accompanying notes to the basic financial statements.

# NOTES TO THE BASIC FINANCIAL STATEMENTS

March 31, 2015

## Note 1 Summary of Significant Accounting Policies

The accompanying basic financial statements of the State of New York (State) have been prepared in conformity with generally accepted accounting principles (GAAP) for governments. Such principles are prescribed by the Governmental Accounting Standards Board (GASB), which is the standard-setting body for establishing governmental accounting and financial reporting principles in the United States of America.

The basic financial statements have been prepared primarily from accounts maintained by the State Comptroller. Additional data has been derived from reports prescribed by the State Comptroller and prepared by State departments, agencies, public benefit corporations and other entities based on independent or subsidiary accounting systems maintained by them.

### a. Reporting Entity

The basic financial statements include all funds of the primary government, which is the State, as well as the component units and other organizational entities determined to be included in the State's financial reporting entity.

The decision to include a component unit in the State's reporting entity is based on several criteria, including legal standing, fiscal dependency and financial accountability. Based on the application of these criteria, the following is a brief review of certain entities included in the State's reporting entity.

#### Blended Component Units

The New York Local Government Assistance Corporation (LGAC) was created by Chapter 220 of the Laws of 1990. LGAC is administered by seven directors consisting of the State Comptroller and the Director of the Division of the Budget, serving ex-officio, and five directors appointed by the Governor. LGAC was created to issue long-term debt on behalf of the State to finance certain local assistance aid payments plus amounts necessary to fund a capital reserve fund and other issuance costs. LGAC is legally separate but provides services exclusively to the State, and therefore is reported as part of the primary government as a blended component unit.

The Tobacco Settlement Financing Corporation (TSFC) was created by Part D3 of Chapter 62 of the Laws of 2003. TSFC was created as a subsidiary of the State of New York Municipal Bond Bank Agency (MBBA). The directors of the MBBA are members of TSFC. TSFC is governed by a seven member board, consisting of: the Chairman of the MBBA, the Secretary of State, the Director of the Budget, the State

Comptroller or his appointee, and three directors appointed by the Governor. TSFC was created to issue long-term debt on behalf of the State to finance State operations plus amounts necessary to fund a capital reserve fund and other issuance costs. TSFC is legally separate but provides services exclusively to the State, and therefore is reported as part of the primary government as a blended component unit.

#### Discretely Presented Component Units

The public benefit corporations (Corporations) listed in Note 14 were established by State statute with full corporate powers. The Governor, with the approval of the State Senate, appoints most members of the board of directors of most Corporations and either the Governor or the board of directors selects the chairman and chief executive officer. Corporations generally submit annual reports to the Governor, the Legislature and the State Comptroller on their operations and finances, accompanied by an independent auditors' report thereon. Corporations also submit to the Governor and the Legislature annual budget information on operations and capital construction. The State Comptroller is empowered to conduct financial and management audits of the Corporations. Financial assistance was provided in the fiscal year ended March 31, 2015 to certain Corporations and such assistance is expected to be required in future years. Accordingly, the fiscal condition of the State is related to the fiscal stability of the Corporations. Since the Corporations are legally separate organizations for which the Governor and Legislature are financially accountable, they are discretely presented as component units of the State.

#### Related Organizations and Joint Ventures

The State's officials are also responsible for appointing the members of the boards of various related organizations (e.g., the Nassau County Interim Finance Authority), but the State's accountability for these organizations does not extend beyond making the appointments. As discussed in more detail in Note 15, the State participates in several joint ventures but only reports on one due to materiality.

### b. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity

within governmental and business-type activities has been eliminated from these statements. However, balances due and resource flows between governmental and business-type activities have not been eliminated. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or program are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Certain indirect costs have been allocated and are reported as direct program expenses of individual functions or programs. Program revenues include: charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment; grants and contributions that are restricted to meeting the operational requirements of a particular function or segment; and capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Taxes and other items not included as program revenues are reported as general revenues, as required.

Separate financial statements are provided for Governmental Funds, Enterprise Funds and Fiduciary Funds, even though the latter are excluded from the government-wide financial statements. Major individual Governmental Funds and major individual Enterprise Funds are reported as separate columns in the fund financial statements.

### c. Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting, as are the Enterprise Funds, Component Units and the Fiduciary Funds financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Taxes are recognized as revenues in the year in which they are earned. Grants, entitlements and donations are recognized as revenues as soon as all eligibility requirements have been met.

Governmental fund financial statements are prepared using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered available when they are collected within the current period or collectible within 12 months of the end of the

current fiscal period. Tax revenues are recorded by the State as taxpayers earn income (personal income, general business and other taxes), as sales are made (consumption and use taxes), and as the taxable event occurs (miscellaneous taxes), net of estimated overpayments (refunds). Receivables not expected to be collected within the next 12 months are recorded by deferred inflows of resources. Expenditures and related liabilities are generally recorded in the accounting period the liability is incurred to the extent it is expected to be paid within the next 12 months, with the exception of items covered by GASB Interpretation 6 (GASBI 6), *Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements*. GASBI 6 modified the recognition criteria of certain expenditures and liabilities. GASBI 6 requires that expenditures and liabilities such as debt service, compensated absences, and claims and judgments be recorded in the governmental fund statements only when they mature or become due for payment within the period. Expenditure-driven grants are recognized as revenues when the qualifying expenditures have been incurred and all other grant requirements have been met and amounts are considered available. Nonexchange grants and subsidies, such as local assistance grants and public benefit corporation subsidies, are recognized as expenditures when all requirements of the grant and/or subsidy have been satisfied.

The State reports the following major and other governmental funds:

**General Fund**—is the primary operating fund of the State and is used to account for all financial transactions not required to be accounted for in another fund.

**Federal Special Revenue Fund**—accounts for Federal grants received by the State that are earmarked for specific programs. In order to comply with Federal accounting and reporting requirements, certain Federal grants are accounted for in a number of accounts that are combined and reported as the Federal Special Revenue Fund. Accounts that are combined include the Federal USDA-Food and Nutrition Services Account, the Federal Health and Human Services Account, the Federal Education Account, the Federal Operating Grants Account, the Unemployment Insurance Administration Account, the Unemployment Insurance Occupational Training Account and the Federal Employment and Training Grants Account.

**General Debt Service Fund**—accounts for the payment of principal and interest on the State's general debt, the payments on certain lease/purchase or other contractual obligations, and transactions related to the Tobacco Settlement Financing Corporation.

**Other Governmental Funds**—is a summarization of all the non-major governmental funds.

The governmental fund financial statements include a reconciliation between the fund statements and the government-wide statements. Differences that make a reconciliation necessary include the differences in measurement focus and basis of accounting between the statements. The Statement of Activities reflects the net costs of each major function of State operations, which differs from the presentation of expenditures in the Statement of Revenues, Expenditures and Changes in Fund Balances—Governmental Funds, which matches the State’s budgetary (financial plan) presentation.

The State reports the following major Enterprise Funds:

**Lottery Fund**—accounts for lottery revenues that are earmarked for education assistance to local school districts, lottery administrative costs of the New York State Gaming Commission and payment of lottery prizes.

**Unemployment Insurance Benefit Fund**—accounts for employer unemployment contributions utilized for the payment of unemployment compensation benefits.

**SUNY Fund**—accounts for the operation of the State University of New York (SUNY). Information reported in this fund is obtained from the audited financial statements prepared by SUNY for the fiscal year ended June 30, 2014.

**CUNY Fund**—accounts for the operation of the City University of New York (CUNY) Senior Colleges. Information reported in this fund is obtained from the audited financial statements of the Senior Colleges prepared by CUNY for the fiscal year ended June 30, 2014.

Enterprise Funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services in connection with an Enterprise Fund’s principal ongoing operations. Operating expenses for Enterprise Funds include the cost of sales and services, administrative expenses and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Fiduciary Funds are used to report assets held in a trustee or agency capacity for others and therefore cannot be used to support the government’s own programs. The Fiduciary Fund types of the State consist of the following:

**Pension Trust Fund**—accounts for the activities of the New York State and Local Retirement System, which accumulates resources for pension benefit payments to qualified public employees.

**Private Purpose Trust Funds**—are used to account for resources legally held in trust as escheat property and resources held in trust to facilitate savings for higher education expenses, pursuant to the New York State tuition savings program. There is no requirement that any portion of these resources be preserved as capital. Information reported for the tuition savings program is obtained from the audited financial statements prepared by the program for the fiscal year ended December 31, 2014.

**Agency Funds**—report those resources held by the State in a purely custodial capacity (assets equal liabilities).

Additionally, the State includes discretely presented component units:

**Component Units**—the public benefit corporations’ financial statements, except for the State Insurance Fund, are prepared using the economic resources measurement focus and are accounted for on the accrual basis of accounting. The State Insurance Fund prepares financial statements in conformity with accounting practices prescribed or permitted by the New York State Department of Financial Services. The Department of Financial Services recognizes only New York Statutory Accounting Practices for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under New York State Insurance Law.

#### d. Cash and Investments

Cash balances of funds held in the State Treasury are commingled in a general checking account and several special purpose bank accounts. The available cash balance in the general checking account beyond immediate need is pooled for short-term investment purposes. The balances pooled are limited to legally stipulated investments, which are reported at cost, including accrued interest, which approximates fair value. Non-interest-bearing compensating balances of \$5.1 billion are included in cash and investments at March 31, 2015. At various times during the year, compensating balances could be substantially higher. Cash balances not held in the State Treasury and controlled by various State officials are generally deposited in interest-bearing accounts or other legally stipulated investments. Additional information about the State’s cash and investments is provided in Note 2.

Generally, for purposes of reporting cash flows, cash includes cash and cash equivalents. Cash equivalents are composed of liquid assets with maturities of 90 days or less. The Enterprise Funds Statement of Cash Flows uses the direct method of reporting cash flows.

All investments with a maturity of more than one year are recorded on the Statement of Net Position and the balance sheet at fair value and all investment income, including changes in the fair value of investments, is reported as revenue. Investments of the short-term investment pool have a maturity of one year or less and are recorded at cost. Fair values were determined using market values at the applicable entities' year-end.

#### e. Receivables

Receivables are stated net of estimated allowances for uncollectible amounts, which are determined based upon past collection experience and current economic conditions. Due from Federal government represents amounts owed to the State to reimburse it for expenditures incurred pursuant to federally funded programs. Other receivables represent amounts owed to the State, including Medicaid drug rebates, financial service settlements, tobacco settlements, patient fees of SUNY and Health Department hospitals and various mental hygiene facilities, student loans and lottery ticket sales. Additional information about receivables is provided in Note 4.

#### f. Internal Balances

All outstanding balances between funds at the end of the fiscal year are referred to as "due to/from other funds" on the fund financial statements. Generally, the effect of interfund activity within the governmental funds has been removed. Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances." For the most part, the remaining difference is a result of different year-ends between the State and SUNY and CUNY.

#### g. Other Assets

Other assets in governmental activities and business-type activities include payments for costs applicable to future accounting periods, and other types of assets not reported on other lines. Inventories reported by the governmental funds are recorded as expenditures when they are purchased. Inventories reported by the Enterprise Funds are valued at cost using the first-in/first-out (FIFO) method.

#### h. Capital Assets

Capital assets are reported in the Statement of Net Position for government-wide and enterprise funds and further disclosed in Note 5. Capital assets include: land in urban centers, rural areas and forest preserves; land improvements; land preparation—roads; buildings which house State offices, correctional facilities, hospitals and educational facilities; equipment used in construction work, hospitals, offices, etc.; construction

in progress; intangible assets (i.e., easements and internally generated software); and infrastructure assets such as roads and bridges. Capital assets are reported at historical cost or estimated historical cost and donated capital assets are valued at their estimated fair market value at the date of donation.

Equipment that has a cost in excess of \$40 thousand at the date of acquisition and has an expected useful life of two or more years is capitalized. All initial building costs and building improvements and land and land improvements in excess of \$100 thousand are capitalized. Infrastructure assets in excess of \$1 million are also capitalized. Software is capitalized when the costs exceed \$1 million.

The costs of normal repairs and maintenance that do not add to the value or extend lives of assets materially are not capitalized, but are reported as expenses in the year incurred. Expenses relating to roads and bridges that add to the capacity and efficiency of the road and bridge networks are not expensed but are capitalized. All maintenance and preservation costs relating to roads and bridges are expensed in the year incurred and not capitalized.

Buildings, land improvements, equipment and intangible assets of the primary government are depreciated or amortized using the straight-line method over the following estimated useful lives:

Assets	Governmental Activities (Years)	Business-type Activities (Years)
Buildings and building improvements . . . . .	12-60	2-50
Equipment and vehicles . . . . .	4-30	2-50
Land improvements . . . . .	12-30	2-50
Intangibles—easements . . . . .	20	2-50
Intangibles—computer software . . . . .	10-12	2-50

Land preparation reflects the costs of preparing the land for the construction of roads. Since land preparation has an indefinite life, associated costs are not depreciated.

The State has elected to use the modified approach for reporting and accounting for its highways and bridges reported by DOT. The modified approach requires the State to commit to preserving and maintaining these infrastructure assets at levels established by DOT. No depreciation expense is reported for these assets and no amounts are capitalized in connection with improvements that lengthen the lives of such assets, unless the improvements also increase their capacity or efficiency. DOT maintains an inventory of these assets and performs periodic condition assessments to ensure that the predetermined condition level is maintained. The Required Supplementary Information (RSI) contains additional information regarding infrastructure reported using the modified approach.

Capital asset reporting does not include historical artifacts, artwork and collections that are maintained by various State agencies, the State Archives, the State Museum and the State Library with the exception of SUNY and CUNY. These items are protected and preserved, held for public exhibition and educational purposes, and the proceeds from the sale of items are used to acquire new items for the collection.

Capital assets in business-type activities and Enterprise Funds are from SUNY and CUNY. These capital assets are stated at cost, or in the case of gifts, fair value at the date of receipt. SUNY capitalizes building renovations and additions costing over \$100 thousand, equipment items with a unit cost of \$5 thousand or more, and intangible assets, including internally generated computer software, costing \$1 million or more. SUNY reports all artwork, historical treasures and library books. CUNY capitalizes renovations and improvements that significantly increase the value or extends the useful lives of the structures and equipment with a cost of more than \$5 thousand and useful lives of two or more years. CUNY reports intangible assets,

artwork, historical treasures and library books with a unit cost of more than \$5 thousand. SUNY and CUNY capital assets, with the exception of land, construction in progress and works of art and historical treasures, are depreciated or amortized on a straight-line basis over their estimated useful lives ranging from 2 to 50 years.

#### i. Deferred Outflows of Resources and Deferred Inflows of Resources

Deferred outflows of resources are defined as a consumption of net assets by the government that is applicable to a future reporting period. Deferred inflows of resources are defined as an acquisition of net assets by the government that is applicable to a future reporting period. Deferred outflows of resources increase net position, similar to assets, and deferred inflows of resources decrease net position, similar to liabilities.

The components of the deferred outflows of resources and deferred inflows of resources related to the primary government at March 31, 2015 are as follows (amounts in millions):

	Governmental Activities	Business-type Activities	Primary Government
<b>Deferred outflows of resources:</b>			
Loss on refunding of debt	\$ 552	\$ 81	\$ 633
Derivative activities	127	66	193
<b>Total deferred outflows of resources</b>	<b>\$ 679</b>	<b>\$ 147</b>	<b>\$ 826</b>
<b>Deferred inflows of resources:</b>			
State Insurance Fund reserve release	\$ 500	\$ —	\$ 500
Gain on refunding of debt	51	—	51
Federal grants	4	—	4
<b>Total deferred inflows of resources</b>	<b>\$ 555</b>	<b>\$ —</b>	<b>\$ 555</b>

The components of the deferred inflows of resources related to the governmental funds at March 31, 2015 are as follows (amounts in millions):

	General	Federal Special Revenue	General Debt Service	Other Governmental Funds	Total Governmental Funds
<b>Governmental Funds:</b>					
<b>Deferred inflow of resources:</b>					
State Insurance Fund assessments	\$ 500	\$ —	\$ —	\$ —	\$ 500
Mortgage securities settlements	23	—	—	—	23
Public health/patient fees	—	—	—	28	28
Taxes considered unavailable	653	—	109	14	776
Medicaid	83	742	—	—	825
Oil spill	—	—	—	79	79
Miscellaneous agency	24	8	—	23	55
Federal grants	—	4	—	—	4
ENCON collections	—	—	—	8	8
<b>Total</b>	<b>\$ 1,283</b>	<b>\$ 754</b>	<b>\$ 109</b>	<b>\$ 152</b>	<b>\$ 2,298</b>

## j. Long-Term Obligations

In the government-wide financial statements and Enterprise Funds financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities' or business-type activities' Statement of Net Position. For governmental activities, bond premiums and discounts are reported as a component of the related bonds payable, and gains and losses on refunding are reported as deferred inflows of resources or deferred outflows of resources. Both are amortized over the life of the bonds using the straight-line method. In business-type activities, SUNY losses on refunding are reported as deferred outflows of resources and amortized over the life of the related debt. CUNY bond premiums and discounts are reported as a component of the related bonds payable, and gains and losses on refunding are reported as deferred inflows of resources or deferred outflows of resources. Both are amortized over the life of the bonds using the straight-line method. Issuance costs are reported as an expense in the period incurred.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as non-personal service expenditures in the period incurred.

## k. Compensated Absences

The estimated vacation leave liability for State employees at March 31, 2015 is \$876 million and represents a decrease of \$20 million over the prior year. State employees accrue vacation leave based primarily on the number of years employed up to a maximum rate of 25 days per year, but may accumulate no more than a maximum of 40 days.

SUNY employees accrue vacation leave based primarily on the number of years employed up to a maximum rate of 21 days per year and may accumulate no more than a maximum of 40 days. CUNY employees accrue vacation leave based upon the number of years employed, with the maximum accumulation generally ranging from 45 to 50 days. The liability for vacation leave approximated \$255 million and \$77 million for SUNY and CUNY, respectively, at June 30, 2014.

CUNY employees may receive payments of up to 50 percent of the value of their accumulated sick leave as of the date of retirement. CUNY reported a liability of \$21 million for sick leave credits in accrued liabilities as of June 30, 2014.

Lottery's employees, upon termination, may receive vacation pay benefits up to a maximum of 30 days. Lottery recognizes employees' compensated absence

benefits when earned. The liability for employees' compensated absences was approximately \$1.6 million as of March 31, 2015.

## l. Accounting for Lease/Purchase and Other Financing Arrangements

The construction of certain State office buildings, campus facilities and other public facilities has been financed through bonds and notes issued by public benefit corporations pursuant to lease/purchase and other financing arrangements with the State. The State has also entered into financing arrangements with public benefit corporations that have issued bonds to finance past State budgetary deficits and grants to local governments for both capital and operating purposes (Note 7).

These lease/purchase and other financing arrangements, which the State will repay over the duration of the agreements, constitute long-term liabilities. The amount included in obligations under lease/purchase and other financing arrangements consists of total future principal payments and equals the outstanding balance of the related bonds and notes. Reporting relative to capitalized interest is not included for leased capital assets.

## m. State Lottery

The State Lottery is accounted for as an Enterprise Fund. The revenues, administrative costs, aid to education and expenses for amounts allocated to prizes are reported, and uncollected ticket sales at March 31, 2015 are accrued. Prize monies to meet long-term prize payments are invested in United States government-backed obligations, New York City Transitional Finance Authority municipal bonds and Agency for International Development (AID) Bonds, and are recorded at fair value. Lottery prize liabilities are recorded at a discounted value equivalent to the related investments. At March 31, 2015, the prize liabilities of approximately \$2.2 billion were reported at a discounted value of approximately \$1.4 billion (at interest rates ranging from 0.07 percent to 8.49 percent).

## n. Net Position

The difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources is "Net Position" on government-wide, proprietary fund, component units and fiduciary fund financial statements.

Net position is reported as restricted when constraints placed on net position use are either:

- a. Externally imposed by creditors (such as debt covenants), grantors, contributors, laws or regulations of other governments; or
- b. Imposed by law through constitutional provisions or enabling legislation.

Enabling legislation authorizes the State to assess, levy, charge or otherwise mandate payment of resources (from resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. A legally enforceable requirement is one that an outside party (such as citizens, public interest groups or the judiciary) can compel the government to honor. When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, then unrestricted resources as they are needed.

At March 31, 2015, the Governmental Activities reported restricted net position of \$3.1 billion due to restrictions externally imposed by creditors or enabling legislation. This included \$2.6 billion restricted for debt service payments from various capital reserve funds, and \$511 million restricted for other purposes (details of fund balance classification are available in Note 1.o.).

The following terms are used in the reporting of net position:

**Net Investment in Capital Assets**

Net investment in capital assets consists of capital assets, including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

**Debt Service**

Net position restricted for the payment of future debt service payments from various capital reserve funds.

**Higher Education, Research and Patient Care**

Net position restricted for funding of various higher education instruction, research, scholarships, and operations, as well as medical research and patient care.

**Environmental Projects and Energy Programs**

Net position restricted for funding of various environmental projects and energy programs.

**Economic Development, Housing and Transportation**

Net position restricted for funding of various economic development, housing-related and transportation-related programs.

**Insurance and Administrative Requirements**

Net position restricted for funding certain insurance payments and administrative costs.

**Future Lottery Prizes**

Net position restricted for future lottery prize payments.

**Other Government Programs**

Net position restricted for the funding of legal and law enforcement programs, various gifts, grants or bequests received by the State, and other legally restricted programs.

**Unrestricted**

Unrestricted net position is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted components of net position described above.

**o. Fund Balance**

The difference between fund assets and deferred outflows of resources, and liabilities and deferred inflows of resources is "Fund Balance" on governmental fund financial statements.

**Fund Balance Hierarchy**

Fund balance for governmental funds is reported in the following classifications which describe the relative strength of the constraints that control how specific amounts in the funds can be spent:

Nonspendable fund balance includes amounts that cannot be spent because (a) they are either not in spendable form or (b) are legally or contractually required to remain intact.

Restricted fund balances have constraints placed on the use of resources that are either (a) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; or (b) imposed by law through constitutional provisions or enabling legislation.

Committed fund balances can only be used for specific purposes pursuant to constraints imposed by formal action of the State's highest level of decision-making authority, which includes establishment of laws of the State, and by bills passed by the Legislature and approved by the Governor of the State of New York, or any contracts approved by authorized State officials that are known to have their liability satisfied with the current fund balance. Commitments may be changed or lifted only by the State's highest level of decision-making authority taking the same formal action that originally imposed the constraint.

Assigned fund balances are constrained by the intent to use amounts for specific purposes, but are neither restricted nor committed. The Director of the Budget is authorized to assign amounts to a specific purpose through the approval of budget certificates as required by statute.

Unassigned fund balance is the residual classification for the General Fund. Other governmental funds cannot report a positive unassigned fund balance but can report negative unassigned fund balance if expenditures incurred for specific purposes exceed the amounts restricted or committed to those purposes.

For classification of governmental fund balances, the State considers expenditures to be made from the most restricted resources first, then in the following order: committed, assigned, and unassigned resources.

### Reserve Accounts

#### *Tax Stabilization Reserve Account*

The authority for establishing the Tax Stabilization Reserve Account is in State Finance Law Section 92. The account was established in 1984.

At the close of each fiscal year, any surplus funds up to 0.2 percent of 1 percent of the “norm” shall be transferred to the Tax Stabilization Reserve Account, up to 2 percent of the “norm”. The norm is the aggregate amount disbursed from the State Purposes Account during the fiscal year.

In any given fiscal year, when receipts fall below the norm, funds shall be transferred from the Tax Stabilization Reserve Account to the State Purposes Account, in an amount equal to the difference between the norm and the receipts, to the extent that funds are available in the Tax Stabilization Reserve Account. Money in the Tax Stabilization Reserve Account may be temporarily loaned to the State Purposes Account during the year in anticipation of the receipt of revenues, but these funds must be repaid within the same fiscal year.

The balance in the Tax Stabilization Reserve Account at March 31, 2015 is \$1.3 billion, and is included in the unassigned fund balance of the General Fund.

#### *Rainy Day Reserve Account*

The authority for establishing the Rainy Day Reserve Account is in State Finance Law Section 92-cc. The account was established in 2007.

Funds deposited to this account are transferred from the State Purposes Account. The maximum balance in this account will not exceed 3 percent of the aggregate amount projected to be disbursed from the State Purposes Account during the fiscal year immediately following the current fiscal year.

The amounts in this account can be spent for two reasons:

- a. In the event of an economic downturn, as evidenced by a composite index of business cycle indicators prepared by the Commissioner of Labor. If the index declines for five consecutive months, the Commissioner of Labor shall notify the Governor, the Speaker of the Assembly, the Temporary President of the Senate and the minority leaders of the Assembly and the Senate. Upon such notification, the Director of Budget may authorize the Comptroller to transfer funds from the Rainy Day Reserve Account.
- b. A catastrophic event, i.e., the need to repel invasion, suppress insurrection, defend the State in war, or to respond to any other emergency resulting from a disaster, including but not limited to a disaster caused by an act of terrorism.

The balance in the Rainy Day Reserve Account at March 31, 2015 is \$540 million, and is included in the committed fund balance of the General Fund.

### Encumbrances

Encumbrance accounting, under which purchase orders, contracts, and other commitments for expenditures are recorded in order to reserve that portion of the applicable appropriation, is employed in the governmental funds. These amounts generally will become liabilities in future periods.

Significant encumbrances at March 31, 2015 include (in millions):

<b>Fund Type</b>	<b>Amount</b>
General . . . . .	\$ 812
Federal Special Revenue . . . . .	1,264
Other Special Revenue . . . . .	179
Other Debt Service . . . . .	4
Other Capital Projects . . . . .	7,805

Fund balances at March 31, 2015 are as follows (amounts in millions):

	Major Funds			
	General Fund	Federal Special Revenue	General Debt Service	Other Funds
<b>Restricted for:</b>				
Public health .....	\$ —	\$ 13	\$ —	\$ 25
Environment and recreation .....	—	—	—	28
Transportation .....	—	—	—	160
General government .....	—	—	—	89

<b>Total fund balance (deficit)</b> .....	<b>\$ 6,052</b>	<b>\$ 13</b>	<b>\$ 2,551</b>	<b>\$ 5,575</b>

#### p. Post-Retirement Benefits

Other postemployment costs are measured and disclosed using the accrual basis of accounting in the government-wide and enterprise funds financial statements (Note 13). In addition to providing pension benefits, the State is statutorily required to provide health insurance coverage and survivor benefits for retired employees and their survivors. Substantially all of the State's employees may become eligible for these benefits if they reach normal retirement age while working for the State. Health care benefits are provided through plans whose premiums are based on the benefits paid during the year. The cost of providing post-retirement benefits is shared between the State and the retired employee. The State, including the Lottery, recognizes the cost of providing health insurance by recording its share of insurance premiums as an expenditure in the respective fund in the year paid. Additionally, the survivor's benefit program

provides for a death benefit to be paid by the State to a retiree's designated beneficiary. During the year, approximately \$10.9 million was paid on behalf of 3,628 retirees for this benefit and recorded as an expenditure in the General Fund.

#### q. Deficit Fund Balances

As of March 31, 2015, fund deficits were reported in the following Capital Projects Funds: the Hazardous Waste Remedial Fund (\$125 million), the Housing Program Fund (\$130 million), Mental Hygiene Facilities Capital Improvement Fund (\$30 million), and Miscellaneous Capital Project Funds (\$23 million). The deficits related to the Capital Projects Funds are the result of differences in cash flow timing relating to the reimbursement of capital project costs and contractual commitments from bond proceeds, and are routinely resolved during subsequent fiscal years. The ENCON Special Revenue Fund also has a fund deficit (\$27 million). The deficit

is the result of timing differences between the receipt of cash and the transfer of funds to finance operating expenditures. The Mental Health Service Fund, a Debt Service Fund, also has a fund deficit (\$546 million). The deficit is the result of a federal disallowance from an agreement between New York State and the Federal agency of Centers for Medicare and Medicaid Services.

#### r. Special Items

Significant transactions or other events within the control of management that are either unusual in nature or infrequent in occurrence are reported as special items in the government-wide and the fund financial statements. In 2015, a special item of \$1 billion is reported in the governmental activities and the General Fund related to the release of State Insurance Fund reserves to the State. These reserves were originally recorded by the State Insurance Fund for estimated future assessments and other charges payable to the Workers' Compensation Board associated with expected losses on claims. Reforms to Workers' Compensation Law effective January 1, 2014, changed the basis for determining such assessments and charges resulting in the elimination of such reserves. Chapter 57 of the Laws of 2013 requires the amount of the eliminated reserves to be transferred by the State Insurance Fund to the Workers' Compensation Board for distribution to the General Fund in specified amounts over a series of fiscal years. The State Insurance Fund has transferred \$1.75 billion to the Workers' Compensation Board of which \$1 billion and \$250 million has been released to the General Fund as of March 31, 2015 and 2014, respectively, for debt management or fiscal uncertainties in accordance with Chapter 57 of the Laws of 2013. The remaining \$500 million will be released in future fiscal years as specified under Chapter 57 of the Laws of 2013 and, accordingly, has been reported as deferred inflows of resources until time requirements are met.

#### s. Estimates

The preparation of the basic financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, deferred outflows of resources, liabilities and deferred inflows of resources, and disclosure of contingent assets and liabilities at the date of the basic financial statements. Estimates also affect the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

#### t. Adoption of New Accounting Pronouncements

During the fiscal year ended March 31, 2015, the State adopted the following new accounting standards issued by the GASB:

GASBS No. 67, *Financial Reporting for Pension Plans*, (GASBS 67) replaces the requirements of Statements No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, and No. 50, *Pension Disclosures*, as they relate to pension plans that are administered through trusts or equivalent arrangements that meet certain criteria. For defined benefit pension plans, this Statement establishes standards of financial reporting for separately issued financial reports and specifies the required approach to measuring the pension liability of employers and nonemployer contributing entities for benefits provided through the pension plan (the net pension liability), about which information is required to be presented. Distinctions are made regarding the particular requirements depending upon the type of pension plan administered. The implementation of GASBS 67 did not require substantial modification to the financial statements.

GASBS No. 69, *Government Combinations and Disposals of Government Operations*, (GASBS 69) establishes accounting and financial reporting standards related to government combinations and disposals of government operations. The implementation of GASBS 69 did not require modification to the financial statements.

GASBS No. 70, *Accounting and Financial Reporting for Nonexchange Financial Guarantees*, (GASBS 70) requires governments that extend financial guarantees for the obligations of another government, a not-for-profit entity, or a private entity without directly receiving equal or approximately equal value in exchange (a nonexchange transaction) to record a liability for the guarantee if it is more likely than not that they will make payment on such guarantee. As part of this nonexchange financial guarantee, a government commits to indemnify the holder of the obligation if the entity that issued the obligation does not fulfill its payment requirements. Also, GASBS 70 provides guidance for governments that issue obligations that are guaranteed by other entities in a nonexchange transaction. The effect of nonexchange financial guarantees is reported as a long-term liability (Notes 8 and 10).

## Note 2 Cash and Investments

Information on cash and investments of the Pension Trust Fund is presented in Note 12.

### Governmental Activities, Private Purpose and Agency Funds

#### Deposits

The State maintains approximately 3,000 bank accounts for various purposes at locations throughout the State. Cash deposits in the State Treasury are under the joint custody of the State Comptroller and the Commissioner of Taxation and Finance. Cash balances not required for immediate use are invested in a short-term investment pool (STIP) administered by the State Comptroller or by the fund custodian to maximize interest earnings. Cash is invested in repurchase agreements involving United States Treasury obligations, United States Treasury bills, commercial paper, government sponsored agencies, and certificates of deposit. Cash deposits not held in the State Treasury are under the sole custody of a specified State official and are generally held in interest-bearing accounts. Both the State Comptroller and the Commissioner of Taxation and Finance are sole custodians of certain accounts.

The custodial credit risk is the risk that, in the event of the failure of a depository financial institution, the State will not be able to recover deposits or will not be able to recover collateral securities that are in the possession of an outside party.

For demand accounts, checking accounts and certificates of deposit, the State requires that its depository banks pledge collateral or provide a surety bond based on actual and average daily available bank balances. All securities pledged as collateral are held by the State's fiscal agent in the name of the State and are valued on a monthly basis. Surety bonds will be accepted only from AAA rated insurance companies. The use of average daily available balances to determine collateral requirements may result in the available

balances being under-collateralized at various times during the fiscal year. The State's cash management policy is to invest all major revenues as soon as the monies are available within the banking system, which limits under-collateralization. The State's cash deposits with financial institutions had a book and bank balance of \$14 billion and were fully collateralized at fiscal year-end. Included in these balances were certificates of deposit held in the STIP with a book and bank balance of \$6.7 billion. Additional deposits, with a book and bank balance of \$50.8 million, were held by the State's fiscal agent and were fully collateralized except for \$48.5 million in deposits that were exposed to custodial credit risk because they were uninsured and uncollateralized.

For the fiscal year ended March 31, 2015, the average daily balance of the STIP was \$8.9 billion, with an average yield of 0.1 percent and total investment income of \$9 million.

#### Investments

The State holds investments both for its own benefit and as an agent for other parties. Major investment programs conducted for the direct benefit of the State include STIP, which is used for the temporary investment of funds not required for immediate payments, and sole custody funds administered by the Department of Taxation and Finance.

Investments are made in accordance with State Finance Law and vary by fund but generally include: obligations of, or guaranteed by, the United States; obligations of New York State and its political subdivisions; certificates of deposit; savings bank trust company notes; bankers' acceptances; repurchase agreements; corporate bonds; and commercial paper.

As of March 31, 2015 (except for the Tuition Savings Program, which is as of December 31, 2014), the State had the following investments and maturities (amounts in millions):

Investment Type	Fair Value	Investment Maturities (in Years)		
		Less than 1	1-5	More than 10
Commercial paper	\$ 3,321	\$ 3,321	\$ —	\$ —
Government sponsored agencies	2,951	2,928	23	—
U.S. Treasury bills	1,369	1,369	—	—
U.S. Treasury notes/bonds	1,080	939	141	—
U.S. Treasury strips	777	709	68	—
Repurchase agreements	258	258	—	—
Money market funds	111	111	—	—
Certificates of deposit	109	109	—	—
Forward purchase agreements	57	—	—	57
Other	220	219	1	—
<b>Subtotal</b>	<b>10,253</b>	<b>\$ 9,963</b>	<b>\$ 233</b>	<b>\$ 57</b>
Investments held in an agent or trust capacity	20,353			
<b>Total</b>	<b>\$ 30,606</b>			

Included in the table are securities which either were not acquired for investment purposes or cannot be classified or categorized, and are being held by the State in an agent or trust capacity. Parents wishing to save for their children's college education may deposit money into the Tuition Savings Program. The State administers the program on behalf of the parents and holds the investment portfolio in a trust. The fair market value of the portfolio was \$20.1 billion at December 31, 2014. Employers seeking self-insurer status for workers' compensation purposes may deposit securities specified by Section 235 of the New York State Banking Law with the Chairman of the Workers' Compensation Board. Acting as an agent for the employers, the State holds these securities (carrying amount \$27 million, which approximates fair value) only as an agent for the employers. Securities that are unclaimed at financial institutions are transferred periodically to the State and are held temporarily by the State until they can be liquidated. The securities or proceeds can be claimed by the owners under established procedures. These securities had a carrying amount and fair value of \$202 million at March 31, 2015. The State holds cash and securities deposited by contractors in lieu of retainage on contract payments (carrying amount and fair value of \$8 million).

In addition to the securities held by the Workers' Compensation Board noted above, the State holds \$3.2 billion in surety bonds and letters of credit that are not included in the table above.

#### Credit Risk

State law limits investments in commercial paper, repurchase agreements and corporate bonds to the highest ratings issued by two nationally recognized statistical rating organizations (NRSROs). Investments in commercial paper and repurchase agreements are limited to a rating of A-1 by Standard & Poor's Corporation (S&P) and P-1 by Moody's Investors Service, Inc. (Moody's). If an investment in commercial paper drops in rating below the legal requirements during the year, the State investment staff would consult with appropriate advisors to determine what action, if any, should be taken. Repurchase agreements are collateralized with U.S. Treasury obligations.

The portfolios of the Tuition Savings Program, a Private Purpose Trust Fund, have underlying fixed income mutual funds which are not rated by any NRSRO.

#### Custodial Credit Risk

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government and are held either by: (a) the counterparty or (b) the counterparty's trust department or agent but not in the government's name. The risk is that the State will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party if the counterparty fails. The State's policy is to hold all of its investments in

the State's name; however, the investments listed below are exposed to custodial credit risk because they are not held by the State but are held by a public benefit corporation in the public benefit corporation's name or administered by a fiscal agent on behalf of New York State. The following table presents the fair value of investments by type (amounts in millions):

<u>Investment Type</u>	<u>Fair Value</u>
U.S. Treasury bills . . . . .	\$ 171
U.S. Treasury notes . . . . .	936
Government sponsored agencies . . . . .	2,667
Money market . . . . .	111
Repurchase agreements . . . . .	21
Forward purchase agreements . . . . .	57
Other . . . . .	47
<b>Total . . . . .</b>	<b>\$ 4,010</b>

#### Interest Rate Risk

The fair values of the State's fixed-maturity investments fluctuate in response to changes in market interest rates. Increases in prevailing interest rates generally translate into decreases in fair values of those instruments. Fair values of interest rate-sensitive instruments may be affected by the creditworthiness of the issuer, prepayment options, relative values of alternative investments, the liquidity of the instrument and other general market conditions.

The State manages its interest rate risk by limiting the majority of its investments to a maturity structure of one year or less. Additionally, the State holds its investments to maturity, which minimizes the occurrence of a loss on an investment.

The State's investments in mutual funds and equity securities have no stated maturity and have not been allocated to a time period on the preceding table.

#### Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the State's investment in a single issuer (five percent or more of total investments). To mitigate this risk, it is the policy of the State to maintain a diversified portfolio among a variety of investment instruments in which it is legally permitted to invest.

#### Foreign Currency Risk

The State Finance Law, Section 98-a, does not expressly permit investment in foreign currency and there is no formal policy related to foreign currency; however, the Tuition Savings Plan has certain underlying mutual funds which invest in foreign securities. There are certain additional risks involved when investing in foreign securities that are not inherent with investments in domestic securities. These risks may involve foreign currency exchange rate fluctuations, adverse political and economic developments and the possible prevention of currency exchange or other foreign governmental laws or restrictions. In addition, the liquidity of foreign securities may be more limited than that of domestic securities.

## Business-type Activities

### Deposits

SUNY does not have a formal policy for collateral requirements for cash deposits. At June 30, 2014, SUNY had \$1.4 billion in deposits held by the State Treasury, invested in the STIP, and \$119 million held by other local depositories. Deposits not held in the State Treasury that are not covered by depository insurance are: uncollateralized (\$5 million) and collateralized with securities held by a pledging financial institution (\$20 million). SUNY also has \$123 million in cash and cash equivalents deposited with trustees, which are registered in SUNY's name and held by an agent or in trust accounts in SUNY's name.

CUNY's cash and cash equivalents were held by depositories and amounted to \$697 million, of which \$137 million was insured and \$560 million was uninsured and uncollateralized, or collateralized with securities held by the pledging financial institution, or by its trust department or agent, but not in CUNY's name.

Lottery deposits are made in accordance with State Finance Law and State Tax Law. At March 31, 2015, Lottery had \$491 million in deposits held by the State Treasury, which were invested in the STIP.

The Unemployment Insurance Benefit Fund has a total of \$28 million in a sole custody bank account, which is on deposit with the State Comptroller and invested in the STIP, and is subject to the same collateralization requirements as the State.

### Investments

Generally, SUNY and CUNY are allowed to invest in a diverse investment portfolio. Permitted investments include, but are not limited to, obligations of the U.S. Government and its agencies, municipal debt securities, repurchase agreements, corporate bonds, commercial paper, equity securities, mutual funds, asset-backed securities, money market funds and security lending transactions.

The Lottery is authorized by State statute to invest in U.S. Government-backed obligations and New York City Transitional Finance Authority municipal bonds that provide for payment of prizes payable.

As of June 30, 2014 (except for the State Lottery which is as of March 31, 2015), the business-type activities had the following investments and maturities (amounts in millions):

Investment Type	Fair Value	Investment Maturities (in Years)

### Credit Risk

Generally, SUNY individual fixed income investment securities must be of investment grade. SUNY maintains a portfolio that possesses an overall weighted average rating by Moody's and S&P of at least A. Private placement securities must be rated A3 or higher by Moody's or A- or higher by S&P. Parameters exist that allow some limited investments in non-investment grade securities; however, investments rated below B3 by Moody's or B- by S&P are prohibited.

CUNY's investment policy for the CUNY Investment Pool includes specific guidelines for investment managers with a target allocation to fixed income of 20 percent and is invested in commingled funds. The Pool contains securities with an Average Quality Rating of AA to AA2. CUNY'S investment policy does not otherwise place formal limitations on credit risk.

As of June 30, 2014 (except for the State Lottery, which is as of March 31, 2015), the business-type

<b>\$ 785</b>	<b>\$ 1,238</b>	<b>\$ 4</b>	<b>\$ 10</b>	<b>\$ 1</b>

#### Custodial Credit Risk

At June 30, 2014, SUNY had \$602 million in cash and investments held by the Dormitory Authority of the State of New York (DASNY), which represents bond proceeds needed to finance capital projects and to establish required building and equipment replacement and debt service reserves. These cash and investments are registered in SUNY's name and held by an agent or in a trust in SUNY's name. SUNY's investment policy does not formally address custodial credit risk.

At June 30, 2014, CUNY had \$366 million in investments held by DASNY or the bond trustee, not in CUNY's name. CUNY's policy for deposits of the CUNY Investment Pool does not allow for participation in programs that have uninsured investments held by counterparties and uses specific monitor initiatives for investments as a means of limiting custodial credit risk. CUNY's investment policy does not formally address custodial credit risk for investments not included in the Investment Pool.

#### Interest Rate Risk

SUNY has policies in place that limit fixed income investment duration within certain benchmarks, and a

highly diversified portfolio is maintained which limits interest rate exposure. SUNY does not formally address any interest rate risk related to their investment pools. CUNY's investment policy for the CUNY Investment Pool specifies that its fixed income investments are made in long-term, non-callable, or call-protected high quality bonds. CUNY's investment policy does not otherwise formally limit investment maturities as a means of managing exposure to fair market value losses arising from increased interest rates. The Lottery's policy for managing interest rate risk is to hold investment securities to maturity, at which time the fair value of the investment is equal to the stated maturity value.

#### Investment Pool

SUNY has certain assets included in their financial statements that are attributable to the statutory colleges at Cornell University and are held as a portfolio of investments in external investment pools. The fair value of the investments is primarily based on the unit value of the pools and the number of shares owned in each pool. The unit value of the pools, as well as their fair values (amounts in millions) at June 30, 2014 are presented in the table below:

Pool Type	Unit Value	Fair Value
Endowments:		
Long-term Investment Pool .....	\$ 58.45	\$ 788
Charitable Gift Annuities:		
Master Trust Units .....	1.44	12
Charitable Trusts:		
Endowment Strategy .....	57.56	19
Common Trust Fund—Growth .....	33.65	8
Common Trust Fund—Income .....	13.57	3
Common Trust Fund—Premier .....	8.91	1
Pooled Life Income Funds (PLIF):		
PLIF A .....	1.37	1
PLIF B .....	2.53	1
<b>Total External Investment Pools</b> .....		<b>\$ 833</b>

CUNY has certain assets included with investments in the accompanying financial statements, which are pooled on a fair value basis, with each individual fund subscribing to or disposing of units on the basis of the

fair value per unit determined quarterly. At June 30, 2014, the investment pool consisted of 213.1 million units with a fair value of \$213.1 million.

### Note 3 Taxes Receivable and Tax Refunds Payable

#### Taxes Receivable

Taxes receivable represent amounts owed by taxpayers for the 2014 calendar year and the first quarter of the 2015 calendar year, including prior year assessments for underpayments, penalties and interest. Taxes receivable are recognized as revenue when they become both measurable and available, based on actual collections or estimates of amounts to be collected during the next 12 months.

Personal income tax (PIT) revenues are reported as income when earned by the taxpayers. The primary components of the PIT receivable are the estimated and withholding payments that relate to the first quarter of the 2015 calendar year, payments with final returns which relate to the 2014 calendar year, and assessments which relate to prior tax periods.

Consumption and use tax revenues are reported in the fiscal period when the sale is made. The principal component of this receivable is sales tax receivables, which include sales tax due through March 31, 2015 and assessments which relate to prior tax periods.

General business tax revenues are reported as businesses earn income. General business tax receivables are comprised of estimated tax payments, payments remitted with final returns, and assessments.

Other taxes receivable are comprised of estate and gift taxes, real property gains taxes, real estate transfer taxes, metropolitan commuter transportation mobility taxes and assessments.

Net taxes receivable at March 31, 2015 for the governmental funds totaled \$14.3 billion. The following table summarizes taxes receivable by major tax type for the governmental funds (amounts in millions):

	General	General Debt Service	Other Governmental Funds	Total Governmental Funds
<b>Current taxes receivable:</b>				
Personal income .....	\$ 8,285	\$ 2,826	\$ —	\$ 11,111
Consumption and use .....	412	190	373	975

<b>Subtotal .....</b>	<b>653</b>	<b>109</b>	<b>14</b>	<b>776</b>
Allowance for uncollectibles .....	(84)	(30)	(10)	(124)
<b>Total .....</b>	<b>\$ 10,618</b>	<b>\$ 3,095</b>	<b>\$ 549</b>	<b>\$ 14,262</b>

#### Tax Refunds Payable

Tax refunds payable primarily represent amounts owed to taxpayers because of overpayments of their 2014 calendar year and first quarter 2015 calendar year tax liabilities. Tax refunds payable, which reduce respective tax revenues, are accrued to the extent they are measurable based on payments and estimates. The amount of PIT refunds payable are comprised of

estimates of overpayments of the first calendar quarter (2015) tax liability and payments of 2014 calendar and prior year refunds. The remaining portion of tax refunds payable are comprised of payments made subsequent to the end of the fiscal year and estimates of a remaining refund liability. Tax refunds payable at March 31, 2015 are summarized as follows (amounts in millions):

	Current			Total	
	General	General Debt Service	Other Governmental Funds	Current	Long-term
<b>Governmental Activities:</b>					
Personal income .....	\$ 5,881	\$ 1,901	\$ —	\$ 7,782	\$ 471

<b>Allocation of depreciation and amortization:</b>	
SUNY .....	\$ 507
CUNY .....	197
<b>Total depreciation and amortization expense .....</b>	<b>\$ 704</b>

## Note 6 Bonds Payable

General obligation bonds are backed by the full faith and credit of the State and constitutionally must be repaid in equal annual principal installments or substantially level or declining debt service payments beginning not more than one year after issuance of such bonds and must mature within 40 years after issuance. The Debt Reform Act of 2000 further limits the

maximum term of new State-supported debt issued on and after April 1, 2000, including general obligation bonds, to a maximum term of 30 years. Refer to Note 7 for further discussion of the Debt Reform Act of 2000.

Changes for the year in bonds payable were as follows (amounts in millions):

<u>Purpose</u>	<u>Outstanding April 1, 2014</u>	<u>Issued</u>	<u>Redeemed</u>	<u>Outstanding March 31, 2015</u>
Accelerated capacity and transportation improvements of the 1990s .....	\$ 226	\$ 67	\$ 142	\$ 151

<b>Total .....</b>	<b>\$ 3,191</b>	<b>\$ 329</b>	<b>\$ 502</b>	<b>\$ 3,018</b>

Debt service expenditures (principal and interest) related to the above general obligation bonds during the year were approximately \$436 million. Federal subsidies related to the interest payments made during the year on Build America Bonds were \$3.6 million. The total

<b>Fiscal Year</b>	<b>Principal</b>	<b>Interest</b>	<b>Total</b>
2016 .....	\$ 290	\$ 122	\$ 412
2017 .....	265	115	380
2018 .....	230	104	334
2019 .....	187	95	282
2020 .....	167	88	255
2021-2025 .....	663	346	1,009
2026-2030 .....	554	215	769
2031-2035 .....	340	112	452
2036-2040 .....	255	48	303
2041-2045 .....	67	4	71
<b>Total</b> .....	<b>\$ 3,018</b>	<b>\$ 1,249</b>	<b>\$ 4,267</b>

Debt service requirements on approximately \$94 million in general obligation variable rate bonds were calculated using the variable rate in effect as of March 31, 2015, which was 0.12 percent. Debt service requirements for fixed rate issues were calculated based upon actual rates ranging from zero percent to 6.02 percent.

amount of general obligation bonds authorized but not issued at March 31, 2015 was \$2.7 billion.

Debt service requirements for general obligation bonds in future years, which are financed by transfers from the General Fund to the General Debt Service Fund, are as follows (amounts in millions):

During the fiscal year ended March 31, 2015, \$181 million in general obligation refunding bonds (Series 2015C) were issued at a premium of \$21 million. The issue refunded \$198 million in existing debt with a cash flow savings of \$33 million and present value savings of \$27 million. At March 31, 2015, the \$198 million of bonds defeased by this refunding transaction remain outstanding.

## Note 7 Obligations Under Lease/Purchase and Other Financing Arrangements

### Governmental Activities Debt

The State has entered into contractual financing arrangements with certain public benefit corporations and other entities for various capital assets, local assistance payments and deficit financing. Under these agreements, generally construction costs are initially paid by the State from appropriations (reported as capital construction expenditures in the governmental funds). These appropriations are then repaid to the State from the proceeds of bonds issued by the public benefit corporations or other entities (reported as financing arrangements in the governmental funds). The State becomes the tenant of the facility under a lease/purchase agreement, which provides for the payment of rentals sufficient to cover the related bond debt service and for the passage of title to the State after the bonds have been repaid.

The State has also entered into contractual obligation financing arrangements (also referred to as “service contract bonds”) with certain public benefit corporations that have issued bonds to finance past State budgetary deficits, grants to local governments and various special project initiatives undertaken in partnership with private entities, including commercial enterprises, for both capital and operating purposes. The terms of these arrangements require the State to fund the debt service requirements of the specific debt issued by these entities.

Chapter 59 of the Laws of 2000 enacted the Debt Reform Act (Act) which applies to all new State-supported debt issued on and after April 1, 2000. The Act imposes statutory limitations which restrict the issuance of State-supported debt to capital purposes only and establishes a maximum term of 30 years for such debt. The Act also imposes phased-in caps that ultimately limit the amount of new State-supported debt (issued on and after April 1, 2000) to 4 percent of State personal income, and new State-supported debt service (on debt issued on and after April 1, 2000) to 5 percent of total governmental funds receipts. The Act requires the limitations be calculated by October 31st of each year using the new State-supported debt outstanding and new State-supported debt service from the previous fiscal year. For the fiscal year ended March 31, 2014, the cumulative debt outstanding and debt service caps were fully phased in at 4 and 5 percent. There was \$39.2 billion of new State-supported debt outstanding applicable to the debt reform cap, which was about \$3.6 billion below the statutory debt outstanding limitation. The debt service cost on this new debt was \$3.8 billion, about \$3 billion below the statutory debt service limitation. The Act does not apply to debt that is not considered State-supported and therefore does not encompass State-guaranteed debt, moral obligation debt, and contingent-contractual obligation financing such as the bonds issued by the Tobacco Settlement Financing Corporation (TSFC).

The State and some of its public authorities which issue debt on behalf of the State have purchased letters of credit and standby purchase agreements from various providers to ensure that the liquidity needs of variable rate demand bonds can be met. As of March 31, 2015, these agreements covered \$1.8 billion of variable rate demand bonds outstanding, with costs ranging from 43 to 65 basis points of the amount of credit provided and expiration dates ranging from November 16, 2015 to July 16, 2019.

In 2003, the State enacted legislation creating the TSFC to finance a portion of its future revenues expected to be received under the 1998 Master Settlement Agreement (MSA) with the settling cigarette manufacturers. The future MSA revenues are to compensate the State for all claims for past, present, and future health care costs originating from health care expenses incurred by the State from the effects of cigarette smoking by its citizens. In accordance with the legislation, TSFC issued \$4.6 billion in bonds to finance a payment of \$4.2 billion to the State's General Fund, enabling it to finance a portion of the budget deficits occurring in fiscal years ending March 31, 2003 through March 31, 2005, to establish \$449 million in debt service reserves, and to provide \$129 million to finance a portion of the first debt service payments due on TSFC bonds. In accordance with the legislation, all future revenues from the 1998 MSA will be used to repay the debt until it is fully retired, after which all funds of TSFC will revert to the State. At March 31, 2015 the remaining amount pledged is approximately \$2.1 billion (\$1.7 billion principal and \$405 million future interest payments) to cover the outstanding debt scheduled to fully mature on June 1, 2022. During the fiscal year, pledged MSA revenues recognized were \$383 million and debt service paid was \$400 million. The State has agreed to make additional payments for TSFC debt service, subject to annual appropriation, from other sources if the future revenues prove insufficient to meet TSFC debt service requirements of the State. No such payments were required during the fiscal year.

Prior to 1996, certain payments due to the State's local government units in the first quarter of the State's fiscal year exceeded available State funds. To meet these payments in the past, the State issued short-term tax and revenue anticipation notes called the annual "Spring Borrowing." The New York Local Government Assistance Corporation (LGAC) was established in 1990 to issue up to \$4.7 billion in long-term debt to finance certain local assistance aid payments plus amounts necessary to fund a capital reserve fund and other issuance costs. Issuance of the entire \$4.7 billion bond authorization as of March 31, 1996 eliminated the need for the State's annual Spring Borrowing. Pursuant to the legislation establishing LGAC, the State deposits an amount equal to a 1 percent rate of taxation of the total State sales and use tax collected into Other Governmental Funds (Local Government Assistance

Tax Fund) to make payments to LGAC for debt service on its bonds and other expenses of LGAC. Amounts in excess of LGAC's needs are subsequently transferred to the General Fund. Payments to LGAC are subject to annual appropriations by the Legislature. LGAC's bondholders do not have a lien on monies deposited in the Local Government Assistance Tax Fund. Under current State statute, any issuance of bonds by LGAC in the future will be for refunding purposes only.

Chapter 62 and Chapter 63 of the Laws of 2003 enacted, among other provisions, the Municipal Assistance Refinancing Act (Act), effective July 1, 2003 and deemed repealed July 1, 2034. The Act created an incentive for the State to seek an appropriation to provide \$170 million per year, from Other Governmental Funds (Local Government Assistance Tax Fund (Fund)) to the City of New York (City) for each of the City's fiscal years beginning July 1, 2003 and ending June 30, 2034. The Act requires LGAC to annually certify \$170 million so that the State, subject to annual State appropriation by the Legislature, can provide for a series of payments to the City or the Mayor's assignee in each City fiscal year, beginning July 1, 2003 and ending June 30, 2034, totaling \$5.3 billion. Based on current law, until the Legislature enacts an appropriation of \$170 million, LGAC certifies the release of the funds, the \$170 million State payment is made, and LGAC receives the amount it has certified for its needs, no excess sales tax receipts can be transferred from the Fund to the State's General Fund. During the fiscal year ended March 31, 2015, LGAC certified the release for the State payment of \$170 million to the City.

Chapter 56 of the Laws of 1993 authorized the New York State Thruway Authority to issue up to \$2.93 billion in bonds for State highway and bridge projects (the amount of authorized bonds has been raised three times, most recently in 2005, up to \$16.5 billion). The bonds are secured and funded by a dedication of portions of the State's petroleum business tax, motor fuel tax, highway and fuel use tax, motor vehicle registration fees, auto rental tax, transmission and transportation tax and certain miscellaneous revenues.

In 2001, the State enacted legislation providing for the issuance of State Personal Income Tax Revenue Bonds (PIT) to be issued by several State public benefit corporations. The legislation provides that 25 percent of personal income tax receipts, excluding refunds owed to taxpayers, be deposited to the Revenue Bond Tax Fund which is an account of the General Debt Service Fund. These deposits are used to make debt service payments on PIT bonds, with excess amounts returned to the General Fund. In the event that the State Legislature fails to appropriate amounts required to make debt service payments on the PIT bonds, or if required payments have not been made when due, the legislation requires that deposits continue to be made to the Revenue Bond Tax Fund until amounts on

deposit equal the greater of 25 percent of personal income tax receipts or \$6 billion. Amounts in excess of that needed for current debt service are subsequently transferred to the General Fund. The first PIT bonds were issued on May 9, 2002 and approximately \$29.8 billion were outstanding as of March 31, 2015.

In 2013, the State enacted legislation providing for the issuance of State Sales Tax Revenue Bonds to be issued by certain State public benefit corporations. The legislation created the Sales Tax Revenue Bond Tax Fund, an account of the General Debt Service Fund, that will provide for the debt service payments on these bonds. The bonds are secured by the pledge of payments

from this fund, which will receive 25 percent of the State's sales and use tax receipts. Upon the satisfaction of all of the obligations and liabilities of LGAC, this will increase to 50 percent of the State's sales tax receipts. Amounts in excess of that needed for current debt service will be transferred to the General Fund. The first sales tax bonds were issued on October 24, 2013 and approximately \$2 billion were outstanding as of March 31, 2015.

Changes in lease/purchase and other financing arrangements for the year were as follows (amounts in millions):

Issuer	Outstanding April 1, 2014	Issued	Redeemed	Outstanding March 31, 2015
<b>Public Benefit Corporations (PBCs):</b>				
Dormitory Authority	\$ 11,680	\$ 1,983	\$ 1,589	\$ 12,074
Environmental Facilities Corporation	635	—	58	577
Housing Finance Agency	778	—	212	566
Local Government Assistance Corporation	2,593	—	248	2,345
Municipal Bond Bank Agency	281	—	19	262
Metropolitan Transportation Authority	315	—	63	252
Tobacco Settlement Financing Corporation	2,053	—	308	1,745
Thruway Authority	9,748	—	1,198	8,550
Urban Development Corporation	10,572	1,297	868	11,001
<b>Total</b>	<b>\$ 38,655</b>	<b>\$ 3,280</b>	<b>\$ 4,563</b>	<b>\$ 37,372</b>

Debt service expenditures (principal and interest) for the aforementioned obligations during the fiscal year were \$4.9 billion. These expenditures were financed primarily by the revenues reported in the governmental funds. Federal subsidies related to the interest payments made during the year on Build America Bonds and Qualified School Construction Bonds were \$74.5 million (\$36.1 million related to governmental activities and \$38.4 million for business-type activities related to SUNY and CUNY).

Certain of the underlying bond indentures require the maintenance of various reserves. Such amounts

totaled \$758 million at March 31, 2015 and are reported as cash and investments in the General Debt Service Fund and appropriate Other Governmental Funds, with a corresponding restriction of fund balance.

Following is a summary of the future minimum rental payments for lease/purchase and contractual obligation financing arrangements, including fixed rate interest at rates ranging from 0.3 percent to 6.8 percent and variable rate interest at rates ranging from 0.01 percent to 0.8 percent (amounts in millions):

Fiscal Year	Principal	Interest	Net Swap Amount	Total
2016	\$ 2,972	\$ 1,717	\$ 46	\$ 4,735
2017	3,011	1,587	43	4,641
2018	3,023	1,452	39	4,514
2019	2,918	1,315	37	4,270
2020	2,887	1,182	34	4,103
2021-2025	11,320	4,016	104	15,440
2026-2030	6,865	1,951	41	8,857
2031-2035	3,024	695	6	3,725
2036-2040	1,077	205	—	1,282
2041-2045	275	27	—	302
<b>Total</b>	<b>\$ 37,372</b>	<b>\$ 14,147</b>	<b>\$ 350</b>	<b>\$ 51,869</b>

Future debt service is calculated using rates in effect at March 31, 2015 for variable rate bonds. The net swap payment amounts were calculated by subtracting the future variable rate interest payment subject to swap agreements based on rates in effect at March 31, 2015 from the synthetic fixed rate amount intended to be achieved by the swap agreements.

The actual amounts of future interest to be paid are affected by changes in variable interest rates. The actual amounts of future net swap payments are also affected by changes in published indexes—the London

Interbank Offered Rate (LIBOR) and the Securities Industry and Financial Markets Association (SIFMA), which are floating rates.

The State is also committed under numerous capital leases for computer network and telecommunications equipment. Debt service expenditures for capital lease obligations during the year were \$1 million. Following is a summary of the debt service payments for the remaining lease periods of these capital leases (amounts in millions):

<u>Fiscal Year</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2016 .....	\$ 2	\$ —	\$ 2
2017 .....	1	—	1
2018 .....	1	—	1
2019 .....	1	—	1
2020 .....	1	—	1
2021-2025 .....	1	—	1
<b>Total</b> .....	<b>\$ 7</b>	<b>\$ —</b>	<b>\$ 7</b>

### Refunding

During the fiscal year ended March 31, 2015, the State, acting through its public authorities, refunded \$1.5 billion in existing fixed rate bonds related to lease/purchase and other financing arrangements by issuing refunding bonds in a par amount of \$1.3 billion at a \$227 million premium and releasing a net amount of \$582 thousand from reserves and debt service accounts. The result will produce an estimated gain of \$183 million in future cash flow, with an estimated present value gain of \$181 million. The differences between the

reacquisition prices and the net carrying values of the refunded bonds generated deferred accounting gains and losses, resulting in deferred inflows and outflows of resources. The deferred accounting gain was \$2.2 million, of which \$2 million will be amortized as an adjustment to interest expense in future years. The deferred accounting loss was \$13.2 million, of which \$12.5 million will be amortized into interest expense in future years. The impact of the refunding issues is presented in the following table (amounts in millions):

<u>Issue Description</u>	<u>Refunding Amount</u>	<u>Refunded Amount</u>	<u>Cash Flow Gain</u>	<u>Present Value Gain</u>
Dormitory Authority PIT General Purpose Bond Series 2014C .....	\$ 73	\$ 83	\$ 13	\$ 12
Dormitory Authority PIT General Purpose Bond Series 2014E .....	335	358	39	42
Dormitory Authority PIT General Purpose Bond Series 2014G .....	56	53	14	9
Dormitory Authority PIT General Purpose Bond Series 2015A .....	380	420	46	49
Urban Development Corporation PIT General Purpose Bond Series 2014A-2 .....	502	559	71	69
<b>Total</b> .....	<b>\$ 1,346</b>	<b>\$ 1,473</b>	<b>\$ 183</b>	<b>\$ 181</b>

In prior years, the State defeased certain of its obligations under lease/purchase and other financing arrangements, whereby proceeds of new obligations were placed in an irrevocable trust to provide for all future debt service payments on the defeased obligations. At March 31, 2015, approximately \$1.1 billion of such defeased obligations were outstanding. The assets and liabilities related to these obligations are not reported in the accompanying basic financial statements.

### Business-type Activities Debt

The State has issued bonds for educational facilities for SUNY and CUNY Senior Colleges through DASNY. Such debt, totaling \$12.3 billion, is funded by payments from the State's General Fund. The remainder of the debt of SUNY and CUNY (\$1.7 billion) is funded from student fees and other operating aid provided by the State.

The following represents year-end principal balances (June 30, 2014 for SUNY and CUNY) for

lease/purchase and other financing arrangements for business-type activities (amounts in millions):

	Beginning Outstanding	Issued	Redeemed	Ending Outstanding
<b>Dormitory Authority:</b>				
SUNY educational facilities .....	\$ 7,209	\$ 860	\$ 528	\$ 7,541
Unamortized premium .....	463	71	33	501
SUNY dormitory facilities .....	1,546	—	331	1,215
Unamortized premium .....	79	—	3	76
CUNY educational facilities .....	3,835	517	270	4,082
Unamortized premium .....	180	47	17	210
<b>Total Dormitory Authority .....</b>	<b>13,312</b>	<b>1,495</b>	<b>1,182</b>	<b>13,625</b>
SUNY capital lease commitments .....	188	49	54	183
SUNY certificates of participation .....	30	—	7	23
SUNY other State-supported debt .....	9	51	1	59
CUNY capital lease commitments .....	41	1	—	42
CUNY mortgage loan commitments .....	71	70	71	70
CUNY certificates of participation .....	26	—	5	21
<b>Total (See Note 8) .....</b>	<b>\$ 13,677</b>	<b>\$ 1,666</b>	<b>\$ 1,320</b>	<b>\$ 14,023</b>

The following represents a year-end summary at June 30, 2014 of future minimum debt service payments on the bonds issued by DASNY for SUNY, including

interest rates ranging from 0.7 percent to 5.9 percent (amounts in millions):

Fiscal Year	Principal	Interest	Total
2015 .....	\$ 359	\$ 434	\$ 793
2016 .....	293	420	713
2017 .....	261	406	667
2018 .....	386	390	776
2019 .....	332	373	705
2020-2024 .....	1,753	1,644	3,397
2025-2029 .....	1,800	1,164	2,964
2030-2034 .....	1,582	742	2,324
2035-2039 .....	1,435	346	1,781
2040-2044 .....	555	54	609
<b>Total .....</b>	<b>\$ 8,756</b>	<b>\$ 5,973</b>	<b>\$ 14,729</b>

The following represents a year-end summary at June 30, 2014 of future minimum debt service payments on the bonds issued by DASNY for CUNY Senior

Colleges, including interest rates ranging from 2 percent to 6.1 percent (amounts in millions):

Fiscal Year	Principal	Interest	Net Swap Amount	Total
2015 .....	\$ 164	\$ 198	\$ 14	\$ 376
2016 .....	191	190	14	395
2017 .....	193	180	14	387
2018 .....	191	171	13	375
2019 .....	187	162	12	361
2020-2024 .....	842	681	46	1,569
2025-2029 .....	859	492	19	1,370
2030-2034 .....	636	308	1	945
2035-2039 .....	605	145	—	750
2040-2044 .....	214	22	—	236
<b>Total .....</b>	<b>\$ 4,082</b>	<b>\$ 2,549</b>	<b>\$ 133</b>	<b>\$ 6,764</b>

Future debt service on the bonds issued by DASNY for CUNY Senior Colleges, together with the net swap amount, is calculated assuming current interest rates remain the same. The actual amounts of future interest to be paid are affected by changes in variable interest

rates. The actual amounts of future net swap payments are also affected by changes in published indexes—the London Interbank Offered Rate (LIBOR) and the Securities Industry and Financial Markets Association (SIFMA), which are floating rates.

The following represents a year-end summary at June 30, 2014 for SUNY and CUNY of future minimum debt service payments on capital lease commitments,

Fiscal Year	SUNY		CUNY		Total	
	Principal	Interest	Principal	Interest	Principal	Interest
2015	\$ 63	\$ 5	\$ 6	\$ 1	\$ 69	\$ 6
2016	51	4	7	1	58	5
2017	37	3	3	1	40	4
2018	28	2	4	1	32	3
2019	25	2	3	1	28	3
2020-2024	50	4	68	8	118	12
2025-2029	7	1	1	12	8	13
2030-2034	4	—	5	12	9	12
2035-2039	—	—	17	5	17	5
2040-2044	—	—	19	2	19	2
<b>Total</b>	<b>\$ 265</b>	<b>\$ 21</b>	<b>\$ 133</b>	<b>\$ 44</b>	<b>\$ 398</b>	<b>\$ 65</b>

The liabilities for lease/purchase debt, certificates of participation, mortgage loans, capital leases and other State-supported debt are reported as obligations under lease/purchase and other financing arrangements in the Enterprise Funds.

Debt service expenditures (principal and interest) for all of the aforementioned obligations during the year ended June 30, 2014 totaled \$1.3 billion.

During SUNY's fiscal year ended June 30, 2014, Sales Tax Revenue Bonds were issued with a par value of \$465.3 million at a premium of \$32.7 million for the purpose of financing capital construction and major rehabilitation for educational facilities. PIT bonds were issued with a par value of \$231.2 million at a premium of \$19.2 million for the purposes of financing capital construction and major rehabilitation for educational facilities. PIT bonds were also issued with a par value of \$164 million at a premium of \$19.2 million in order to refund \$172.6 million of existing educational facilities obligations. The result will produce an estimated loss of \$2.9 million in future cash flow, with an estimated present value gain of \$8.6 million.

In prior years, SUNY defeased various obligations, whereby proceeds of new obligations were placed in an irrevocable trust to provide for all future debt service payments on the defeased obligations. Accordingly, the trust account assets and liabilities for the defeased obligations are not included in SUNY's financial statements. As of March 31, 2014, \$247.6 million of outstanding educational facility obligations were considered defeased.

During CUNY's fiscal year ending June 30, 2014, DASNY issued bonds for new construction with a par value of \$412.8 million and original issue premium of \$32.5 million, and issued refunding bonds with a par value of \$104.3 million and original issue premium of \$14.3 million on behalf of CUNY Senior Colleges. Bond proceeds of \$117.1 million were used to defease \$111.6 million of existing debt. Under the terms of the resolutions for the defeased bonds, bond proceeds were paid directly to the bondholders of the defeased bonds. As a result, the refunded debt is considered

mortgage loans payable, certificates of participation and other State-supported debt for business-type activities (amounts in millions):

defeased. The economic gain related to the defeased bonds amounted to \$6 million. The excess of the bond proceeds over the amount of debt defeased of \$5.5 million, and remaining unamortized premium and discount of \$3.7 million are deferred and amortized in a systematic and rational manner over the remaining life of the old debt or new debt, whichever is shorter. There were no remaining unamortized bond issue costs, underwriter discounts, or any other related costs affiliated with the refunded debt.

At June 30, 2014, \$159.3 million of CUNY's bonds outstanding were considered defeased for CUNY Senior Colleges.

### Interest Rate Exchange Agreements (Swaps)

Article 5-D of the State Finance Law authorized the use of a limited amount of swaps equal to 15 percent of statutorily defined State-supported debt. Starting in November 2002, the State began to enter into swap agreements to "synthetically" change the interest cost associated with bonds it issued from either variable rate to fixed rate or from fixed rate to variable rate. The intention of each of the swaps was to lower the cost of borrowing to the State below what could have been achieved on bonds without the use of the associated swap agreements and reduce the risks associated with the variability of cash flows or fair values of the underlying debt.

The statutory authorization for the use of swaps also requires that each of the swaps entered into meet the following requirements:

- Counterparties have a credit rating from at least one NRSRO that is within the two highest investment grade categories;
- A finding by an independent financial advisor certifying that the terms and conditions of all swaps reflect a fair value;
- Utilization of a standardized interest rate exchange agreement;

- Issuance of monthly reports by the public benefit corporations to provide monitoring and swap performance assessment; and
- Compliance with uniform interest rate exchange guidelines.

The State manages the swaps as a single portfolio, although they relate to debt reported under both governmental activities and business-type activities.

### Swap Activity and Terms

The State has approximately \$1.9 billion notional amount of swaps outstanding (\$1.5 billion of which related to

governmental activities and \$416 million related to business-type activities) that were issued to synthetically create fixed rate debt from variable rate debt. The \$1.9 billion portfolio includes 36 separate pay-fixed, receive-variable interest rate swap agreements with seven counterparties. The maturity of the synthetic fixed rate swaps are coterminous with the underlying debt.

The table below summarizes fair value balances and notional amounts of derivative instruments outstanding on March 31, 2015 for governmental activities and June 30, 2014 for business-type activities, and the changes in fair value of those derivatives for the years then ended as reported in the State's 2015 financial statements (amounts in millions):

Issuer/Type	Notional	Changes in Fair Value		Fair Value	
		Classification	Amount	Classification	Amount
<b>Governmental Activities:</b>					
<b>Cash Flow Hedges:</b>					
Dormitory Authority		Deferred		Derivative	
Pay-fixed interest rate swaps . . . . .	\$ 194	Outflow	\$ (5)	Instruments	\$ (27)
Urban Development Corporation		Deferred		Derivative	
Pay-fixed interest rate swaps . . . . .	424	Outflow	(24)	Instruments	(94)
Housing Finance Agency		Deferred		Derivative	
Pay-fixed interest rate swaps . . . . .	137	Outflow	2	Instruments	(13)
Local Government Assistance Corporation		Deferred		Derivative	
Pay-fixed interest rate swaps . . . . .	652	Outflow	1	Instruments	(71)
<b>Subtotal</b> . . . . .	<b>1,407</b>		<b>(26)</b>		<b>(205)</b>
<b>Investment Derivatives:</b>					
Housing Finance Agency		Investment		Derivative	
Pay-fixed interest rate swaps . . . . .	80	Earnings	(7)	Instruments	(19)
<b>Subtotal</b> . . . . .	<b>1,487</b>		<b>(33)</b>		<b>(224)</b>
<b>Business-type Activities</b>					
<b>(as of June 30, 2014):</b>					
<b>Cash Flow Hedges:</b>					
Dormitory Authority—CUNY		Deferred		Derivative	
Pay-fixed interest rate swaps . . . . .	416	Outflow	1	Instruments	(66)
<b>Total</b> . . . . .	<b>\$ 1,903</b>		<b>\$ (32)</b>		<b>\$ (290)</b>

The fair values were estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted back using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds

due on the date of each future net settlement on the swaps. The fair value, which fluctuates based on market conditions, is monitored closely by the Division of the Budget (DOB) and the public benefit corporations that issue swaps on behalf of the State. DOB reviews the actual mark-to-market (fair value) of outstanding swaps on a monthly basis.

The table below summarizes the terms of the State's derivative instruments outstanding at March 31, 2015 for

governmental activities and at June 30, 2014 for business-type activities (amounts in millions):

<u>Issuer/Type</u>	<u>Underlying Debt</u>	<u>Notional Amount</u>	<u>Effective Date</u>	<u>Final Maturity Date</u>	<u>Terms</u>

<b>Total</b> . . . . .		<b>\$ 1,903</b>			

## Risks

### Credit Risk

The State is exposed to credit risk on interest rate swap agreements in asset positions (positive fair values). To minimize its exposure to loss related to credit risk, it is the State's policy to require each counterparty to have credit ratings from at least one NRSRO within the two highest investment grade categories and ratings from any other NRSRO within the three highest investment grade categories, or the counterparty's payment obligations shall be unconditionally guaranteed by

an entity with such credit ratings. The swap agreements and Article 5-D of the State Finance Law also require that should the credit rating of a counterparty or an entity unconditionally guaranteeing the counterparty's payment obligations, if so secured, fall below the rating required, that the obligations of such counterparty shall be fully and continuously collateralized by direct obligations of, or obligations the principal and interest on which are guaranteed by, the United States of America, with a net market value of at least 102 percent of the net market value of the contract to the

issuer and such collateral shall be deposited with the issuer or its agent. The following table presents the

counterparty credit ratings as of March 31, 2015 (amounts in millions):

Counterparty	Notional Amount	Credit Ratings		
		Moody's	S&P	Fitch
Citibank	\$ 353	A2	A	A
Goldman	322	Aa2	AAA	—
JP Morgan	396	Aa3	A+	A+
Merrill Lynch	118	Baa2	A-	A
Morgan Stanley	333	Baa2	A-	A
Societe Generale	94	A2	A	A
UBS	287	A2	A	A
<b>Total</b>	<b>\$ 1,903</b>			

Certain of the State's swap agreements contain set-off provisions. Under the terms of the agreements, should an agreement terminate, close-out set-off provisions permit all outstanding transactions with the related counterparty to terminate and net the transaction's fair values so that a single sum will be owed by, or owed to, the State.

There were no interest rate swap agreements in asset positions; therefore, the State was not exposed to credit risk and no collateral was required to be posted by counterparties at March 31, 2015. However, should interest rates change and the fair values of interest rate swap agreements become positive, the State would be exposed to credit risk in the amount of those swaps' fair value.

#### Basis Risk

The State is exposed to basis risk on its pay-fixed interest rate swaps, which is the possibility that the variable rate payments received by the State in the swap are less than the variable rate payments made by the State on the underlying bonds issued. Because the swaps are based on a percentage of LIBOR there is a possibility that this floating rate will not match the actual interest rates set in the tax-exempt market on the underlying bonds. Times when the mismatch may be out of favor to the State are in very low interest rate environments or if major changes in the tax code were to be enacted causing tax-exempt floating-rate bonds to trade less favorably in comparison to taxable floating rate bonds. Should the relationship between LIBOR and the actual variable rate payments converge, the expected cost savings may not materialize.

#### Termination Risk

The swap contracts use the International Swap Dealers Association Master Agreement (Master Agreement), which includes standard termination events, such as

failure to pay and bankruptcy. The schedule to the Master Agreement includes "additional termination events," providing that the swaps may be terminated if either the State or a counterparty's credit quality rating falls below certain levels. The State or the counterparties may terminate the swap agreements if the other party fails to perform under the terms of the contract. The State may also terminate the swaps at its option. If a swap agreement is terminated, the synthetically created fixed or variable interest rate will cease to exist and the State's interest payment will be based solely upon the rate required by the related bonds as issued. When a termination occurs, a mark-to-market (or fair market value) calculation is performed to determine whether the State is owed money or must pay money to close out a swap position. A negative fair market value means the State would incur a loss and need to make a termination payment to settle the swap position. A positive fair market value means the State would realize a gain and receive a termination payment to settle the swap position.

#### Rollover Risk

The State is exposed to rollover risk on interest rate swap agreements that are hedges of debt that mature or may be terminated prior to the maturity of the hedged debt. When these swap agreements terminate, or in the case of a termination option, when the option is exercised, the State will be re-exposed to the risks being hedged by the swap agreement. Currently, the maturity dates of the State's interest rate swap agreements and hedged debt are coterminous.

#### Operating Leases

The State is also committed under numerous operating leases covering real property and equipment. Rental expenditures, reported for the year ended March 31, 2015 under such operating leases, totaled \$255 million and were financed primarily from the General Fund.

The following is a summary of future minimum rental commitments under real property and equipment leases with terms exceeding one year (amounts in millions):

<u>Fiscal Year</u>	<u>Governmental Activities</u>
2016 .....	\$ 209
2017 .....	185
2018 .....	172
2019 .....	149
2020 .....	128
2021-2025 .....	412

<b>Total</b> .....	<b>\$ 430</b>	<b>\$ 199</b>	<b>\$ 629</b>

## Governmental Activities Collateralized Borrowings

In December 2010, \$102 million of Pledged Assessment Revenue Bonds, Series 2010A, were issued by DASNY. These bonds are special revenue obligations of DASNY. Principal and interest on the Series 2010A Bonds are payable from the pledged assessments to be assessed and collected by the Chair of the Workers' Compensation Board. At March 31, 2015, principal and interest outstanding were \$60 million and \$10 million, respectively. Annual principal and interest payments will be continuing through December 1, 2020.

In December 2013, \$370 million of Employer Assessment Revenue Bonds, Series 2013A, were issued by DASNY. These bonds are special revenue obligations of DASNY. Principal and interest on the Series 2013A Bonds are payable from employer assessments to be assessed and collected by the Chair of the Workers' Compensation Board. At March 31, 2015, principal and interest outstanding were \$370 million and \$189 million, respectively. Annual principal and interest payments will continue through December 1, 2035.

The State determined that these transactions meet the criteria for collateralized borrowings under GASBS No. 48, *Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues*, since the pledged revenues are formally committed to directly collateralize or secure debt of a component unit. These Pledged and Employer Assessment Revenue Bonds are reported as collateralized borrowings in the State's financial statements (amounts in millions):

## Business-type Activities Collateralized Borrowings

In March 2013, the State enacted legislation that authorized SUNY to assign all its rights, title and interest in dormitory facilities revenues of certain dormitory facilities to DASNY, and authorized DASNY to issue SUNY Dormitory Facilities Revenue Bonds payable from and secured by the dormitory facilities revenues assigned to it by SUNY. The legislation also created a special fund to be held by the State's Commissioner of Taxation and Finance on behalf of DASNY. All dormitory facilities revenues collected by SUNY are required to be deposited in this special fund.

In August 2013, SUNY Dormitory Facilities Revenue Bonds were issued by DASNY with a par amount of \$175.1 million at a premium of \$10.3 million for the construction and rehabilitation of residential facilities, and with a par amount of \$264.9 million at a premium

of \$22.1 million to refinance \$281.7 million of existing SUNY dormitory facility bonds. The result will produce an estimated gain of \$2.4 million in future cash flow, with an estimated present value gain of \$1.9 million. These bonds are special obligations of DASNY payable solely from the dormitory facilities revenues collected by SUNY as agent for DASNY. Outstanding obligations under these bonds are reported as a collateralized borrowing since these bonds are not payable from any money of SUNY or the State and neither SUNY nor the State has any obligation to make any payments with respect to the debt service on the bonds. The pledge revenues recognized during SUNY's fiscal year ended June 30, 2014 amounted to \$505.2 million. No principal or interest payments were due for the collateralized borrowings during SUNY's fiscal year ended June 30, 2014. Annual principal and interest payments will continue through July 1, 2043 (amounts in millions):

<u>Fiscal Year</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2015 .....	\$ 3	\$ 22	\$ 25
2016 .....	7	22	29
2017 .....	10	21	31

<b>Total due within one year</b>					<b>\$ 1,048</b>

Litigation and workers' compensation liabilities will be liquidated by the General Fund. Medicaid accrued liabilities and payable to local governments will be liquidated by the General Fund and the Federal Special Revenue Fund. Payroll and related fringe benefits, compensated absences, health insurance, pension contributions, other postemployment benefits, pollution remediation, secured hospitals and

miscellaneous accrued liabilities will be liquidated by the General Fund, Federal Special Revenue Fund and Other Governmental Funds.

**Accrued Liabilities—Governmental Activities**

The following table summarizes accrued liabilities at March 31, 2015 for governmental activities (amounts in millions):

Description	General	Federal Special Revenue	General Debt Service	Other Governmental Funds	Total Governmental Activities
Payroll	\$ 648	\$ 44	\$ —	\$ 78	\$ 770
Fringe benefits	283	15	—	5	303

<b>Total</b> . . . . .					<b>\$ 1,692</b>

## Note 9 Interfund Transactions and Other Transfers

### Interfund Transfers

Interfund transfers for the year ended March 31, 2015 consisted of the following (amounts in millions):

Transfers From	Transfers To							
	General	General Debt Service	Other Governmental	Elimination	Total Governmental Funds	SUNY	CUNY	Total
General . . . . .	\$ —	\$ 1,311	\$ 2,157	\$ —	\$ 3,468	\$ 2,861	\$ 1,175	\$ 7,504
Federal Special Revenue . . . . .	306	—	905	—	1,211	339	—	1,550
General Debt Service . . . . .	12,564	—	3	—	12,567	621	369	13,557
Other Governmental . . . . .	5,699	1,753	43	—	7,495	67	—	7,562
Elimination . . . . .	—	—	—	(24,741)	(24,741)	—	—	(24,741)
<b>Total Governmental Funds</b> . . . . .	<b>18,569</b>	<b>3,064</b>	<b>3,108</b>	<b>(24,741)</b>	<b>—</b>	<b>3,888</b>	<b>1,544</b>	<b>5,432</b>
SUNY . . . . .	27	—	120	—	147	—	—	147
Lottery . . . . .	—	—	3,111	—	3,111	—	—	3,111
Non-current . . . . .	—	—	—	—	—	570	—	570
<b>Total</b> . . . . .	<b>\$ 18,596</b>	<b>\$ 3,064</b>	<b>\$ 6,339</b>	<b>\$ (24,741)</b>	<b>\$ 3,258</b>	<b>\$ 4,458</b>	<b>\$ 1,544</b>	<b>\$ 9,260</b>

Transfers constitute the transfer of resources from the fund that receives the resources to the fund that utilizes them. Significant transfers include transfers to the General Fund from other funds representing excess revenues not needed in those funds. Transfers to the General Fund from the General Debt Service Fund for excess funds not needed for debt service on revenue bonds backed by personal income and sales tax revenues totaled \$12.6 billion. Transfers to the General Fund from Other Governmental Funds are primarily due to: mental health patient fees in excess of debt service and rental reserve requirements of \$1.7 billion; excess sales tax receipts not needed for LGAC debt service requirements of \$2.5 billion; and excess real property transfer tax receipts from clean water and clean air programs of \$844 million. Transfers from the General Fund to the General Debt Service Fund and Other Governmental Funds include State debt service payments (\$1.3 billion) and State capital projects (\$518 million). Transfers from the General Fund to the Enterprise Funds are State support to the SUNY and CUNY Funds (\$4.0 billion). Transfers from the Federal Special Revenue Fund and Other Governmental Funds are comprised of the Federal share of Medicaid payments for a variety of purposes, including transfers to the Mental Health Services Fund for recipients residing in State-operated facilities for people with developmental disabilities (\$872 million). Transfers from the Lottery to Other Governmental Funds represent Lottery support for school aid payments (\$3.1 billion). The eliminations of \$24.7 billion represent transfers made between the governmental funds.

Transfers from the governmental funds to the SUNY and CUNY Funds are reported as transfers to other funds by the governmental funds and as State appropriations by the SUNY and CUNY Funds. As explained in Note 1, the amounts reported for the SUNY and CUNY Funds are derived from their annual financial statements for the fiscal year ended June 30, 2014. Therefore, because of the different fiscal year-end for the SUNY and CUNY Funds, total transfers to other funds exceed total transfers from other funds by \$754 million. The following is a reconciliation of transfers resulting from different year-ends (amounts in millions):

Governmental Activities transfers:	
SUNY .....	\$ (4,311)
CUNY .....	(1,544)
Lottery (Education aid) .....	3,111
Net Fiduciary Funds .....	—
Total Governmental Activities transfers ...	<u>(2,744)</u>
Business-type Activities transfers:	
State .....	4,231
Federal and State hospital support transfers .....	463
Education aid .....	(3,111)
Capital .....	407
Total Business-type Activities transfers ...	<u>1,990</u>
<b>Total transfers .....</b>	<b>\$ <u>(754)</u></b>

### Due To/From Other Funds

The following is a summary of the amounts due to other funds and due from other funds at March 31, 2015 (amounts in millions):

Due From Other Funds	Due To Other Funds								
	General	Federal Special Revenue	General Debt Service	Other Governmental	Elimination	Total Governmental Funds	Business-type Activities	Non-current	Total
General .....	\$ —	\$ 482	\$ 969	\$ 1,236	\$ —	\$ 2,687	\$ 9	\$ —	\$ 2,696
Federal Special Revenue .....	141	—	—	850	—	991	—	—	991
Other Governmental ..	326	150	—	—	—	476	228	—	704
Elimination .....	—	—	—	—	(4,154)	(4,154)	—	—	(4,154)
<b>Total Governmental Funds .....</b>	<b>467</b>	<b>632</b>	<b>969</b>	<b>2,086</b>	<b>(4,154)</b>	<b>—</b>	<b>237</b>	<b>—</b>	<b>237</b>
Business-type Activities .....	367	6	—	73	—	446	—	619	1,065
Fiduciary .....	2,407	—	—	—	—	2,407	—	—	2,407
<b>Total .....</b>	<b>\$ 3,241</b>	<b>\$ 638</b>	<b>\$ 969</b>	<b>\$ 2,159</b>	<b>\$ (4,154)</b>	<b>\$ 2,853</b>	<b>\$ 237</b>	<b>\$ 619</b>	<b>\$ 3,709</b>

The more significant balances due to/from other funds includes \$1.0 billion due to the General Fund to cover cash overdrafts in the short-term investment pool. These temporary interfund loans includes \$118.7 million to the Federal Special Revenue Fund and \$885.5 million to Other Governmental Funds. Due from the General Fund to the Fiduciary Funds related to escheat property that is estimated to be reclaimed and paid to claimants is \$2.4 billion. Due to other funds in the

General Debt Service Fund includes \$969 million for amounts owed to the General Fund for excess personal income revenues. Due from the Other Governmental Funds to the Federal Special Revenue Fund includes \$850 million related to Medicaid disallowances. Due from Non-current to Business-type Activities includes \$536 million related to SUNY litigation for incurred but not reported claims and \$76 million for accrued interest for SUNY related debt.

As explained in Note 1, the amounts reported for the SUNY and CUNY Funds are derived from their annual financial statements for the fiscal year ended June 30, 2014. Therefore, because of the different

fiscal year-end of the SUNY and CUNY Funds, the total amount reported as due to other funds exceeds the total amount reported as due from other funds by \$80 million.

## Note 10 Commitments and Contingencies

The State receives significant financial assistance from the Federal government in the form of grants and entitlements. Receipt of grants is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable Federal regulations, including the expenditure of resources for eligible purposes. Substantially all Federal grants are subject to either the Federal Single Audit Act or to financial and compliance audits by grantor agencies of the Federal government or their designees. Disallowances by Federal program officials as a result of these audits may become liabilities of the State.

Pursuant to legislation enacted in 1985, the State entered into service contracts establishing a contingent-contractual obligation with respect to financings related to the DASNY Secured Hospital Program for the purpose of enabling certain financially distressed not-for-profit hospitals to gain access to the capital markets. The State service contracts obligate the State to pay debt service, subject to annual appropriations, on bonds in the event of shortfalls in hospital resources. As of March 31, 2015, there are \$304 million of outstanding bonds in the program with a scheduled annual debt service requirement of \$62 million. Authorization to issue bonds under this program expired on March 1, 1998.

The financial condition of most of the hospitals in the program continues to deteriorate. During the fiscal year, the State paid \$24 million resulting in cumulative payments under the obligation of \$36 million since fiscal year 2014 when the State's contingent contractual obligation was first invoked. The State has recognized a liability under the guarantee of approximately \$97 million based on the present value of expected debt service payments required through fiscal year 2028 net of the present value of anticipated revenues from two lease agreements on property assumed by affiliates of DASNY through bankruptcy proceedings that will be used to offset the debt service payments. This amount would cover the debt service costs for two hospitals that currently are not meeting the terms of their agreements as well as the debt service costs of a third hospital that is now closed. The State has estimated additional exposure of \$24 million annually, if all hospitals failed to meet their terms and available reserve funds were depleted.

The New York State Constitution provides that the State may guarantee repayment of certain borrowings of the Job Development Authority (JDA) to carry out designated projects. The State has never been called upon to make any direct payments pursuant to such guarantees. However, in 1996, the State entered into an

agreement with JDA and the New York State Urban Development Corporation (UDC) whereby UDC would provide funding needed by JDA to meet its debt service obligations. JDA required no financial assistance to meet debt service obligations during the State fiscal year ended March 31, 2015. As of March 31, 2015, JDA had \$9 million of State-guaranteed bonds and notes outstanding (with an additional \$708 million authorized but not issued).

In order to provide additional inducement to investors to purchase the obligations of certain public benefit corporations, the legislation creating these corporations authorizes the State to make up any deficiencies in their debt service reserve funds, subject to legislative appropriation (effectively, a "moral obligation" debt to back the corporations' credit). Such "moral obligation" debt does not constitute full faith and credit obligations of the State. As of March 31, 2015, approximately \$2.5 million in moral obligation bonds were outstanding. During the year, the State was not called on to make any payments.

Health care providers have a right to appeal Medicaid reimbursement rates. Based on an analysis of appeals, a liability of \$832 million has been recognized in the government-wide Statement of Net Position.

In 1977-78, the State required that reserve funds held by insurance companies that underwrite the State employee health insurance programs be paid to the General Fund. The State is liable to replenish these reserve funds if needed to pay insured benefits or if the contracts with the insurance companies are terminated. Accordingly, based on actuarial calculations, the State has recorded a liability of \$192 million, which is reported as accrued liabilities due in more than one year on the government-wide Statement of Net Position.

Generally, the State does not insure its buildings, contents or related risks and does not insure its State-owned automobiles for bodily injury and property damages, but the State does have fidelity insurance on State employees. A liability is estimated for unpaid automobile claims based on an analysis of property loss and claim settlement trends. Routine uninsured losses are recorded as expenditures in the General Fund as paid, while significant uninsured losses usually are the result of litigation that is discussed further in Note 11. Insured losses incurred by the State did not exceed coverage for any of the three preceding fiscal years. Litigation losses are estimated based on an assessment of pending cases conducted by the Office of the Attorney General.

Workers' compensation is provided with the State Insurance Fund acting as the State's administrator and claims processing agent. Under an agreement with the State Insurance Fund, the State pays only what is necessary to fund claims. Based on actuarial calculations, discounted at 1.687 percent as of March 31, 2015, the State is liable for unfunded claims and incurred but not reported claims totaling \$3.1 billion, which are reported

as accrued liabilities in the government-wide Statement of Net Position.

Changes in the State's liability relating to workers' compensation claims, litigation and incurred but not reported loss estimates related to medical malpractice claims (Note 11), and auto claims in fiscal years 2014 and 2015 were (amounts in millions):

Fiscal Year	Claim Liability Beginning of Year	Increase in Liability Estimate	Payments and Decrease in Liability Estimate	Claim Liability End of Year
2013-2014 .....	\$ 3,410	\$ 73	\$ 508	\$ 2,975
2014-2015 .....	\$ 2,975	\$ 1,313	\$ 455	\$ 3,833

The State Finance Law requires the Abandoned Property Fund (Fund), a Private Purpose Trust Fund, to have a maximum cash balance of \$750 thousand at fiscal year-end. All Abandoned Property receipts are recorded in the General Fund and receipts recorded in the Abandoned Property Fund are for payment upon approval of a claim. At March 31, 2015, the Abandoned Property Fund included \$202 million of securities not yet liquidated and not subject to the State Finance Law's cash provisions. Net collections from inception (1942) to March 31, 2015 of approximately \$14 billion, excluding interest, represent a contingent liability to the State since the owners of such property may file claims for refunds.

Restricted net position, representing the probable amount of escheat property that will be reclaimed and paid to claimants, is reported in the Fund. To the extent that assets in the Fund are less than the claimant liability, a receivable (due from other funds) is reported in that Fund and an equal liability (due to other funds) is reported in the General Fund. At March 31, 2015, the amount reported in the Fund for claimant liability is \$2.8 billion and the amount reported in the General Fund as due to the Fund is \$2.4 billion. Since receipts in the Fund are expected to be adequate to pay current claims, it is not expected that General Fund support for that purpose will be required. Claims paid from the Fund during the year totaled \$422 million.

The State is liable for costs relating to the closure and post-closure of landfills totaling \$19 million, which is recorded in accrued liabilities. Closure and post-closure requirements are generally governed by Title 6, Part 360 of the New York Code of Rules and Regulations. Since most landfills are inactive, the liability reflects the total estimated closure and post-closure cost at year-end. Liability estimates are based on engineering studies or on estimates by agency officials that are updated annually.

GASBS No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*, provides guidance for state and local governments in estimating and reporting the potential costs of pollution remediation. While

GASBS 49 does not require the State to search for pollution, it does require the State to reasonably estimate and report a remediation liability when any of the following obligating events has occurred:

- Pollution poses an imminent danger to the public and the State is compelled to take action;
- The State is in violation of a pollution-related permit or license;
- The State is named or has evidence that it will be named as responsible party by a regulator;
- The State is named or has evidence that it will be named in a lawsuit to enforce a cleanup; or
- The State commences or legally obligates itself to conduct remediation activities.

Site investigation, planning and design, cleanup and site monitoring are typical remediation activities underway across the State. Several State agencies have dedicated programs, rules and regulations that routinely deal with remediation-related issues; others become aware of pollution conditions in the fulfillment of their missions. The State has the knowledge and expertise to estimate the remediation obligations presented herein based upon prior experience in identifying and funding similar remediation activities. The standard requires the State to calculate pollution remediation liabilities using the expected cash flow technique. Where the State cannot reasonably estimate a pollution remediation obligation, it does not report a liability; however, the State has not identified any of these situations.

The remediation obligation estimates that appear in this report are subject to change over time. Cost may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental studies, changes to statutes or regulations and other factors that could result in revisions to these estimates. Prospective recoveries from responsible parties may reduce the State's obligation. Capital assets may be created when pollution remediation outlays are made under specific circumstances.

During the fiscal year, the State recognized estimated additional liabilities of \$400 million, spent \$101 million in pollution remediation obligation-related activities and recognized adjustments decreasing the liability by \$7 million. The State recovered \$20 million from other responsible parties. At March 31, 2015, the State had an outstanding pollution remediation liability of \$961 million, with an estimated potential recovery of \$100 million from other responsible parties.

The Centers for Medicare and Medicaid Services (CMS) disallowed Medicaid claims for prior year services provided by the New York State Office for Persons with Developmental Disabilities. The State and CMS reached a settlement agreement on March 20, 2015, whereby the State agreed to pay a total of \$1.95 billion to CMS. Pursuant to the payment terms included in the agreement, a reduction to Due from Federal Government for \$850 million is reported in the governmental funds at March 31, 2015. In addition, the State will adjust the Federal and State shares of future Medicaid costs to reimburse the Federal government \$100 million annually for each of the next 11 years beginning in State fiscal year 2017. Accordingly, the State has reported, in the governmental activities, liabilities of \$1.1 billion.

The State and the New York State Energy Research and Development Authority (NYSERDA) have been engaged in a dispute with the Federal government over both the responsibility of the Federal government for site cleanup at West Valley, as well as which government is liable for perpetual care of any remaining wastes after decontamination activities are complete. In August 2010, the U.S. District Court approved and entered a Consent Decree that formalized a settlement agreement that covered a number of the State's claims. The Decree identifies a specific cost share for each government for specified facilities and known areas of contamination, and sets forth a process for determining cost shares for contamination that may be identified in the future. The agreement does not affect in any way the cleanup alternatives that are being or may be developed in the ongoing Environmental Impact Statement process. Two claims remain unresolved. The State's unresolved natural resource damages claim has been tolled. The Nuclear Waste Policy Act claim, concerning responsibility for

the disposal cost of certain remaining waste at the site, is in litigation. The parties are discussing potential ways to resolve this claim.

Legislation enacted in 2003 authorized the State to securitize all of its tobacco settlement payments to the Tobacco Settlement Financing Corporation through an asset-backed securitization transaction. To lower costs, the legislation authorized the State to enter into contingency contracts obligating the State to pay debt service, subject to annual appropriations, on the TSFC bonds in the event that tobacco receipts and bond reserves are insufficient. To ensure that State contractual payments will not be required and that tobacco receipts and bond reserves are sufficient to pay debt service, the TSFC bonds were structured to meet or exceed all rating agency tobacco bonds stress tests. The bonds carry a final nominal maturity of 19 years and an expected final maturity of 13 years, based on optional redemptions. The expected final maturity may deviate due to the optional nature of the redemptions and adjustments to tobacco settlement payments due from participating manufacturers. A lawsuit was filed in 2006 by the Attorney General of New York to recover the settlement payments that were withheld from the State. Litigation continues to recover the funds withheld. In addition, participating manufacturers brought a nationwide arbitration against the settling states, including New York, asserting that those states failed to diligently enforce their respective escrow statutes in 2003 as required to maintain the base settlement payments per the Master Settlement Agreement. This was settled in 2003. On September 11, 2013, New York was found to have diligently enforced its qualifying statute in 2003 and, thus, is not subject to the adjustment for 2003. The same claim for the 2004-2012 years has been raised. The Participating Manufacturers have indicated their intent to bring a nationwide NPM Adjustment Arbitration for sales year 2004 against New York and the other states that rejected the term sheet.

Several unions have not reached labor settlement agreements with the State at this time. Settlements may result in added costs to the State. The Enacted Budget assumes spending related to these settlements, but the actual settlements could exceed the amounts in the budget.

---

## Note 11 Litigation

The State is a defendant in numerous legal proceedings pertaining to matters incidental to the performance of routine governmental operations. Such litigation includes, but is not limited to, claims asserted against the State arising from alleged torts, alleged breaches of contracts, condemnation proceedings, and other alleged violations of State and Federal laws.

Included in the State's outstanding litigation are a number of cases challenging the legality or the adequacy of a variety of significant social welfare programs, primarily involving the State's Medicaid and mental health programs. Adverse judgments in these matters generally could result in injunctive relief coupled with prospective changes in patient care that could require substantial increased financing of the litigated programs in the future.

With respect to pending and threatened litigation, the State has reported, in the governmental activities, liabilities of \$707 million, of which \$536 million pertains to SUNY, for awarded claims, anticipated unfavorable judgments, and incurred but not reported loss estimates

related to medical malpractice claims. In addition, the State is party to other claims and litigation that its legal counsel has advised may result in possible adverse court decisions with estimated potential losses of approximately \$318 million.

## Note 12 Retirement Systems

### State and Local Retirement System

There are three systems within the New York State and Local Retirement System (System) for employees of the State and its localities (except employees of New York City and teachers, essentially all of whom are covered by separate pension plans). The System, known and reported collectively as the New York State and Local Retirement System, comprises the New York State and Local Employees' Retirement System (ERS), the New York State and Local Police and Fire Retirement System (PFRS), and the Public Employees' Group Life Insurance Plan (GLIP). GLIP provides death benefits in the form of life insurance. The net position of the System is held in the New York State Common Retirement Fund, which was established to hold all plan assets and record changes in net plan assets allocated to the System. In these statements, GLIP amounts are apportioned to and included in either ERS or PFRS.

The State Comptroller is trustee of the Common Retirement Fund and administrative head of the System. The System is a cost sharing multiple-employer defined benefit pension plan. On March 31, 2015, there were 3,032 participating government employers. Employees of the State constituted about 35 percent and 17 percent of the members of ERS and PFRS, respectively, during the fiscal year ended March 31, 2015.

The System provides retirement benefits as well as death and disability benefits. Members who joined the System prior to January 1, 2010 generally need five years of service to be 100 percent vested. Members who joined on or after January 1, 2010 (ERS) or January 9, 2010 (PFRS) need ten years of service credit to be 100 percent vested. Retirement benefits are established by the New York State Retirement and Social Security Law (RSSL) and are dependent upon the point in time at which the employees last joined the System. Contributory and noncontributory requirements also depend upon the point in time at which an employee last joined the System. Most members of ERS who joined the System on or before July 26, 1976 are enrolled in a noncontributory plan. Most members of PFRS are not required to make employee contributions. Employees who last joined ERS subsequent to July 26, 1976 are enrolled in a contributory plan which requires a 3 percent contribution of their salary (excluding Tier 6 as described below). As a result of Article 19 of the RSSL,

eligible Tier 3 and Tier 4 employees with a membership date after July 26, 1976 who have ten or more years of membership or credited service within the System are not required to contribute. Members cannot be required to begin contributing or to make increased contributions beyond what was required when their memberships began. Generally, members of the System may retire at age 55; however, members of Tiers 2, 3 and 4 will receive a reduced benefit if they retire before age 62 with less than 30 years of service. Tier 5 members must be 62 years of age with at least 10 years of service credit to retire with full benefits. An employee with less than five years of service may withdraw and obtain a refund, including interest, of the accumulated employee contributions. The full benefit age for Tier 6 is 63 for ERS members and 62 for PFRS members. Tier 6 members with 10 years of service or more can retire as early as age 55 with reduced benefits. The Tier 6 contribution rate varies from 3 percent to 6 percent depending on salary. Members are required to contribute for all years of service.

The System's financial statements are prepared using the accrual basis of accounting. Revenue is recognized when earned and liabilities are recognized when incurred. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Employer contributions are recognized when due. Investments are reported at fair value. Stocks traded on a national or international exchange are valued at quoted market value. Bonds are primarily reported at market values obtained from independent pricing services. Mortgages are valued on the basis of future principal and interest payments, and are discounted at prevailing interest rates for similar instruments. Direct real estate investments are based on independent appraisals made every three years or according to the fund agreement. Investments that do not have an established market are reported at estimated fair value as determined by the general partner or by the investment manager. The System trades in foreign exchange contracts in the normal course of its investing activities in order to manage exposure to market risks. Such contracts, which are generally for a period of less than one year, are used to purchase and sell foreign currency at a guaranteed future price. These contracts are recorded at market value using foreign currency

exchange rates. The System is exposed to various investment risks as follows:

**Investment Custodial Credit Risk**—Equity and fixed income investments owned directly by the System which trade in the United States (U.S.) markets are generally held at the System’s custodian, in separate accounts, in the name of the Comptroller of the State of New York in Trust for the Common Retirement Fund. These securities are typically held in electronic form by the Depository Trust Company (DTC) and its subsidiaries, acting as an agent of the System’s custodian bank. Securities held directly by the System which trade in markets outside the U.S. are held by a subsidiary of the System’s custodian bank in the local market, a bank performing custodial services in the local market acting as an agent for the System’s custodian bank, or, in some foreign markets, the securities are held in electronic format by a DTC subsidiary or an organization similar to DTC. Directly held investments include short-term and long-term fixed income, and domestic and international equity separately managed accounts. The aforementioned investments have the lowest custodial risk. Indirectly held fixed income investments are held by third party administrators in trust for the fund. Equity investments held indirectly by the System via limited partnerships, commingled investment funds, joint ventures and other similar vehicles are held in custody by an organization contracted with by the general partner and/or the investment management firm responsible for the management of each investment organization. Title to real property invested in by the System is either held by a real estate holding company or a real estate investment fund. Ownership of mortgage assets is documented by the System’s holding of original mortgage and note documents by the Division of Pension Investment and Cash Management in the Office of the State Comptroller.

**Credit Risk**—New York State statutes and the System’s investment policies provide investment guidance on credit risk. Approximately \$27 billion or 55.9 percent of the System’s \$48 billion long-term bond portfolio is rated AAA by Moody’s. For the balance of the portfolio: 24.72 percent is rated A or AA, 17.35 percent is rated BA to BAA, 1.22 percent is rated B to BB, 0.65 percent is rated C to CAA and 0.16 percent is not rated or in default.

**Interest Rate Risk**—Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of the System’s fixed income securities. The price volatility of the System’s fixed income holdings are measured by duration. The System attempts to mitigate price volatility by matching the duration of the assets with the duration of the

retired lives liabilities so that any change in the market value of the assets resulting from a change in interest rates will result in a similar change in the value of the liabilities. The average duration of the System’s core fixed income portfolio is 4.79 years.

**Concentration of Credit Risk**—Issuer limits for investments held by the System are established for each investment area by RSSL, Article 2, Section 13 and Article 4A, Sections 176, 177, and 313, and policy guidelines adopted by the Comptroller.

Restrictions are placed on short-term fixed income investments such that any one issuer of commercial paper must have the highest rating by two NRSROs and a maximum of \$1 billion of the short-term portfolio can be invested in any one issuer. In addition, simultaneous purchase and sales of U.S. Treasury obligations may be executed with primary government dealers; however, a maximum of \$200 million may be invested with any one primary dealer.

Restrictions are placed on fixed income investments with maturities longer than one year such that obligations payable in U.S. dollars of any one department, agency or political subdivision of the U.S. Government or issued by any corporation, company or other issuer of any kind or description created or existing under the laws of the United States, any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico and obligations of Canada or any province or city of Canada, provided each obligation is rated investment grade by two NRSROs and does not exceed 2 percent of the assets of the System or 5 percent of the direct liabilities of the issuer. In addition, the aggregate amount invested in interest-bearing obligations payable in U.S. dollars which at the time of investment are rated one of the four highest grades by each NRSRO may not exceed 1 percent of the assets of the System, and bonds issued or guaranteed by the State of Israel payable in U.S. dollars may not exceed 5 percent of the assets of the System.

**Securities Lending**—Section 177-d of the RSSL authorizes the System to enter into security loan agreements with broker/dealers and New York State or national banks. The System has designated its master custodian bank (Custodian) to manage a securities lending program. This program is subject to a written contract between the System and the Custodian, who acts as security lending agent for the System. The Custodian is authorized to lend securities within the borrower limits and guidelines established by the System. Types of collateral received from borrowers for securities loaned are cash, government securities and Federal agency obligations. The Custodian is authorized to invest

the cash collateral in short-term investments that are legal for the System. These include domestic corporate and bank notes, U.S. Treasury obligations, obligations of Federal agencies, repurchase agreements and specific asset-backed securities. All rights of ownership to securities pledged as collateral remain with the borrower except in the event of default. The System has not experienced any losses resulting from the default of a borrower or lending agent during the year ended March 31, 2015 or in the history of the program.

The System lends fixed income, domestic equity, and international equity securities to approved broker/dealers. Collateral for securities loaned equals 102 percent of fair market value for domestic securities and 105 percent for international securities. Credit risk associated with the investment of cash collateral pledged by borrowers is mitigated by the maturity restrictions, percentage limitations, and rating requirements for individual asset classes included in the System's reinvestment guidelines. The Custodian acknowledges responsibility to reimburse the System for any losses that might arise from managing the program in a manner inconsistent with the contract. The System manages its market rate risk by recording investments at market value daily and maintaining the value of the collateral held by the System in excess of the value of the securities loaned.

As of March 31, 2015, the fair value of securities on loan was \$13.6 billion. The associated collateral was \$13.9 billion, of which \$6.3 billion was cash collateral and \$7.6 billion was securities held as collateral. The fair value of the invested cash collateral, as of March 31, 2015, was \$6.2 billion and the securities lending obligations were \$6.2 billion. The unrealized loss in invested cash collateral on March 31, 2015 was \$10.6 million, which is included in the Statement of Changes in Fiduciary Net Position as part of "Net increase in the fair value of investments."

All open security loans can be terminated on demand by either the System or the borrower. To provide sufficient liquidity, the policy of the System is to maintain a minimum of 10 percent of collateral in overnight investments. While the Securities Lending Investment Guidelines allow investments up to a maximum of three years for U.S. Treasury and Federal agency obligations and one full year for all other investments, the average term of open security loans at March 31, 2015 was 18 days. All loans were open loans. There were no direct matching loans. The collateral pool is valued at market value obtained from independent pricing services.

**Foreign Currency Risk**—As of March 31, 2015, the System's current position in publicly traded international equity securities, invested directly in and through commingled funds, is approximately \$23 billion. The System also has foreign investments held in U.S. dollars of \$8.4 billion, a net forward foreign currency contracts position of negative \$5.3 million, \$9.1 billion in private equities, opportunistic and absolute return strategy funds, fixed income investments of \$6.3 billion and \$2.6 billion in real property owned, made, or located outside the United States. The approximate total market value of investments made outside of the United States is \$49.7 billion.

### Contributions

Employers' contributions receivable are presented net of withdrawals, refunds, advance employer payments, and credits due employers. Receivable amounts from participating employers include \$52.8 million for amortization of retirement incentives, new plan adoptions and retroactive membership. Receivable amounts from the State for other amortizations total \$740 thousand.

RSSL Chapter 260 of the Laws of 2004 authorized employers to amortize over ten years, at 5 percent interest, the portion of their annual bill for fiscal year ended 2006 that exceeded 9.5 percent of payroll. The amortized amount receivable as of March 31, 2015 from the State is \$1.9 million and from participating employers is \$3.5 million.

RSSL Chapter 260 of the Laws of 2004 authorized local employers to amortize over ten years, at 5 percent interest, the portion of their annual bill for fiscal year ended 2007 that exceeded 10.5 percent of payroll. The amortized amount receivable as of March 31, 2015 from participating employers is \$5.2 million.

RSSL Chapter 57 of the Laws of 2010 authorized the State and local employers to amortize over ten years, at 5 percent interest, the portion of their annual bill for fiscal year ended 2011 that exceeded 9.5 percent of payroll for ERS and 17.5 percent of payroll for PFRS. The amortized amount receivable as of March 31, 2015 from the State is \$164.7 million and from participating employers is \$27.7 million. The thresholds for the fiscal year ended 2012 were 10.5 percent of payroll for ERS and 18.5 percent for PFRS. The interest rate was 3.75 percent. The amortized amount receivable as of March 31, 2015 from the State is \$416.5 million and from participating employers is \$152.6 million. The thresholds for the fiscal year ended 2013 were 11.5 percent of payroll for ERS and 19.5 percent for PFRS. The interest rate was 3.0 percent. The amortized amount receivable as of March 31, 2015 from the State is \$642.4 million and from participating employers is \$302.2 million.

The thresholds for the fiscal year ended 2014 were 12.5 percent of payroll for ERS and 20.5 percent for PFRS. The interest rate was 3.67 percent. The amortized amount receivable as of March 31, 2015 from the State is \$860.3 million and from participating employers is \$200 million. The thresholds for the fiscal year ended 2015 were 13.5 percent of payroll for ERS and 21.5 percent for PFRS. The interest rate was 3.15 percent. The amortized amount receivable as of March 31, 2015 from the State is \$715.2 million and from participating employers is \$152.1 million.

The fiscal year 2014 Enacted Budget included an alternate contribution program (the Alternate Contribution Stabilization Program) that provided certain participating employers with a one-time election to amortize slightly more of their required contributions than would be available for amortization under the 2010 legislation. In addition, the maximum payment period was increased from ten years to twelve years. The election was available to counties, cities, towns, villages, BOCES, school districts and the four public health care centers operated in the counties of Nassau, Westchester and Erie. The State was not eligible to participate in the Alternate Contribution Stabilization Program. The thresholds for the fiscal year ended 2014 were 12.0 percent of payroll for ERS and 20.0 percent for PFRS. The interest rate was 3.76 percent. The amortized amount receivable as of March 31, 2015 from participating employers is \$234.1 million. The thresholds for the fiscal year ended 2015 were 12.0 percent of payroll for ERS and 20.0 percent for PFRS. The interest rate was 3.5 percent. The amortized amount receivable as of March 31, 2015 from participating employers is \$196.5 million.

The State's contributions to the System for the years ended March 31, 2015, 2014, and 2013 were \$2 billion, \$1.9 billion, and \$1.4 billion, respectively, which equaled 100 percent of the required billed contributions for each respective year.

The System issues a publicly available financial report that includes financial statements, expanded disclosures, and required supplementary information for the System. The report may be obtained by writing to the New York State and Local Retirement System, Office of the State Comptroller, 110 State Street, Albany, New York, 12244-0001, or at [www.osc.state.ny.us/pension/cafi.htm](http://www.osc.state.ny.us/pension/cafi.htm).

### Employer Accounting

The pension contribution expenditure of \$2 billion reported in the governmental funds includes pension costs related to employee services rendered during the year, retirement incentive programs and employer amortizations authorized by Chapter 260 of the Laws of

2004, and Chapter 105 and Chapter 57 of the Laws of 2010. Pension contributions payable reported in the General Fund includes \$302 million for accrued retirement incentive programs and the employer amortization. In addition, \$2.5 billion of the retirement incentive programs and the employer amortization is reported on the Statement of Net Position as pension contributions payable due in more than one year.

### Business-type Activities

SUNY participates in the ERS and two other pension plans for its employees: the New York State Teachers' Retirement System (TRS) and the Teachers Insurance and Annuity Association – College Retirement Equities Fund (TIAA-CREF). TRS is a cost-sharing, multiple-employer, defined benefit public plan separately administered by a nine-member board. TIAA-CREF is a multiple-employer, defined contribution plan administered by separate boards of trustees. TRS provides retirement benefits as well as death and disability benefits. TIAA-CREF is an Optional Retirement Program (ORP) and provides benefits through annuity contracts. TIAA-CREF provides retirement and death benefits for or on behalf of SUNY employees who elected to participate in the ORP. SUNY's contributions under each of the plans for the year ended June 30, 2014 were \$130.3 million (ERS), \$11.9 million (TRS) and \$199.8 million (TIAA-CREF), which equaled 100 percent of the required billed contributions under each of the respective plans.

CUNY Senior Colleges participate in TIAA-CREF and two other pension plans for its employees: the New York City Employees' Retirement System (NYCERS); and the Teachers' Retirement System of the City of New York Qualified Pension Plan (TRSCNY). NYCERS and TRSCNY are cost sharing, multiple-employer defined benefit plans administered by the City of New York. NYCERS and TRSCNY provide retirement benefits, as well as death and disability benefits. TIAA-CREF provides retirement and death benefits for or on behalf of CUNY Senior Colleges employees who elected to participate in this defined contribution ORP. CUNY Senior Colleges' contributions under each of the plans for the year ended June 30, 2014 were \$35.9 million (NYCERS), \$75 million (TRSCNY) and \$77 million (TIAA-CREF), which equaled 100 percent of the required billed contributions under each of the respective plans.

Each of these retirement plans issue publicly available financial reports that include financial statements and required supplementary information. Information on how these reports may be obtained is provided in the SUNY and the CUNY Senior Colleges financial statements.

## Note 13 Other Postemployment Benefits (OPEB)

### Governmental Activities

The New York State Health Insurance Program (NYSHIP) was established by the State Legislature in 1957 to provide health insurance to New York State employees, retirees and their eligible dependents. Public authorities, public benefit corporations, and other quasi-public entities that choose to participate in NYSHIP are participating employers (PEs). Local government units that choose to participate in NYSHIP are called participating agencies (PAs). At present, there are approximately 302 New York State agencies, 92 PEs, and 798 PAs in NYSHIP. NYSHIP currently covers approximately 592 thousand New York State, PA and PE

employees and retirees. Eligible covered dependents bring the total number of covered individuals to approximately 1.2 million. SUNY participates in NYSHIP, but CUNY does not. Of the State's 42 discretely presented component units, which are considered PEs, a majority participate in NYSHIP. NYSHIP does not issue a stand-alone financial report, but NYSHIP's activities are included within the State's financial statements. NYSHIP is classified as an agent multiple-employer plan and financial information is reported in an agency fund and accounted for on the accrual basis of accounting. Information related to investment valuations is presented in Note 2.

Enrollment	NYS*	PEs	PAs	Total
Current active participants .....	182,972	36,769	104,149	323,890

COBRA participants .....	732	486	328	1,546
Other inactive participants** .....	152,988	17,920	94,835	265,743
<b>Total participants .....</b>	<b>337,033</b>	<b>55,448</b>	<b>199,564</b>	<b>592,045</b>

\*Includes State and SUNY participants.

\*\*Includes retirees, dependent survivors, long-term disability enrollees, young adult program enrollees and preferred list enrollees.

During the fiscal year ended March 31, 2015, NYSHIP provided health insurance coverage through: the Empire Plan, an indemnity health insurance plan with managed care components; 10 Health Maintenance Organizations (HMOs); and the Student Employee Health Plan (SEHP). Generally, these include hospital, medical, mental health and substance abuse benefits, and prescription drug benefits.

The benefit design of the Empire Plan is the result of collective bargaining between the State and the various unions representing its employees. Therefore, the benefit design is subject to periodic change. Benefits are administratively extended to non-represented State employees, employees of PAs and PEs, and retirees. Each participating employer in the plan is required to disclose additional information with regard to funding policy, the employer's annual OPEB costs and contributions made, the funded status and funding progress of the employer's individual plan, and actuarial methods and assumptions used.

Substantially all of the State's employees may become eligible for post retirement benefits if they reach retirement age while working for the State.

The costs of providing post retirement benefits are shared between the State and the retired employee.

### Contributions

The authority under which the obligations of the plan members, employers and other contributing entities to contribute to the plan are established or may be amended can be found in Article XI, Section 167 of Civil Service Law. Contributions are determined in accordance with Civil Service Law—Article XI, Sections 165, 165-a and 167, which assigns the authority to NYSHIP to establish and amend the benefit provisions of the plans and to establish maximum obligations of the plan members to contribute. The costs of administering the plan are charged as part of the health insurance premium to all payors under the authority of Section 163.2 of Civil Service Law. A retiree is generally required to pay on a monthly basis either 12 percent or 27 percent of the health insurance premium for enrollee or dependent coverage, respectively, which is reduced by the amount of sick leave credits available at the time of retirement factored by the employee's retirement age.

Required employer contribution rates, depending upon enrollee or dependent coverage, are presented in the following table:

**EMPLOYER CONTRIBUTIONS  
(As Percentages of Premium Rates)**

<u>Enrollee Group</u>	<u>Enrollee Coverage</u>	<u>Dependent Coverage</u>
Active (Union without ratified contract and GSEU) . . . . .	90%	75%
Active (Union with ratified contract and MC)—Below Grade 10 . . . . .	88%	73%
Active (Union with ratified contract and MC)—Grade 10 and above . . . . .	84%	69%
Preferred list . . . . .	90%	75%
Retired before January 1, 1983 . . . . .	100%	75%
Retired on/after January 1, 1983 but before January 1, 2012 . . . . .	88%	73%
Retired on/after January 1, 2012—Below Grade 10 . . . . .	88%	73%
Retired on/after January 1, 2012—Grade 10 and above . . . . .	84%	69%
Amended dependent survivors <sup>(1)</sup> . . . . .	75%	75%
Full share dependent survivors/long term disability . . . . .	0%	0%
Dependent survivors . . . . .	90%	75%
Attica dependent survivors . . . . .	100%	100%
Vestees . . . . .	0%	0%
COBRA . . . . .	0%	0%
Young Adult Option enrollees . . . . .	0%	n/a
Participating employers and participating agencies <sup>(2)</sup> . . . . .	50%	35%

<sup>(1)</sup>State contribution for enrollee and dependent coverage is 75% of dependent coverage.

<sup>(2)</sup>Values reported are minimum employer share. Employers can pay greater percentages of premiums for their retirees.

The State reimburses Medicare eligible enrollees 100 percent of the cost of the monthly Medicare Part B premium. However, the funding of the cost of the Medicare reimbursements is no longer the sole responsibility of the employer (the employer is not billed for Medicare expenses incurred April 1, 2010 and after). A Medicare Part B component has been incorporated into the NYSHIP Premium Rates (implemented 10/1/2010 and retroactive to 4/1/2010) and is just one component of the NYSHIP premiums in which the above listed employer contribution percentages are applicable. The premium generated from the Medicare Part B NYSHIP Rate Component is utilized to make the Medicare Part B reimbursement payments to Medicare Primary NYSHIP enrollees.

In addition, the State reduces the retiree health insurance contributions for the value of a retiree’s unused sick leave credit at retirement (converted to a monthly fixed value). The cost is paid by the State.

**Funding Policy**

The contribution requirements of plan members and the State are established and may be amended by the State Legislature. The State is not required to fund the plan other than the pay-as-you-go amount necessary to provide current benefits to retirees. For the fiscal year ended March 31, 2015, the State paid \$1.3 billion on behalf of the plan. The RSI contains a schedule of funding progress that presents multi-year trend information for actuarial values of plan assets and accrued liabilities.

**Annual OPEB Cost and Net OPEB Obligation**

The annual required contribution (ARC) represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities (or funding excess) of the plan over a period not to exceed thirty years. Amounts “required” but not actually set aside to pay for these benefits are accumulated with interest as part of the net OPEB obligation, after adjusting for amounts previously “required.” The State’s annual OPEB cost for the year, the amount actually paid on behalf of the plan, and changes in the State’s net OPEB obligation to the plan for the year ended March 31, 2015 are as follows (amounts in millions):

<b>Governmental Activities:</b>	
Annual required contribution . . . . .	\$ 2,335
Interest on net OPEB obligation	
at beginning of year . . . . .	391
Adjustment to annual required contribution . . . . .	(439)
<b>Annual OPEB cost . . . . .</b>	<b>2,287</b>
Contributions made . . . . .	(1,258)
Increase in OPEB obligation . . . . .	1,029
Net obligation at beginning of year . . . . .	12,573
<b>Net obligation at end of year . . . . .</b>	<b>\$ 13,602</b>
Actuarial accrued liability (AAL)	
April 1, 2014 . . . . .	\$ 63,426
Funded OPEB plan assets . . . . .	—
<b>Unfunded actuarial accrued liability (UAAL) April 1, 2014 . . . . .</b>	<b>\$ 63,426</b>
Funded ratio . . . . .	— %
Covered payroll . . . . .	\$ 8,463
UAAL as percentage of covered payroll . . . . .	749.5%

In accordance with GASBS No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*, the actuarial valuation of OPEB also includes the value of sick leave that will be converted to reduce the retiree's share of health insurance premiums.

The State's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for the three most recent fiscal years ended March 31 were as follows (amounts in millions):

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Paid</u>	<u>Net OPEB Obligation</u>
3/31/15 .....	\$ 2,287	55.01%	\$ 13,602
3/31/14 .....	\$ 2,270	53.52%	\$ 12,573
3/31/13 .....	\$ 2,592	45.06%	\$ 11,518

### Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the plan and include the types of benefits provided at the time of each valuation. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The State's \$2.3 billion annual OPEB cost, determined using the April 1, 2012 actuarial valuation with results projected to April 1, 2014 for the fiscal year ended March 31, 2015, was determined using the frozen entry age actuarial cost method, allocating costs on a level basis over earnings. The annual OPEB cost reflects savings resulting from ratified and/or announced plan changes in the fall of 2011 and the State's decision to implement an Employer Group Waiver Plan (EGWP).

The actuarial assumptions used to establish retiree contribution rates include trend rates of annual health-care costs of 9 percent for non-Medicare eligible medical benefits, 5.5 percent for Medicare eligible medical benefits and 7.5 percent for drug benefits for the first fiscal year in the valuation, declining each year to an ultimate trend rate of 4.75 percent for both medical and drug benefits. Other actuarial assumptions include a salary growth rate of 3 percent, an inflation rate of 2.75 percent and a discount rate of 3.112 percent that was the average short-term investment pool rate for the past 15 years at the time of the valuation.

The State's \$63.4 billion unfunded actuarial accrued liability was calculated in the April 1, 2014 actuarial valuation using the frozen entry age actuarial cost method and was amortized over an open period of 30 years using the level percentage of projected payroll amortization method. Health care trends were split to reflect separate trends for pre and post-65 (age) claims given that current standards suggest post-65 claims grow at a smaller rate than do pre-65 claims. The pre-65

trend assumption begins at 8.25 percent and decreases to a 4.75 percent long-term trend rate for all health care benefits after nine years. The trend assumption for post-65 benefits begins at 5.5 percent and decreases to a 4.75 percent long-term trend rate after nine years. The drug benefits assumption begins at 6.75 percent and decreases to a 4.75 percent long-term trend rate. Additionally, a trend starting at 5 percent per year and decreasing to 4.75 percent after nine years was assumed for EGWP benefits. Other actuarial assumptions include a salary growth rate of 3 percent, an inflation rate of 2.75 percent and a discount rate of 3.155 percent that was the average short-term investment pool rate for the past 20 years at the time of the valuation.

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events in the future. Examples include assumptions about employment, mortality and healthcare cost trends. Actuarial valuations are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future.

### Business-type Activities

The State, on behalf of SUNY, provides health insurance coverage for eligible retired SUNY employees and their spouses as part of the New York State Health Insurance Plan (NYSHIP). Employee contribution rates for NYSHIP are established by the State and are generally 12 percent (ranging from 10 to 16 percent) for enrollee coverage, and 27 percent (ranging from 25 to 31 percent) for dependent coverage. The frozen entry age actuarial cost method is used to determine the annual required contribution amounts and the annual net OPEB obligation. The actuarial assumptions include a 3.1 percent discount rate, salary growth rate of 3 percent, an inflation rate of 2.75 percent, and an annual healthcare cost trend rate for medical coverage of 9 percent initially, reduced by decrements to a rate of 4.75 percent after 7 years.

SUNY's annual OPEB costs and changes in net OPEB obligations for the year ended June 30, 2014 are as follows (amounts in millions):

Annual required contribution	\$ 732
Interest on net OPEB obligation at beginning of year	111
Adjustment to annual required contribution	(124)
<b>Annual OPEB cost</b>	<b>719</b>
Contributions made	(252)
Increase in OPEB obligation	467
Net obligation at beginning of year	3,551
<b>Net obligation at end of year</b>	<b>\$ 4,018</b>
Actuarial accrued liability (AAL) April 1, 2012	\$ 13,933
Funded OPEB plan assets	—
<b>Unfunded actuarial accrued liability (UAAL) April 1, 2012</b>	<b>\$ 13,933</b>
Funded ratio	— %
Covered payroll	\$ 3,202
UAAL as percentage of covered payroll	435.1%

The SUNY Research Foundation, a blended component unit of SUNY, is not included in the numbers reported above. The SUNY Research Foundation reports other postemployment benefits in accordance with the Accounting Standards Codification (ASC) Topic 715, *Compensation—Retirement Benefits*. SUNY's other postemployment benefits liability reported in the Statement of Net Position, Enterprise Funds (\$4.2

billion), includes SUNY's net obligation above (\$4 billion), and the net obligation of the SUNY Research Foundation's plan as of June 30, 2014 (\$153 million).

SUNY's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for SUNY's three most recent fiscal years were as follows (amounts in millions):

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Paid</u>	<u>Net OPEB Obligation</u>
6/30/14	\$ 719	35.05%	\$ 4,018
6/30/13	\$ 716	34.08%	\$ 3,551
6/30/12	\$ 784	30.23%	\$ 3,079

CUNY retirees receive retiree healthcare benefits through the New York City Health Benefits Program, which is a single-employer defined benefit healthcare plan. The program covers individuals who receive pensions from one of the following three pension plans within the New York City Retirement System (NYCRS): New York City Employees' Retirement System; New York City Teachers' Retirement System; and New York City Board of Education Retirement System. New York City pays for the coverage (Basic Coverage and Welfare

Fund contributions) for retirees in NYCRS who retired from community colleges. The frozen entry age actuarial cost method is used to determine the annual required contribution amounts and the annual net OPEB obligation. The actuarial assumptions include a 4 percent discount rate, payroll growth rate of 3 percent, and an annual healthcare cost trend rate for medical coverage of 9.5 percent initially, reduced to a rate of 5 percent by 2023.

CUNY's annual OPEB costs and changes in net OPEB obligations for the year ended June 30, 2014 are as follows (amounts in millions):

Annual required contribution	\$	100
Interest on net OPEB obligation at beginning of year		18
Adjustment to annual required contribution		(18)
<b>Annual OPEB cost</b>		<b>100</b>
Contributions made		(33)
Increase in OPEB obligation		67
Net obligation at beginning of year		456
<b>Net obligation at end of year</b>	<b>\$</b>	<b>523</b>
Actuarial accrued liability (AAL) June 30, 2013	\$	1,368
Funded OPEB plan assets		—
<b>Unfunded actuarial accrued liability (UAAL) June 30, 2013</b>	<b>\$</b>	<b>1,368</b>
Funded ratio		— %
Covered payroll	\$	975
UAAL as percentage of covered payroll		140.3%

The CUNY Research Foundation, a blended component unit of the CUNY Senior Colleges, reports other postemployment benefits in accordance with ASC Topic 715, *Compensation—Retirement Benefits*. CUNY Senior Colleges' other postemployment benefits liability reported in the Statement of Net Position, Enterprise Funds (\$523 million), includes the CUNY Senior

Colleges' net obligation above (\$523 million), and the funded status of the CUNY Research Foundation's plan as of June 30, 2014 (\$0.4 million).

CUNY's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for CUNY's three most recent fiscal years were as follows (amounts in millions):

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Paid</u>	<u>Net OPEB Obligation</u>
6/30/14	\$ 100	33.00%	\$ 523
6/30/13	\$ 99	34.34%	\$ 456
6/30/12	\$ 100	33.00%	\$ 391

## Note 14 Discretely Presented Component Units—Public Benefit Corporations

Discretely presented component units—public benefit corporations (Corporations), as defined in Note 1, are legally separate entities that are not operating departments of the State. The Corporations are managed independently, outside the appropriated budget process, and their powers generally are vested in a governing board. Corporations are established for the benefit of the State's citizenry for a variety of purposes such as economic development, financing and public transportation. They are not subject to State constitutional restrictions on the incurrence of debt, which apply to the State itself, and may issue bonds and notes within legislatively authorized amounts.

Corporations are generally supported by revenues derived from their activities, although the State has provided financial assistance, in some cases of a recurring nature, to certain Corporations for operating and other expenses. Financial assistance in the form of appropriated loans, contributed capital or operating subsidies for certain Corporations, principally the Metropolitan Transportation Authority, the Roswell

Park Cancer Institute, and the Urban Development Corporation was provided in the fiscal year ended March 31, 2015 and such assistance is expected to be required in future years. Accordingly, the fiscal condition of the State is related to the fiscal stability of the Corporations.

Thirty-six of the 42 entities listed below are discretely presented components units of the State because the Governor, with the approval of the State Senate, appoints the voting majority of the boards of directors of these corporations, and the State is able to impose its will on the corporations and/or has a financial benefit or burden relationship with the corporations. The Governor does not have substantive appointment authority over the board of directors of the Rochester-Genesee Regional Transportation Authority. However, it is a discretely presented component unit because it is fiscally dependent upon, and has a financial benefit or burden relationship with the State. Health Research, Inc., Metropolitan Transportation Authority, Research Foundation for Mental Hygiene, Inc., State University of

New York Foundations and Auxiliary Corporations, and City University of New York—Senior College Supporting Organizations are included as component units of the State because the nature and significance of their relationships with the State are such that it would be misleading to exclude them.

The amounts presented in the accompanying basic financial statements for the Corporations include the following entities for the fiscal years indicated:

<b>Entities Audited by KPMG LLP:</b>	<b>Fiscal Year-End</b>
City University of New York— Senior College Supporting Organizations . . . . .	June 30, 2014***
Dormitory Authority of the State of New York . . . . .	March 31, 2015*
Long Island Power Authority . . . . .	December 31, 2014*
New York Racing Association, Inc . . . . .	December 31, 2014*

Research Foundation for Mental Hygiene, Inc. . . . .	March 31, 2015*
Rochester-Genesee Regional Transportation Authority . . . . .	March 31, 2015*
Roosevelt Island Operating Corporation . . . . .	March 31, 2015*
Roswell Park Cancer Institute . . . . .	March 31, 2015*
State Insurance Fund . . . . .	December 31, 2014
State of New York Mortgage Agency . . . . .	October 31, 2014*
Urban Development Corporation . . . . .	March 31, 2015*

*\*Audit conducted in accordance with Government Auditing Standards as promulgated by the Comptroller General of the United States.*

*\*\*KPMG LLP audited 37 percent of the total assets and 23 percent of the total revenues of the State University of New York Foundations and Auxiliary Corporations. The remaining balances were audited by other auditors.*

*\*\*\*KPMG LLP audited five percent of the total assets and 25 percent of the total revenues of the City University of New York—Senior College Supporting Organizations. The remaining balances were audited by other auditors.*

**Financial Information**

Substantially all of the financial data for the Corporations was derived from audited annual financial statements and summarized into the combining statement format in the basic financial statements. The Corporations follow the accrual basis of accounting. A few of the individual component units, primarily, the State Insurance Fund, do not fully conform to the accrual basis; however, the impact of these variances is not material to the Corporations in total. Ten of the 42 discrete entities presented comprise 94 percent of the combined assets and 80 percent of the combined program revenues (before eliminations). The remaining

portion of this note contains a brief description of the operations of the ten major discretely presented component units. A presentation of their accounts is included in the Combining Statement of Net Position and the Combining Statement of Activities. Additional information about each of the Corporations can be obtained by contacting the Corporations directly and requesting a copy of their annual financial reports, or by visiting their websites.

Certain Corporations issue revenue bonds for independent third-party entities to provide funding for the projects of those third parties. These bonds are considered conduit debt and are secured by payments made by third party entities and in some cases certain other pledged funds. These bonds do not constitute a debt or pledge of the faith and credit of the Corporations or the State. DASNY, the New York State Housing Finance Agency (HFA), the Environmental Facilities Corporation (EFC), the New York State Energy Research and Development Authority (NYSERDA) and the New York Job Development Authority (JDA) have issued conduit debt and have elected different, but permissible, methods of accounting for it under GAAP. DASNY has elected to report conduit debt and related assets on its Statement of Net Position. At March 31, 2015, the liability DASNY reported for such debt was approximately \$19.5 billion. HFA reports conduit debt and related assets on its Statement of Net Position. At October 31, 2014, the liability HFA reported for such debt was approximately \$10.4 billion. At March 31, 2015, EFC's Statement of Net Position did not include \$141 million in bonds it issued for certain private companies. NYSERDA has issued conduit debt for participating gas and electric utility companies and other private purpose users, the principal of which totaled approximately \$3.4 billion at March 31, 2015, which is not included on NYSERDA's Statement of Net Position. Local Development Corporations that are blended component units of JDA have issued conduit debt which is not included on JDA's combined Statement of Net Position. At March 31, 2015, the principal on these bonds totaled approximately \$6.6 billion.

### Power Authority

The Power Authority of the State of New York (NYPA) was created in 1931 to help provide a continuous adequate supply of dependable electric power and energy to the people of the State. NYPA generates, transmits, and sells electric power and energy principally at wholesale to various customers including private and municipal utilities. Three of NYPA's largest facilities are the Niagara Power Project at Lewiston, the Blenheim-Gilboa Pumped Storage Power Project at Blenheim and Gilboa and the St. Lawrence-Franklin D. Roosevelt Power Project at Massena. These hydroelectric facilities have the capability of producing 2,680,000, 1,168,000 and 827,000 kilowatts, respectively.

NYPA has loaned approximately \$300 million of reserves to the State treasury. The State has recorded a corresponding liability in its financial statements. The individual financial statements of NYPA are available on the web at [www.nypa.gov](http://www.nypa.gov).

### Housing Finance Agency

Housing Finance Agency (HFA) was created as a public benefit corporation in 1960 under Article III of the Private Housing Finance Law. HFA is empowered to finance or contract for the financing of the construction, acquisition, or refinancing of loans for: low-to-moderate income housing; municipal health facilities; non-profit health care facilities; community related facilities; and to provide funds to repay the State for amounts advanced to finance the cost of various housing assistance programs. HFA, through its Capital Grant Low Rent Assistance Program, rents housing to low and middle income persons and families. HFA also participates in Federal housing assistance programs which provide interest reduction and rental assistance subsidies to eligible projects and tenants. HFA administers the State's Housing Project Repair and Infrastructure Trust Fund Programs.

To finance low income housing, HFA raises funds through the issuance of municipal securities and the making of mortgage loans to eligible borrowers. HFA is authorized to issue bonds in the amount of approximately \$18.8 billion to finance housing projects, and approximately \$3 billion in Service Contract Obligation Revenue Bonds, Service Contract Revenue Bonds and Personal Income Tax Revenue Bonds. Total bond indebtedness reported as of October 31, 2014 is approximately \$12.7 billion. Individual financial statements can be obtained by contacting HFA at [www.nyshcr.org](http://www.nyshcr.org).

### Thruway Authority

The New York State Thruway Authority (NYSTA) was created as a public benefit corporation by the State Legislature in 1950 with powers to construct, operate and maintain a Thruway system. In 1991, the Legislature empowered NYSTA to issue Local Highway and Bridge Service Contract (LHB) Bonds to provide funds to municipalities throughout the State for qualifying capital expenditures under State programs. In August 1992, the Legislature created the New York State Canal Corporation (NYSCC) as a subsidiary corporation of NYSTA to accept jurisdiction and control over the State Canal System from the State. In 1993, the Legislature authorized NYSTA to issue Highway and Bridge Trust Fund (HBTF) Bonds to reimburse the State for expenditures made by the State's Department of Transportation in connection with the State's multi-year Highway and Bridge Capital Program. In 2001, the Legislature authorized NYSTA to issue Personal Income Tax (PIT) Revenue Bonds to provide funds to municipalities and

other project sponsors throughout the State for qualifying local highway, bridge and multi-modal capital project expenditures under established State programs.

The financial position of and activities relating to the special bond programs (LHB, HBTF and PIT) are reported within the funds of the State, rather than under the NYSTA, because these special bond programs are not separate legal entities but are considered funds of the State. Columns headed “Thruway Authority” reflect the operations of the Thruway system and the NYSCC. Individual financial statements can be obtained by contacting NYSTA at [www.thruway.ny.gov](http://www.thruway.ny.gov).

### Metropolitan Transportation Authority

The Metropolitan Transportation Authority (MTA) was created to continue, develop and improve public transportation and to develop and implement a unified public transportation policy in the New York City metropolitan area. The accounts presented as the MTA are the combined accounts of its headquarters and eight affiliates and subsidiaries. The MTA operates the largest transit and commuter rail transportation system in North America and one of the largest in the world. The MTA is dependent upon the State for a portion of its revenues. During the MTA fiscal year ended December 31, 2014, the MTA reported \$4.3 billion in payments from the State. A significant portion of that aid was in payments from the State’s Mass Transportation Operating Assistance Fund, a Special Revenue Fund, which derives a major portion of its receipts from taxes imposed in the Metropolitan Transportation District for this purpose. Another significant portion of that aid came from the Metropolitan Commuter Transportation Mobility Tax enacted in 2009, which is a tax imposed on certain employers and self-employed individuals engaging in business within the Metropolitan Transportation District. The State also provides funding to pay the debt service on State Service Contract bonds issued by the MTA for its capital projects. At December 31, 2014, \$286 million of MTA State Service Contract bonds remain outstanding. Capital assets acquired prior to April 1982 for the New York City Transit Authority (NYCTA) were funded primarily by New York City through capital grants. New York City has title to a substantial portion of such assets and they are not included among the assets reported under MTA. In certain instances, title to real property used by the Triborough Bridge and Tunnel Authority (TBTA) may revert to New York City in the event TBTA determines it is not needed for corporate purposes. The Federal government has a contingent equity interest in assets acquired by the MTA with Federal funds, and upon disposal of such assets, the Federal government may have a right to its share of the proceeds from the sale. Individual financial statements can be obtained by contacting MTA at [www.mta.info](http://www.mta.info).

### Dormitory Authority

The Dormitory Authority of the State of New York (DASNY) is a public benefit corporation established in 1944. DASNY’s purpose is to finance, design, construct, purchase, reconstruct and/or rehabilitate buildings (projects) for use by public and private educational, healthcare, and other not-for-profit institutions (institutions) located within the State, certain State agencies, local school districts, and cities and counties with respect to certain court and municipal facilities.

DASNY’s outstanding bonds and notes of \$45.7 billion consist mainly of debt issued for New York State agency projects (\$11.2 billion), SUNY projects (\$10.5 billion), independent institutions (\$10.4 billion), health care facilities (\$5.3 billion) and CUNY projects (\$4.8 billion). The remaining debt was issued for projects for municipal facilities. The financial statements of DASNY can be obtained at [www.dasny.org](http://www.dasny.org).

### Long Island Power Authority

The Long Island Power Authority (LIPA) was established as a corporate municipal instrumentality of the State. On May 28, 1998, the LIPA Acquisition Corporation, a wholly-owned subsidiary of LIPA, was merged with and into the Long Island Lighting Company (LILCO) pursuant to an Agreement and Plan of Merger dated as of June 26, 1997. LIPA financed the cost of the merger and the refinancing of certain of LILCO’s outstanding debt by the issuance of \$6.7 billion aggregate principal amount of Electric System General Revenue Bonds and Electric System Subordinated Revenue Bonds. In addition, LIPA assumed \$1.2 billion of LILCO’s General and Refunding Bonds which were defeased immediately upon the closing of the merger. The excess of the acquisition costs over the fair value of net position acquired (\$3.5 billion) has been reported as an “intangible asset,” which is being amortized over a 35-year period which began May 28, 1998.

Chapter 173 of the Laws of 2013 established the Utility Debt Securitization Authority (UDSA) for the sole purpose of retiring certain outstanding indebtedness of LIPA through the issuance of restructuring bonds by UDSA. In accordance with GASBS No. 61, UDSA is considered a blended component unit of LIPA. As of December 18, 2013, UDSA issued Restructuring Bonds totaling \$2 billion. LIPA was able to redeem or refinance approximately \$2 billion of existing debt as a result.

LIPA, as owner of the transmission and distribution (T&D) system located in Nassau, Suffolk and a small portion of Queens counties, is responsible for supplying electricity to customers in the service area. Under a contract starting January 1, 2014, responsibility for major operational and policy-making services for the T&D system effectively shifted from LIPA to the Public Service Enterprise Group-Long Island for a period of twelve years. Individual financial statements can be obtained by contacting LIPA at [www.lipower.org](http://www.lipower.org).

## Urban Development Corporation

The New York State Urban Development Corporation (UDC) was established by legislative act in 1968 as a corporate governmental agency of the State. UDC conducts business as Empire State Development. UDC is engaged in various activities for the State, three of which are: economic development and job creation, special projects throughout the State financed by revenue bonds and marketing of the State as a great place to do business and as a vacation destination.

UDC is the State's primary agent for economic development and works in partnership with the public and private sectors to create an environment that spurs innovation and economic development while enhancing the State's competitive advantage as the world capital for many industries, ranging from finance and media to technology and agriculture.

UDC continues its efforts to foster economic development through the State. Its mission is to promote a vigorous and growing State economy, encourage business investment and job creation, and support diverse, prosperous local economies across the State through efficient use of loans, grants, tax credits, real estate development, marketing and other forms of financial assistance. Financial assistance is provided primarily through State appropriated funds received by the UDC and State supported bonds issued by UDC which are disbursed to projects.

UDC continues to administer and manage a robust communications, marketing and tourism campaign. The campaign is committed to grow the tourism industry, create jobs, increase the number of visitors to the State and demonstrate to businesses that New York is the place to invest and grow. UDC is also the administrative agency for the NYS Film Tax Credit Program, which is designed to increase the film production and post-production industry presence in and overall economic benefits to the State. The financial statements of the UDC are available at [www.esd.ny.gov](http://www.esd.ny.gov).

## State Insurance Fund

The State Insurance Fund (SIF) is comprised of the Workers' Compensation Fund and the Disability Benefits Fund and is primarily engaged in providing workers' compensation and disability benefit insurance for employers in the State of New York.

During previous fiscal years, the SIF transferred approximately \$1.3 billion to the State's General Fund and Other Governmental Funds. The statutes authorizing these transfers required that the State appropriate amounts annually for the potential repayment of the transfers. Such repayment is required only to maintain the solvency, as defined, of the Workers' Compensation Fund. The entire receivable and equity related to these transfers were eliminated from the presentation of the SIF, resulting in a fund balance of approximately \$2.6 billion.

The SIF's financial statements are prepared in conformity with the accounting practices prescribed by the New York State Department of Financial Services, which is a comprehensive basis of accounting other than the accounting principles generally accepted in the United States of America. A complete list of departures from GAAP is disclosed in the SIF's financial statements, which may be obtained from [www3.nysif.com](http://www3.nysif.com).

## State of New York Mortgage Agency

The State of New York Mortgage Agency (SONYMA) makes mortgages available to first-time and other qualifying home buyers through its Low Interest Rate Program and other specialized home ownership programs. To accomplish this purpose, SONYMA issues tax-exempt and taxable mortgage revenue bonds for direct issuance of forward commitments for new mortgage loans through participating financial institutions. SONYMA also provides mortgage insurance for qualifying real property loans through its Mortgage Insurance Program. By statute, all costs of providing mortgage insurance are recovered from a State mortgage recording tax surcharge, which is a dedicated tax revenue stream received directly by SONYMA. In April 2009, SONYMA's statutory authority to purchase education loans was updated and expanded in order to permit the Agency to work with the New York State Higher Education Services Corporation in developing a new program to offer education loans to eligible students attending colleges and universities in New York State. Financial statements can be obtained by contacting SONYMA at [www.nyshcr.org](http://www.nyshcr.org).

## Environmental Facilities Corporation

The New York State Environmental Facilities Corporation (EFC) is a public benefit corporation, formed pursuant to the New York State Environmental Facilities Corporation Act. The mission of EFC is to provide low-cost capital and expert technical assistance for environmental projects in New York State. Its purpose is to help public and private entities comply with Federal and State environmental protection and quality requirements in a cost effective manner that advances sustainable growth. EFC promotes innovative technologies and practices in all corporate programs. EFC is governed by a board of directors, which consists of seven members.

The services offered by EFC include providing low-cost capital for both water quality protection and water supply projects through the Clean Water and Drinking Water State Revolving Funds; assisting municipalities, businesses, and State agencies to understand and comply with environmental laws and regulations through the Technical Advisory Services Program, including protecting the New York City Watershed; and providing low-cost capital and other financial assistance to New York

businesses for environmental protection projects through the Industrial Finance program. The complete audited financial statements and related notes as well as additional information regarding EFC can be obtained by visiting EFC at [www.efc.ny.gov](http://www.efc.ny.gov).

## Note 15 Joint Ventures

A joint venture is an entity that results from a contractual arrangement and that is owned, operated, or governed by two or more participants as a separate and specific activity subject to joint control, in which the participants retain an ongoing financial interest or an ongoing financial responsibility. The only material joint venture in which the State has an interest is the Port Authority of New York and New Jersey (Port Authority).

The Port Authority is a municipal corporate instrumentality of the States of New York and New Jersey created by compact between the two states in 1921 with the consent of the Congress of the United States. The Port Authority is authorized and directed to plan, develop, and operate terminals and other facilities of transportation and commerce, and to advance projects in the general fields of transportation, economic development, and world trade that contribute to promoting and protecting the commerce and economy of the port district, defined in the compact, which comprises an area of about 1,500 square miles in both states, centering around New York Harbor.

The Governor of each state appoints six of the twelve members of the governing Board of Commissioners, subject to confirmation by the respective state senate. Governors have from time to time exercised their statutory power to veto the actions of the commissioners from their states.

The commissioners serve six-year overlapping terms as public officials without compensation. They establish Port Authority policy, appoint an Executive Director to implement it, and appoint a General Counsel to act as legal advisor to the Board and to the Executive Director.

The compact envisions the Port Authority as being financially self-sustaining and, as such, it must obtain the funds necessary for the construction or acquisition of facilities upon the basis of its own credit. The Port Authority has neither the power to pledge the credit of either state or any municipality nor to levy taxes or assessments.

## Eliminations

Eliminations are made primarily to avoid duplicate reporting. As explained in Note 7, the State services a significant portion of the bonds and notes payable of certain Corporations.

The liabilities of the Port Authority include \$19.7 billion of consolidated bonds. Consolidated bonds and notes are equally and ratably secured by a pledge of the net revenues of all existing facilities and any additional facilities which may be financed in whole or in part through the medium of consolidated bonds and notes.

The Port Authority's Comprehensive Annual Financial Report is available from the Marketing and Comptroller's Departments of the Port Authority of New York and New Jersey, 4 World Trade Center, 150 Greenwich Street—23rd Floor, New York, NY 10007, or the Port Authority website at [www.panynj.gov](http://www.panynj.gov).

Consolidated financial statements of the Port Authority for the fiscal year ended December 31, 2014 disclosed the following (amounts in millions):

<b>Financial Position</b>	
Total assets .....	\$ 41,594
Total deferred outflows of resources .....	109
Total liabilities .....	(26,921)
Total deferred inflows of resources .....	(7)
<b>Net position .....</b>	<b>\$ 14,775</b>
<b>Operating Results</b>	
Operating revenues .....	\$ 4,482
Operating expenses .....	(2,923)
Depreciation and amortization .....	(997)
Net revenue (expense) related to Superstorm Sandy .....	54
<b>Income from operations .....</b>	<b>616</b>
Passenger facility charges .....	233
Financial income (expense), net .....	(603)
Contribution in aid of construction and grants .....	801
<b>Increase in net position .....</b>	<b>\$ 1,047</b>
<b>Changes in Net Position</b>	
Balance at January 1, 2014 .....	\$ 13,728
Increase in net position .....	1,047
<b>Balance at December 31, 2014 .....</b>	<b>\$ 14,775</b>

## Note 16 Subsequent Events

### Financing Arrangements Issued

The Statement of Net Position presents bonds and other financing arrangements and collateralized borrowings outstanding as of the statement date, which is March 31, 2015 except for business-type activities

related to SUNY and CUNY Enterprise Funds reported as of June 30, 2014. Subsequent to those dates, the following bonds and other financing arrangements and collateralized borrowings were issued (amounts in millions):

#### BONDS AND OTHER FINANCING ARRANGEMENTS ISSUED SUBSEQUENT TO DATE OF THE STATEMENT OF NET POSITION

<u>Issuer</u>	<u>Purpose</u>	<u>Date</u>	<u>Series</u>	<u>Par Amount</u>
Dormitory Authority	CUNY Senior Colleges	10/23/2014	Sales Tax, Series 2014A	\$ 275
Dormitory Authority	SUNY Educational Facilities	10/23/2014	Sales Tax, Series 2014A	\$ 127
Dormitory Authority	CUNY Senior Colleges, Refunding	1/14/2015	Personal Income Tax, Series 2015A	\$ 234
Dormitory Authority	SUNY Educational Facilities, Refunding	1/14/2015	Personal Income Tax, Series 2015A	\$ 392
Dormitory Authority	General Purposes	6/19/2015	Personal Income Tax, Series 2015B	\$1,044
Dormitory Authority	General Purposes	6/19/2015	Personal Income Tax, Series 2015C	\$ 30
Dormitory Authority	General Purposes	6/19/2015	Personal Income Tax, Series 2015D	\$ 97

#### COLLATERALIZED BORROWINGS SUBSEQUENT TO DATE OF THE STATEMENT OF NET POSITION

<u>Issuer</u>	<u>Purpose</u>	<u>Date</u>	<u>Series</u>	<u>Par Amount</u>
Dormitory Authority	SUNY Dormitory Facilities, Refunding	5/12/2015	Revenue Bonds, Series 2015A	\$ 269

# Budgetary Basis—Financial Plan and Actual— Combined Schedule of Cash Receipts and Disbursements

## MAJOR FUNDS—GENERAL FUND AND FEDERAL SPECIAL REVENUE FUND

Year Ended March 31, 2015

(Amounts in millions) (Unaudited)

	<b>General</b>			
	<b>Financial Plan Amounts</b>		<b>Actual (Budgetary Basis)</b>	<b>Variance with Final Budget</b>
	<b>Original</b>	<b>Final</b>		
<b>RECEIPTS:</b>				
Taxes .....	\$ 42,659	\$ 42,950	\$ 43,568	\$ 618
Miscellaneous .....	3,815	8,874	8,410	(464)
Federal grants .....	—	2	2	—
<b>Total receipts</b> .....	<b>46,474</b>	<b>51,826</b>	<b>51,980</b>	<b>154</b>
<b>DISBURSEMENTS:</b>				
Local assistance grants .....	42,118	41,986	41,592	394
State operations .....	7,850	7,872	7,664	208
General State charges <sup>(1)</sup> .....	5,072	4,977	4,999	(22)
<b>Total disbursements<sup>(1)</sup></b> .....	<b>55,040</b>	<b>54,835</b>	<b>54,255</b>	<b>580</b>
<b>Excess (deficiency) of receipts over disbursements</b> .....	<b>(8,566)</b>	<b>(3,009)</b>	<b>(2,275)</b>	<b>734</b>
<b>OTHER FINANCING SOURCES (USES):</b>				
Transfers from other funds .....	16,488	16,888	15,940	(948)
Transfers to other funds .....	(8,102)	(8,346)	(8,601)	(255)
<b>Net other financing sources (uses)</b> .....	<b>8,386</b>	<b>8,542</b>	<b>7,339</b>	<b>(1,203)</b>
<b>Excess (deficiency) of receipts and other financing sources over disbursements and other financing uses</b> .....	<b>\$ (180)</b>	<b>\$ 5,533</b>	<b>\$ 5,064</b>	<b>\$ (469)</b>

Note:

(1) Spending authority has not been exceeded by \$22 million in the General Fund and \$1,285 million in the Federal Special Revenue Fund. The Executive Budget Financial Plan (published approximately five weeks before fiscal year-end) does not reflect an increase in spending authority of \$1,309 million approved for State operations through March 31, 2015.

See notes to required supplementary information.

See independent auditors' report.

### Federal Special Revenue

## NOTES TO BUDGETARY BASIS REPORTING

*(unaudited)*

### Budgetary Basis Reporting

The State Constitution requires the Governor to submit annually an Executive Budget, which contains plans for all funds of expenditures and disbursements for the ensuing fiscal year, as well as all monies and revenues estimated to be available. Bills containing all recommended appropriations or reappropriations and any proposed legislation necessary to provide monies and revenues sufficient to meet such proposed expenditures and disbursements accompany the Executive Budget. Reappropriations are commonly used for federally funded programs and capital projects, where the funding amount is intended to support activities that may span several fiscal years. Budgets are prepared and enacted for all funds. Included in the proposed appropriation bills is a provision for spending authority for unanticipated revenues or unforeseen emergencies in accordance with statutory requirements. The Executive Budget also includes a cash basis financial plan that must be in balance, i.e., disbursements must not exceed available receipts.

The Legislature enacts appropriation bills and revenue measures containing those parts of the Executive Budget it has approved or modified. The Legislature may also enact supplemental appropriation or special appropriation bills after it completes action on the Executive Budget. Further, when the Legislature convenes in January, it may enact deficiency appropriations to meet actual or anticipated obligations not foreseen when the annual budget and any supplemental budgets were enacted and for which the costs would exceed available spending authorizations. It might add to a previously authorized appropriation anticipated to be inadequate, or provide a new appropriation to finance an existing or anticipated liability for which no appropriation exists. A deficiency appropriation usually applies to the fiscal year during which it is made. Pursuant to State law, once the Legislature has completed action on the appropriation and revenue bills and they are approved by the Governor, the cash basis and the GAAP basis financial plans must be revised by the Governor to reflect the impact resulting from changes in appropriations and revenue bills. The cash basis financial plan, which serves as the basis for the administration of the State's finances during the fiscal year, provides a summary of projected receipts, disbursements and fiscal year-end balances. Such plans are updated quarterly throughout

the fiscal year by the Governor, and include a comparison of the actual year-to-date results with the latest revised plans, providing an explanation of any major deviations and any significant changes to the financial plans. Projected disbursements are based on agency staffing levels, program caseloads, levels of service needs, formulas contained in State and Federal law, inflation and other factors. All projections account for the timing of payments, since not all the amounts appropriated in the Budget are disbursed in the same fiscal year.

The Statewide Financial System includes controls over expenditures to ensure that the maximum spending authority is not exceeded during the life of the appropriation. Expenditures are controlled at the major account level within each program or project of each State agency in accordance with the underlying appropriation purpose. Encumbrances are not considered a disbursement in the financial plan or an expenditure and expense in the basic financial statements. Generally, appropriations are available for liabilities incurred during the fiscal year. Following the end of the fiscal year, a 'lapse period' is provided to liquidate prior year liabilities. Unless reappropriated, most State operations appropriations cease on June 30th and local assistance, debt service, capital projects and federal fund appropriations cease on September 15th following the end of the fiscal year. Disbursements made during the lapse period from prior year appropriations are included, together with disbursements from new year appropriations, in the subsequent fiscal year financial plan. Many appropriations enacted are not intended to be used, although required by law. These types of appropriations will generally cause total appropriation authorizations to exceed cash basis financial plan disbursement amounts. Actual disbursements for certain spending categories may exceed financial plan estimates (as reported in the Budgetary Basis—Financial Plan and Actual—Combined Schedule of Cash Receipts and Disbursements) but do not exceed total enacted appropriations authority. Most capital projects, Federal funds and many State operations appropriations are reappropriated each year by the Legislature and therefore the life of such appropriations may be many years. If the budget is not enacted by April 1st, the legislature enacts special emergency appropriations to continue government functions, as was last done in April 2010.

The following presents a reconciliation of the budgetary cash basis operating results as shown in the preceding Budgetary Basis—Financial Plan and Actual Combined Schedule of Cash Receipts and Disbursements

(Schedule) with the GAAP-basis operating results reported in the Statement of Revenues, Expenditures and Changes in Fund Balances (Deficits)—Governmental Funds (Statement) (amounts in millions):

	<u>General</u>	<u>Federal Special Revenue</u>
Receipts and other financing sources over / (under) disbursements and other financing uses per Schedule .....	\$ 5,064	\$ 315
Entity differences:		
Receipts and other financing sources over / (under) disbursements and other financing uses for funds and accounts not included in the cash basis financial plan .....	(1,286)	(19)
Perspective differences:		
Receipts and other financing sources over disbursements and other financing uses for funds treated as Special Revenue Funds in the financial plan and part of the General Fund for GAAP reporting .....	(46)	—
Temporary interfund cash loans .....	(280)	(9)
Basis of accounting differences:		
Revenue accrual adjustments .....	4,217	(1,037)
Expenditure accrual adjustments .....	(1,050)	753
<b>Net Change in Fund Balances</b> .....	<u>\$ 6,619</u>	<u>\$ 3</u>

The entity differences relate to the inclusion of certain funds considered to be Proprietary Funds for purposes of the cash basis financial plan. Perspective differences relate to variations in the presentation of the cash basis financial plan fund structure versus GAAP fund structure. A perspective difference for temporary interfund loans occurs when a fund temporarily overdraws its share of the pooled investment funds.

These temporary loans are covered by the General Fund's share of the pool. A perspective difference relating to the Infrastructure Trust Fund and Miscellaneous Special Revenue Accounts occurs because these funds are included in the Special Revenue Funds cash basis financial plan while the GAAP basis presentation includes them in the General Fund.

## INFRASTRUCTURE ASSETS USING THE MODIFIED APPROACH (*unaudited*)

In accordance with GAAP, the State has adopted an alternative method for recording depreciation expense for the State's network of roads and bridges maintained by the Department of Transportation. Under this method, referred to as the modified approach, the State will not report depreciation expense for roads and bridges but will capitalize all costs that add to the capacity and efficiency of State owned roads and bridges. Generally, all maintenance and preservation costs will be expensed and not capitalized.

In order to adopt the modified approach, the State is required to meet the following criteria:

1. Maintain an asset management system that includes a current inventory of eligible infrastructure assets.
2. Conduct condition assessments of eligible assets and summarize the results using a measurement scale.
3. Estimate each year the annual amount necessary to maintain and preserve the eligible assets at the condition level established and disclosed by the State.
4. Document that the assets are being preserved approximately at, or above, the established condition level.

### Roads

The State Department of Transportation maintains the Pavement Management System (PMS) which supports a construction program that preserves the State's investment in its roads. The PMS contains locational, operational and historical condition data. The PMS is used to determine the appropriate program for improving the asset condition and to determine future funding levels necessary to meet condition goals. The overall goal is for the State to provide a management system for the State's infrastructure assets in order to provide long-term benefits to the State's citizens.

The State annually conducts an assessment of the pavement condition of the State's road network. Trained technicians rate the condition of the pavement based on surface condition and dominant distress (e.g., cracking, faulting) using a scale of 1 (very poor) to 10 (excellent) based on the prevalence of a surface-related pavement distress. A pavement condition rating (PCR) is assigned to each surface section. The State currently has 42,739 lane miles of roads.

It is the State's intention to maintain the roads at an average PCR between 6.7 and 7.2.

### Bridges

The State Department of Transportation maintains the Bridge Management System (BMS) which supports a construction program that preserves the State's investment in its bridges. The BMS is used in planning construction programs and estimating construction costs. The overall goal is for the State to provide a management system for the State's infrastructure assets in order to provide long-term benefits to the State's citizens.

The State conducts biennial inspections of all bridges in the State. The State uses a numerical inspection condition rating scale ranging from 1 (minimum) to 7 (maximum). During each general inspection, various components or elements of each bridge span are rated by the inspector as to the extent of deterioration, as well as the component's ability to function structurally relative to when it was newly designed and constructed. The element rating values are combined using a weighted average formula to compute an overall bridge condition rating value for each bridge. A rating of 6 to 7 is excellent, which indicates that no repairs are necessary. A rating of 3 to 5 is fair to good, which indicates that minor repairs are required. A rating of 1 to 2 is deficient, which indicates major repairs or replacement are necessary. The State has approximately 7,902 bridges.

It is the State's intention to maintain the bridges at an average condition rating level between 5.3 and 5.6.

### Pavement and Bridge Condition Summary as of December 31:

Year	Pavement Average Surface Rating	Bridges Average Condition Rating
2014 .....	6.99	5.32
2013 .....	6.99	5.34
2012 .....	6.98	5.34
2011 .....	6.87	5.35
2010 .....	6.84	5.37
2009 .....	6.91	5.38
2008 .....	6.93	5.39
2007 .....	6.86	5.41
2006 .....	6.90	5.42
2005 .....	6.81	5.43

### Comparison of Estimated-to-Actual Maintenance/Preservation Costs

Preservation of the roads and bridges is accomplished through construction programs managed by the PMS and BMS. The following presents the State's estimate of costs necessary to preserve and maintain the network of roads and bridges at, or above, the established condition level, compared to the actual costs incurred during fiscal year 2014-2015 (amounts in millions):

#### Actual Preservation/Maintenance Costs as of March 31:

(Amounts in millions)

	2015	2014	2013	2012	2011
Total roads .....	\$ 1,256	\$ 1,069	\$ 1,131	\$ 930	\$ 944
Total bridges .....	289	255	201	281	241
<b>Total .....</b>	<b>\$ 1,545</b>	<b>\$ 1,324</b>	<b>\$ 1,332</b>	<b>\$ 1,211</b>	<b>\$ 1,185</b>

#### Estimated Preservation/Maintenance Costs as of March 31:

(Amounts in millions)

	2015	2014	2013	2012	2011
Total roads .....	\$ 836	\$ 764	\$ 727	\$ 712	\$ 905
Total bridges .....	345	228	146	184	256
<b>Total .....</b>	<b>\$ 1,181</b>	<b>\$ 992</b>	<b>\$ 873</b>	<b>\$ 896</b>	<b>\$ 1,161</b>

See independent auditors' report.

# Other Supplementary Information

---

# *General Fund*

The General Fund is the most significant of the State's funds. Most tax revenues and certain miscellaneous revenues are recorded in the General Fund.

The General Fund is divided into several accounts. Expenditures in the form of aid to local governments for their general purposes (e.g., State-local revenue sharing) and to school districts and municipalities for certain specific purposes (e.g., education and social services) are made from the Local Assistance account. These payments, often based on specific legislated formulas, are nevertheless limited under the State Constitution to appropriations in force. Expenditures from the Local Assistance account normally comprise approximately 60 percent of General Fund expenditures.

The expenditures of operating the departments of the Executive Branch, the Legislature and the Judiciary, as well as expenditures for general state charges such as contributions to employee retirement systems, are paid primarily from the State Purposes account and normally comprise approximately 40 percent of the General Fund expenditures.

# *Federal Special Revenue Fund*

The Federal Special Revenue Fund is a major fund that accounts for most federal revenues and expenditures.

The Federal Special Revenue Fund is divided into several accounts. The Fund accounts for federal grants received by the State that are earmarked for specific programs. The need to satisfy federal accounting and reporting requirements dictates that federal grants be accounted for in a number of separate accounts. These accounts include the Federal USDA—Food and Nutrition Services Account, the Federal Health and Human Services Account, the Federal Education Account, the Federal Operating Grants Account, the Unemployment Insurance Administration Account, the Federal Unemployment Insurance Occupational Training Account, and the Federal Employment and Training Grants Account.

# *Special Revenue Funds*

Special Revenue Funds are used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specific purposes.

**School Tax Relief Fund (STAR)**—to reimburse school districts for the property tax exemptions for homeowners.

**Health Care Reform Act Resources**—to account for health care initiatives financed with hospital assessments, surcharges, proceeds from the sale of public assets and cigarette tax receipts.

**Dedicated Mass Transportation Trust Fund**—to account for monies that are earmarked for mass transportation purposes.

**ENCON Special Revenue**—to account for various fees, fines and penalties earmarked for environmental monitoring activities, conservation and efficiency projects and other environmental maintenance and regulation purposes.

**Conservation Fund**—to account for hunting and fishing license fees and related fines and penalties that are dedicated to fish and wildlife programs.

**Environmental Protection and Spill Compensation Fund**—to account for license fees and penalties that are earmarked for oil spill clean-up costs and claims for damages.

**Mass Transportation Operating Assistance**—to account for various taxes earmarked for public mass transportation operating assistance programs.

**MTA Financial Assistance Fund**—to account for taxes and fees imposed in the Metropolitan Commuter Transportation District dedicated for Metropolitan Transportation Authority operating and capital needs.

**Miscellaneous**—to account for various fees, fines, user charges and other miscellaneous revenues that are earmarked for specific State programs.

# *Debt Service Funds*

Debt Service Funds are used to account for the accumulation of resources for and the payment of principal and interest on general long-term obligations and payments on certain lease/purchase or other contractual obligations.

**Mental Health Services Fund**—to account for the payment of debt service in conjunction with agreements for financing mental hygiene facilities.

**State Housing Debt Fund**—to account for the repayment of State advances made to local governments and certain public authorities that are earmarked for paying the principal and interest on State housing bonds.

**Department of Health Income Fund**—to account for the payment of debt service in conjunction with agreements with the Dormitory Authority for financing health facilities.

**Clean Water/Clean Air Fund**—to account for taxes earmarked for reimbursing the General Debt Service Fund for the payment of debt service on the Clean Water/Clean Air bonds.

**Local Government Assistance Tax Fund**—to account for revenues that are earmarked for payment to the New York Local Government Assistance Corporation for debt service.

# *Capital Projects Funds*

Capital Projects Funds are used to account for the financial resources used for the acquisition or construction of major State-owned capital facilities and for capital assistance grants to local governments and public authorities.

**State Capital Projects Fund**—to account for the construction or acquisition of State capital assets and the payments to local governments and public authorities for capital assistance financed primarily by transfers from the General Fund, bond funds and proceeds from various financial arrangements.

**Dedicated Highway and Bridge Trust Fund**—to account for taxes and fees that are earmarked for financing State, county, town, and village highway, parkway, bridge, aviation or port facility capital projects.

**Environmental Protection Fund**—to account for dedicated revenues that will be used to assist local governments, not-for-profit corporations, and fund State initiatives to protect the environment and protect open space.

**Bond Funds**—to account for the proceeds of bonds issued for capital purposes. A separate bond fund is established to account for the bond proceeds of each bond issue authorized by public referendum, including the Energy Conservation Through Improved Transportation Bond Fund, the Pure Waters Bond Fund, the Transportation Capital Facilities Bond Fund, the Environmental Quality Protection Bond Fund, the Rail Preservation and Development Bond Fund, the Rebuild and Renew New York Transportation Bond Fund, the Environmental Quality Bond Act Fund and the Clean Water/Clean Air Bond Fund.

**Hazardous Waste Remedial Fund**—to account for revenues earmarked for the clean-up of hazardous waste disposal sites.

**Federal Capital Projects Fund**—to account for capital projects financed from federal grants.

**Housing Program Fund**—to account for the Low Income Housing Trust Fund Program and the Affordable Home Ownership Development Program that are financed by the New York State Housing Finance Agency.

**Mental Hygiene Facilities Capital Improvement Fund**—to account for mental hygiene capital projects.

**Correctional Facilities Capital Improvement Fund**—to account for correctional facility capital projects financed by the Urban Development Corporation.

**Miscellaneous**—to account for various capital projects financed from the sale of land or other resources, gifts, grants or other miscellaneous revenue sources earmarked for capital purposes or from transfers from the New York State Infrastructure Trust Account.

# *Fiduciary Funds*

Fiduciary Funds are used to account for assets held by the State in a fiduciary capacity or as agent for individuals, private organizations or other governments and include Private Purpose Trust Funds, the State and Local Retirement System Fund and Agency Funds.

## **Private Purpose Trust Funds:**

**Agriculture and Milk Producers' Security Funds**—to provide security to agriculture and milk producers against loss of revenues.

**Abandoned Property Fund**—accounts for assets from banks, utilities, investment companies, and insurance companies representing inactive accounts that are required by law to be turned over to the State. The Comptroller is custodian of this account. Assets are returned to the proper owner upon approval of a claim.

**Tuition Savings Program Fund**—accounts for contributions made by individuals and families for college savings. The withdrawals from the Fund are used to pay college costs at any eligible public and private college and university in New York State.

## **Agency Funds:**

**Employee Benefit and Payroll Related Funds**—account for various employee benefit programs, such as the New York State employee health insurance programs, for the disposition of various payroll related deductions, such as for social security contributions.

**MMIS Statewide Escrow Fund**—accounts for the transfer from other funds of the Federal, State, and local shares of Medicaid program expenditures to a paying agent for ultimate payment to health care providers.

**Other Agency Funds**—account for various escrow, revenue collection and agency accounts for which the State acts in an agent's capacity until proper disposition of the assets can be made. This includes accounting for advances from the State for paying CUNY operating costs.

# *Non-Major Component Units*

The non-major component units listed are significant separate legal entities that are discretely presented in the State's financial statements. The inclusion of component units in the State's financial statements reflects the State's financial accountability for these entities.

**Health Research Incorporated**—administers gifts and grants in keeping with the research, prevention and treatment purposes of the New York State Department of Health and the Roswell Park Cancer Institute Corporation.

**Housing Trust Fund Corporation**—administers significant Federal and State low income housing programs.

**Hugh L. Carey Battery Park City Authority**—engages in the improvement of the Battery Park City Project Area (a 92-acre site on the lower west side of Manhattan); the creation in the area of a mixed commercial and residential community; and the making of loans secured by first mortgages to housing companies organized to provide housing within the project area.

**Municipal Bond Bank Agency**—provides access to the capital markets for special programs and purposes that benefit the State of New York and its municipalities.

**New York State Energy Research and Development Authority**—conducts and finances a multifaceted energy and environmental research and development program; promotes energy efficiency measures; manages the Western New York Nuclear Service Center at West Valley; and coordinates the State's activities on nuclear energy matters.

**New York State Higher Education Services Corporation**—administers the State's Guaranteed Student Loan Programs.

**Niagara Frontier Transportation Authority**—promotes the development and improvement of transportation and related services within the Niagara Frontier Transportation District, and operates a number of transportation related business centers including aviation, surface transportation and property management.

**Roswell Park Cancer Institute Corporation**—as a public hospital and medical research center, provides total care to cancer patients, conducts research into the causes, treatment and prevention of cancer, and educates those who treat and study cancer.

**SUNY Foundations**—include campus-related foundations and student housing corporations reported as an aggregate discretely presented component unit in the State University of New York financial statements. The campus-related foundations are responsible for the fiscal administration of revenues and support received for the promotion, development and advancement of the welfare of the campuses. The student housing corporations operate and administer certain housing and related services for students.

**CUNY Foundations**—include fifteen campus-related foundations reported as discretely presented component units in the City University of New York Senior Colleges' financial statements. These foundations support both academic and general needs of the colleges and their students.

**Miscellaneous**—aggregation of 22 other non-major component units listed in Note 14.

# Statistical Section

---

*This part of the State's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the State's overall financial health.*

## Contents

### **Financial Trends**

These schedules contain trend information to help the reader understand how the State's financial performance and well-being have changed over time.

### **Revenue Capacity**

These schedules contain information to help the reader assess the State's most significant revenue source, the personal income tax.

### **Debt Capacity**

These schedules present information to help the reader assess the affordability of the State's current levels of outstanding debt and the State's ability to issue additional debt in the future.

### **Demographic and Economic Information**

These schedules offer demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.

### **Operating Information**

These schedules contain service and infrastructure data to help the reader understand how the information in the State's financial report relates to the services the State provides and the activities it performs.

***Sources:** Unless otherwise noted, the information in these schedules is derived from the Comprehensive Annual Financial Reports for the relevant years.*

### Notes:

Deviations between personal income and earnings by industry are due to dividends, interest, rent, personal current transfer receipts, employer contributions for government social insurance, employee and self-employed contributions for government social insurance, and adjustments for residence.

Calendar year 2014 data is estimated. For more information, please see [www.bea.gov](http://www.bea.gov).

Source: Office of the State Comptroller

Notes:

#### New York Local Government Assistance Corporation Bonds

(a) An amount equal to one-cent of the State's sales tax, less refunds to taxpayers, is to be deposited in the Local Government Assistance Tax Fund. The monies of such Fund are reserved for payment to the New York Local Assistance Corporation to enable it to meet principal and interest on its bonds. Monies in the Local Government Assistance Tax Fund in excess of debt service requirements and administrative expenses of the New York Local Government Assistance Corporation are required to be transferred to the General Fund.

#### New York State Personal Income Tax Revenue Bonds

(b) 25 percent of New York State Personal Income Tax Receipts less refunds to taxpayers, is to be deposited in the Revenue Bond Tax Fund. The monies of such Fund are reserved for payment of debt service on Personal Income Tax Revenue Bonds, since the enabling act originally has been in effect, beginning in the 2003-2004 fiscal year. Monies in the Revenue Bond Tax Fund in excess of debt service requirements are required to be transferred to the General Fund.
