SOFTSERVE'S APPLICATION MODERNIZATION PLATFORM (SAMP)

ACCELERATE BUILDING SELF-SERVICE PLATFORMS

While application teams are meant to quickly deliver value for end users, issues like handling cloud environments and security compliance serve to slow them down. The emerging solution, called platform engineering, combines DevOps and business agility.

By "building workflows, toolchains, platforms, and documentation," platform engineering supports application teams to better deliver business value. Enabling developers with self-service options leads to faster product development, deployment, and time-to-market. Being able to seamlessly automate and scale environments reduces complexity, decreases duplicate efforts, and alleviates the burden of managing underlying infrastructure.

With the right platform engineering process in place, developers can focus on creatively solving larger issues and ultimately increasing your ROI.

TRANSITION TO PLATFORM ENGINEERING WITH SAMP

SoftServe's Application Modernization Platform (SAMP) delivers a scalable, secure, and customizable platform as a service (PaaS). Ready to plug into any CI/CD process, SAMP provides your application teams the foundation for faster delivery, optimized operations, and lower costs.

For over 30 years, software companies and enterprises have relied on SoftServe as a global IT leader. With expertise gained from the highest-level partnerships with **AWS**, **Google Cloud**, and **Microsoft Azure**, our experts know how to navigate between Amazon ECS, EKS, and Lambda, Google Kubernetes Engine, and Azure Kubernetes Service to build out SAMP's core components.

Ultimately, this multicloud platform enables your team to leverage repeatable, reusable solutions company-wide, seamlessly run and scale workloads, and dramatically reduce deployment times.

BUSINESS BENEFITS

Less than 20
minutes to deploy —
easy and fast

Up to 5X
reduced time-to-market for
new features and services

UP TO 30%
lower cloud
infrastructure costs

WITH SAMP, YOU WILL BE ABLE TO

KEEP BUILDING
Focus on your product instead
of the platform by eliminating long
onboarding periods and the hassle
of prolonged setup.

GET TO MARKET SOONER
Differentiate yourself faster and reduce
your time-to-market for new services
and features.

BE CONFIDENTLY SECURE
Built-in security features align with
global standards, so you know your
company data is protected.

INCREASE ROI AND LOWER COSTS
With better cost controls implemented,
you can ensure optimal price-
performance and workload ratio.

GROW GLOBALLY
Provide your services worldwide
with a unified approach to logging,
metrics, secrets management,
storage, and more.

ADAPT AS DEMAND CHANGES
Scale automatically when demand
increases, maximizing resource usage
with microservices architecture and
containerization.

**ACCELERATE AND MODIFY
MORE EASILY**
Customize the modular structure and
interchangeable components to meet
specific business needs.

BOOST EFFICIENCY
Standardized workflows and
applications across the enterprise
reduce complexity and streamline
processes.

Embrace a future where innovation meets efficiency with **SoftServe's App
Modernization Platform (SAMP)**. Invest in a solution that not only meets today's
demands but scales for tomorrow's success.
