## REROOFING/ REPLACEMENT

We specialize in commercial and industrial roof systems. We offer complete retrofit roof system that easily and affordably transforms any old or falling roof into a new, sophisticated and energy efficient sloped metal roof.

Depending on your needs, we provide every element required for a retrofit, including structural framing, sub framing and your new metal roof

- Asbestos sheet replacement
- Replacement of damaged metal sheets
- BOQ generation. Assistance in material selection
- Materials- PPGI- AM/NS, PPGL- JSW; TATA BSL, Aluminum sheets- HINDALCO

## ROOF ENHANCEMENT

- Supply & erection of Polycarbonate Sheets, FRP sheets
- Replacement of wind turbines
- Addition of Louvers, Canopy to existing building

## ADDITION OF MEZZANINE FLOOR

We can design, manufacture & supply mezzanine floor to help you add new space in your existing set up. Build up sections, Deck sheets, Fiber cement boards can be used to create that extra space.

## ROOF INSULATION

We can add Reflective Insulation (Bubble Insulation) to your existing roof resists all three types of heat transfer. Reduced energy bills, reduced carbon emissions, reduced condensation, sound proofing and optimal temperature are some of the advantages when you go for roof insulation.

## PRE MONSOON ROOF CHECK UP

We can do survey of your existing roof to see possible leaky areas. We can Add / Replace / Clean existing accessories such as gutters, downtake pipes, corners, ridge, flashings to give you leak proof roof before Monsoon so you never lose your company productivity.
