

# Workflow Builder

Persistent's Workflow Builder application enables business users to create a fully functional Appian application, complete with tasks, reports and records, with absolute zero coding.

The application helps business users (with no Appian development skills) to design a complete Appian application using Tempo.

The application can be rolled out to users and all instances can be tracked and reported on.

Task deadlines, default task groups and task sequencing are supported.

## Workflow Builder

The application enables users with no Appian development skills to design and roll-out fully functional prototypes and applications.

### Create Complete Appian Workflow

Application builder provides the ease and flexibility to design an application workflow with forms, from Tempo.

### Build Prototypes Quickly

Sequence tasks, and create fully functional prototypes of workflows. Records and reports generated with zero effort.

### Very Powerful Form Builder

Design fully functional SAIL forms with just clicks. Ability to display content of previous forms in subsequent tasks. Conditional display of SAIL fields

### Maintain Versions

Track and monitor multiple versions of a form and maintain the changes for future reference.

### Download SAIL Code

The complete application's SAIL code can be downloaded —a terrific starting point for developers.

### Roll-Out the Application

Applications built with the application builder can be rolled out—complete with records and reports!

## About Persistent

Persistent Systems (BSE & NSE: PERSISTENT) builds software that drives our customers' business; enterprises and software product companies with software at the core of their digital transformation.
