Care instructions

# Universal tips

## General maintenance

To ensure that you enjoy your vetsak covers for a long time, we recommend that you strictly follow our care instructions in this manual.

One of the best ways to keep our fabrics looking good is to brush off dirt before it becomes embedded in the fabric and wipe up or clean spills soon after one occurs. The quicker you clean spills, the easier they will be to remove. Avoid scrubbing, hard bristle brushes or any other abrasive cleaning method.

Please note:

Sunlight and artificial light fade our leather and indoor covers over time. We recommend avoiding exposure to direct sunlight and bright halogen light at close distances. Too much heat will also damage your upholstery. Make sure you keep sufficient distance from heat sources.

## Outdoor maintenance

Rain or sunshine, our outdoor collection will welcome you outdoors. We recommend that you follow our guidelines in order to help maintain the high-quality, luxury finish and weather-resistance comfort of your furniture all year long.

Linen, Canvas (waterproof) and Knit (waterresistant) guarantee an extremely high resistance to water, frost, heat, mould and mildew. Nevertheless, in winter or during longer absences you should store your products in a dry, unheated and well-ventilated room and never use non-breathable plastic covers. Before storing, we recommend that you clean each piece well and then place protection over your furniture.

While your Linen and Canvas sofa can take the occasional heavy downpour, it's better to keep your beanbag and your Knit sofa in a dry place in case of heavy rain or persistent dampness. Water accumulation in the seat and a permanently wet base should be avoided.

## First aid for spills

- Blot (don't rub) liquid spills with a clean, dry cloth.
- Spray on a mild solution of soap and water.
- Rinse the fabric (not leather!) thoroughly to remove all soap residue and air dry.

It's best to clean the entire surface area of the fabric, from seam to seam, instead of rubbing the fabric in a circular motion on the spill. This method, along with an extractor, may be required in order to avoid water rings and residue.

## 5 years warranty

Our 5-year limited warranty guarantees that products will not become unusable when used in normal and appropriate conditions. This warranty does not cover normal care and cleaning, damage from misuse or abuse, improper installation, or costs associated with replacement of the fabric, including labour and installation.

## Velvet Cord Velours

### Cleaning

#### Hand wash

Apply a light mist of mild soap and water using a spray bottle. Work the solution into the spill by lightly agitating the entire surface area of the fabric, moving from seam to seam, with a sponge or very soft bristle brush. Avoid scrubbing, and do not use a hard bristled brush or anything that will abrade the fabric. Rinse the entire fabric thoroughly to remove all soap residue. Air dry. Repeat rinsing and blotting until all soap residue is removed.

#### Machine wash

To wash, first turn the cover inside out and ensure the zip is closed half way. Machine wash in cold water on the delicate cycle with normal amounts of mild laundry detergent. Avoid using bleach and fabric softeners in the wash. Allow fabric to air dry.

## Flokati Faux Fur

### Cleaning

#### Hand wash

Fill your tub with cold water and mild detergent. Swish the cover in the water to create suds and soak for 15 to 30 mins. Drain the soapy water and replace it with clean water for rinsing. Afterwards place the cover on a dry towel and press to absorb the liquid without wringing. Air dry and brush.

#### Machine wash

First turn the cover inside out and ensure the zip is closed half way. Machine wash in cold water on the delicate cycle with normal amounts of mild laundry detergent. Avoid using bleach and fabric softeners in the wash and rinse cycles because they can ruin the texture. Air-dry the cover and fluff it up.

## Genuine leather

### Care

Keep at a distance from direct sunlight and heat sources. Use a dry cloth to remove dust. In the case of stains, gently clean with natural soap and water and avoid rubbing the leather. Allow the leather to completely dry before use. Do not use cleaning agents that are not recommended by the producer.

### Product of nature

All our leather products are 100% European Bovine Nubuck Leather. Natural marks such as scars, scratches, insect bites, ticks as well as colour differences are characteristics of the natural product and are unique to every leather article. A natural shiny or greasy effect may appear after some time of use which is a distinctive mark of luxury Nubuck leather.

# Canvas Knit Linen

## Cleaning

Our in- and outdoor fabrics from Sunbrella® are engineered to provide long-term performance. After repeated thorough cleanings, or years of use and exposure, you may choose to refresh your fabrics with an appropriate retreating agent. We recommend *Tex'Aktiv*. Though our fabrics can be used both outdoors and in, your cleaning methods should differ slightly indoors and out.

→ Clean your fabric using one of the cleaning methods outlined below  
 → Allow your Sunbrella fabric to air dry  
 → Use an iron only on the synthetic setting. As iron temperatures may vary, first test a small inconspicuous area before ironing the entire piece. DO NOT use a steamer or set your iron to the steam setting.

## Outdoor use

### Hand wash

Soak fabric in a solution of 1/4 cup mild soap per gallon of lukewarm water. Use a sponge or very soft bristle brush to lightly agitate the spill. Then rinse thoroughly and allow fabric to air dry.

### Machine wash

To wash, first turn the cover inside out and ensure the zip is closed half way. Machine wash in cold water on the delicate cycle with normal amounts of mild laundry detergent. For severe mold, add 1 cup of bleach. Allow fabric to air dry.

### Mold and mildew

Our Sunbrella® fabrics do not promote mildew growth, however, mildew may grow on dirt and other substances if not removed from the fabric.

To remove mold prepare a solution of 1 cup of bleach and 1/4 cup mild soap per gallon of water. Spray on entire area and allow to soak into the fabric for 15 minutes.

Clean entire surface area with a sponge or a clean towel. Rinse thoroughly to remove all soap residue. Air dry. For severe mold growth, bleach quantities may be increased. It is best to clean the entire surface area of the fabric to avoid water rings.

## Indoor use

### Hand wash

Apply a light mist of mild soap and water using a spray bottle. Work the solution into the spill by lightly agitating the entire surface area of the fabric, moving from seam to seam, with a sponge or very soft bristle brush. Avoid scrubbing, and do not use a hard bristled brush or anything that will abrade the fabric. Rinse the entire fabric thoroughly to remove all soap residue. Blot excess moisture with a clean, soft towel or sponge. Blot or wet-vacuum excess water from the entire surface area of the fabric, moving from seam to seam. Air dry. Repeat rinsing and blotting until all soap residue is removed.

### Machine wash

To wash, first turn the cover inside out and ensure the zip is closed half way. Machine wash in cold water on the delicate cycle with normal amounts of mild laundry detergent. Allow fabric to air dry.

### Oil-based spills

Immediately apply an absorbent such as corn starch directly on the oil-based spill. Let sit for 10 minutes and remove the excess using a straight edge or ruler. This helps remove the spill and prevents it from being pressed into the fabric. Then proceed with the cleaning process.

# Fabric overview

## Leather new

Indoor use only

stone LE09	beige LE16	brown LE21	dark grey LE04	light grey LE02	olive LE19
---------------	---------------	---------------	-------------------	--------------------	---------------

**SPECS**  
 Colour fastness 3\*  
 ☒ Do not wash!  
 Damp wipe only!
