Custom-made
Instruments

Working in close partnership with our customers, we manufacture innovative and bespoke instrumentation.

We have over 50 years of knowledge and experience in our workshop. Our team of highly skilled technicians undertake a minimum apprenticeship of 5 years and are trained to manufacture instruments, rather than just repair them. This gives us 360 degree understanding of the challenge and the importance of correctly functioning medical devices.

We care immensely about the work we do, never forgetting that instruments we create and repair are responsible for saving lives.

We insist on controlling the quality of every item we manufacture, from the materials used to the rigorous procedures we apply to testing. Our range of supporting products are serviced and repaired in-house, ensuring we are always able to exceed our customers' expectations.

Customers can receive training, participate in factory visits or simply call their local representative for guidance with instrumentation or management.

Skill-sharing has been at the heart of our business for four generations and we frequently arrange workshops and attend events at which we can educate others.

Quality Assurance

We are an ISO 13485 accredited company.

Our comprehensive quality management system is in accordance with the requirements of the Medical Device Directive 93/42/EEC - Annex I & II, for temporary orthopaedic surgical implants - skeletal pins, wires, staples, guide wires - and all associated instrumentation.

All Surgical Holdings products undergo rigorous testing and inspection to applicable harmonised standards before leaving the factory. We offer CE marking on all Class I instrumentation, Class IIa and IIb implants, and can provide certificates of conformity for all materials used. Complete traceability throughout all aspects of the production process provides our customers with a fully documented quality control system.

All instrumentation carries a lifetime guarantee from the date of purchase on any fault found as a result of poor materials. This warranty is void, however, if repairs are carried out by anyone other than Surgical Holdings repair personnel, or if it is deemed to have been misused.

Please contact us or visit our website for current reprocessing instruction.

Visit us for a Workshop Tour

Want to see our strong family ethos in action? Our 24 hour promise means you can drop in on us at short notice for a guided tour. No grand clean up or special planning will be needed - we're confident for you to see us as we really are.

Pop in any day and you'll see:

- Instrument manufacturing
- Laparoscopic instrument repair
- Ortho implants manufacturing
- Power tool repair
- Instrument repair
- Scope repair

We've invested in new machinery to help improve quality and reduce turnaround times. We'll show you our recent upgrades including:

- £100k worth of ultrasonic cleaners, taking the cleaning and passivating process from 30 minutes to just 3 minutes!
- Laser welders
- Marker machines

We're in an excellent location for export customers, just 40 miles from London, at the mouth of the Thames Estuary.

 **By road:** A13 or A127 to M25
Dartford Tunnel and south coast ports

 **By rail:** Direct links to London
Liverpool Street, London
Fenchurch Street & St Pancras
International via Stratford

 **By air:** International flights from
Heathrow or Gatwick 90 minutes
away, Stansted 60 minutes,
and Southend airport is just 10
minutes away with direct flights
to major cities across Europe

**Surgical Holdings, Parkside Centre,
Temple Farm Industrial Estate,

About Us

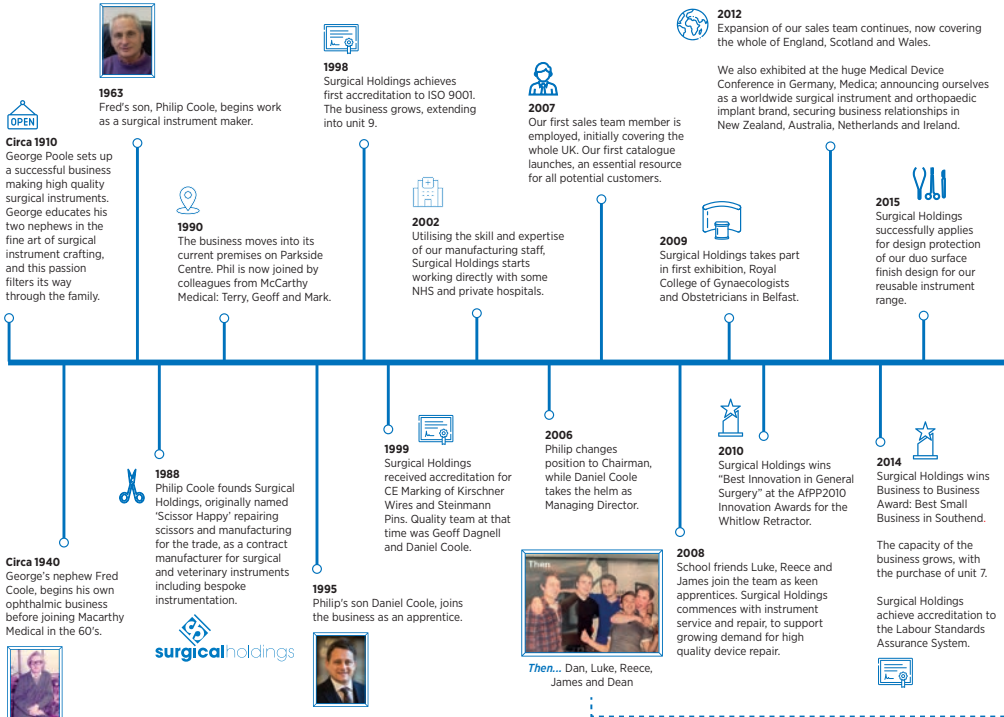

Surgical Holdings is a family run business, established for 30 years and counting.

Based in Southend-on-Sea, we are an award-winning British surgical instrument manufacturer and repairer, facilitating sustainability in surgery; through our range of reusable instruments and laparoscopic instruments, of which can be serviced in-house by our experienced and specialist technicians.

Our SMART REPAIR service for rigid endoscopes and our 'as new' full surgical tray refurbishments, save 50% in CO₂ vs buying new. We also distribute key industry brands, including the Bookwalter retractor.

Our Company History

Mission, Vision and Values

Our **Mission** is to sustainably manufacture, service and distribute medical devices for the UK healthcare sectors and export partners worldwide. Expertly working to our specialisms, whilst promoting education and continual development of our employees, we maintain our dedication to our safety, unique skill, products and services.

Surgical Holdings' **Vision** is to be recognised by our stakeholders as the most passionate, authentic and knowledgeable surgical instrument manufacturer and service provider in the UK.

Values:

		
EDUCATION	TRANSPARENCY	FAMILY
		
PASSION	RESOURCEFULNESS	

2017
Rigid Endoscope Repair Workshop opens, appointed with innovative technical equipment to facilitate the highest quality repairs. Our export base continues to grow, with appointment of a key partner in Malaysia.

We start working with one of our key brands Symmetry Surgical, bringing products like the Bookwalter Retractor and the Thomas Codman instruments to our customers.

SURGIFIX

2019
Surfix is made available to customers for the first time, as our repair service is merged and identified as SMART REPAIR, giving customers unique dashboard access.

Version 4 of our catalogue is published.

We exhibit at Medica, this time promoting our rigid endoscope repair service for our export marketplace.

2021
Orthopaedic Power Tool Repair Workshop opens, offering repair of Large Bone Battery Hand Pieces.

Surgical Holdings Accredits their first CPD approved workshop for continuing professional development in Surgical Instruments and medical devices.

Employment of our first marketing executive, to support customers and our sales team.

Promoting education, sharing knowledge and offering training opportunities

2022
We establish our modern day driven themes and company values, putting education at the forefront to trainees, apprentices, graduates, and industry enthusiasts.

We also expand our premises into neighbouring unit 10 following Southend gaining a city status.

Investment in new state-of-the-art cleaning line, and laser marking machines.

Appointment of additional sales team member in South East & London and Scotland.

Established a partnership with TrustLinks, South East Essex's local independent charity for mental health and wellbeing.

Successful recertification audit for ISO 13485 and CE Marking for orthopaedic implants.

Think TWICE

We have successfully launched our CPD Training Procedures including our Think Twice Educational Programme, enabling our qualified Representatives to host Rigid Endoscope Fault Identification training courses and conduct Scope Audits.

2016
We begin working with operating rooms in Northern Ireland, extending our sales coverage across the whole of the UK.

2018
Our focus on quality continues, as we appoint a new quality manager to drive the business forward.

SMART REPAIR

2020
With success from our Surgifix platform, SMART REPAIR is put to the forefront, tying in with our company focus of sustainability and ethical duty. This unique repair service promises to replace an instrument with a new one if we can't repair an instrument to 'as new' condition.

We complete the 5000th in-house rigid scope repair.

2021
At the present day, our once apprentices are now established as Operations Manager, Assistant Factory Manager, and our most specialist Repair Technicians.

And now... Dan, Luke, Reece, James and Dean

Looking ahead
We continue to invest and train our instrument makers of the future.

Our team continues to grow, with us now employing 50 people in our Southend city base, enabling us to support our customers' needs. Please add and further invest in the company's Social Value.

Customers are valuing British made instrumentation, as we strive to support NHS and private hospitals to recover from waiting lists as a result of Covid.

All our company vehicles for representatives are either fully electric or hybrid.

Proud to be a family-run British company

Our Services

Instruments are repaired to BS 5194 where possible, OEM specification in accordance with the recommendations laid out in MHRA 'Managing Medical Devices,' ensuring CE marking remains valid.

REPAIRED

High quality materials are used, providing full traceability as every part is recorded. Replacing instruments is avoided wherever possible.

TESTED

Independent testing helps benchmark repairs against industry standards.

UPCYCLED

If an instrument is not to our high standards or we can't repair it, we will replace it with a brand new one for the cost of a repair*. This ensures continual upcycling of your trays.

MARKED

Instruments can be laser marked, encoded and GS1 2D matrix marked at the same time as a repair.

*Applies to selected instruments only, please get in touch for full details.

ACCREDITED

Repairs are ISO 13485 accredited.

GUARANTEED

Customers receive an industry leading 18 month warranty as standard on all instrument repairs.

INSURED

We carry full product, professional liability and transit insurance.

DELIVERED

Standard turnaround times are 1 week, an express 2 day service is available.

Our instrument technicians carry out a minimum apprenticeship of 5 years and are trained to manufacture instruments rather than simply repair them. This gives us 360 degree understanding of the challenge and the importance of correctly functioning medical devices.

The Repair Process

Our expertise means that instruments can be modified or remanufactured if required. Customers can also receive training, participate in factory visits or simply call their local representative for guidance with instrumentation or management.

Our Services

Instrument and Power Tool Repair

We repair general instruments, laparoscopic and electro-surgery instruments

- Instruments are repaired by an experienced instrument 'maker', not just trained on repairs
- All market brands of leading power, battery and pneumatic tools repaired
- Brand new parts with full traceability
- Full tracking of devices from handover to return through Surgifix
- Option for free personal pick up and delivery through our team

SMART REPAIR

SURGIFIX
ONLINE PORTAL

SMART REPAIR is our unique repair service for surgical instruments, offering the promise of long-term value for money in choosing the sustainable option, and a product replacement if we are unable to return the instrument to an 'as new' condition*.

In choosing our innovative Smart Repair service, customers benefit from dashboard access to our Surgifix Online Portal.

*For the price of the repair. Applies to the 50 most used and repaired products, correct at the time of going to press.

Surgifix Repair Portal

Designed to make managing repairs easy and quick

Manage and monitor repairs online, and communicate directly with the repairs team.

On the Surgifix Repair Portal customers can:

-  View pricing, create quotes, and view the progress of repairs. These can be printed or saved.
-  Historical endoscope repair reports are available.
-  Instant notifications allow the repairs team and customers to communicate seamlessly regarding what needs a repair or refurbishment.
-  Training is available and can be done on a video call if required.

Our Services

Endoscope Repair

All major brands of rigid endoscope can be repaired at Surgical Holdings workshop in Southend-on-Sea. Using the latest optical technology, Surgical Holdings' highly skilled and experienced technicians will return scopes to the manufacturer's original specification. All parts are brand new and have full traceability.

 18 month guarantee on the repair

 OEM optical specification followed where possible

 Personal collection and delivery

 Laser welding for sheaths

 ISO 13485 accredited
As recommended by MHRA* advice around endoscope storage and care

 Free educational visits to our scope workshop
See all our repair facilities

+
We also repair the
Olympus
ENDO-EYE

A hassle-free and easy endoscope repair service

Maintenance scheduled

Collected and checked

Repaired and refurbished

Return by courier or hand delivered within 7 days

+ Proactive Management of Endoscopes

Surgical Holdings can set up and manage a 'check and repair' service for rigid endoscopes. This ensures scopes are regularly checked, refurbished, repaired and maintained to a high standard. We will catalogue scopes and create a maintenance schedule.

*MHRA Managing Medical Devices - April 2016

Instrument Refurbishment

Refurbishing instruments can save up to

80%

of the cost of buying new, with compelling evidence to demonstrate effectiveness

Independent research¹ showed that instruments refurbished by Surgical Holdings had a 4x reduction in the amount of residual protein.

The smooth and polished surface has an increased cleaning efficacy, and all refurbishments come with an 18 month warranty as standard. Standard turnaround times are 1 week, and an express 2 day service available.

Reference: ¹Data available on file.

Our Services

Endoscope Audits

Is your scope suitable for use? Think **TWICE**

TIP

Check the tip of the endoscope for sharpness and any type of damage to the tube such as dents and cracks

WINDOWS

Make sure the windows at the tip and eyepiece are free from dirt and cracks

ILLUMINATION

Hold the scope lightpost to a light source to see if the output is bright and clear at the tip

CLARITY

Look through the eyepiece, is the image clear and free from shadows, dots and lines

ENVIRONMENT

If you think twice and the endoscope isn't suitable for use then think of the environment and repair instead of replace

We offer a comprehensive scope auditing service

Can we help with your auditing? Please contact your local Surgical Holdings representative to book.

At Surgical Holdings we have 500 years worth of combined medical device manufacture experience. We're passionate about what we do and are keen to pass that wealth of knowledge onto our customers. We believe it is important to educate and train others, to help them get the most out of their instruments and so they last for many, many years.

We offer Rigid Endoscopy Fault Identification Workshops where we visit you and:

Show you the difference between poor quality and high quality instruments to help you make the right choices when purchasing

Train you on cleaning and maintenance to help keep your instruments in good condition

Walk you through our repair and refurbishment processes, so when the time comes you'll know exactly how your instruments will be cared for

Contact your local rep to arrange a training workshop

CPD Accredited Webinars

We also offer CPD accredited webinars, to boost your ongoing learning and help with your revalidation.

This includes our new module on the **Quality Checking of Rigid Endoscopes**, without the need for expensive checking apparatus. We introduced this module following feedback from stakeholders in sterile services and theatres.

Our team have designed a training SOP that can be integrated into your internal QMS systems, covering the different faults we see and how they can be identified. Once the training module is completed, you will then be issued a certificate directly via CPD. We'll leave you competently trained and externally accredited, so you can then train other staff members.

We are looking forward to working with you and sharing with trusted training model so please get in touch for more information!

Contact your local rep to arrange a training webinar

We also host a series of educational webinars featuring guest speakers and industry professionals

Surgical Instrument Set Refurbishment at North Devon District Hospital

Surgical Holdings have been recently managing a refurbishment programme for North Devon District Hospital. Here is their report on the implementation and success of their refurbishment programme so far.

Background

North Devon District Hospital is part of the Northern Devon Healthcare NHS Trust and the theatre complex has an inventory in excess of 1000 sets. The majority of sets are owned by the trust but this is supplemented with "Loan and Consignment" Orthopaedic sets.

Need for Change

With the need for clinical efficiency and productivity in the theatres instrumentation is required to be efficient and fit for purpose.

Limited sets are being used with a high turnover affecting compliance, sharpness, tension, etc. New instruments are available to replace old, well used stock but the capital required for the instrumentation is hard to obtain.

Implementation

To offset the need for capital to fund instrument replacements the CSSD and Theatres took the decision to try the Surgical Holdings option of refurbishing the instruments sets rather than disposing and purchasing new instruments. Instruments will either be refurbished back to new quality or replaced with new items for an inclusive price.

A "Basic" set was delivered to Surgical Holdings on the understanding the returned set would be assessed by the theatre staff to ensure the returned items met the requirements of the clinical team; e.g. sharpness, tension, colour, glare (lack of), etc.

The set passed the test and the remaining 22 "Basic" sets were refurbished on a rolling plan, the benefit of sending one set away at a time ensured a maximum stock level was available for clinical use.

Following the success of the 22 "Basic" sets a further 10 Oral Surgery Sets have been refurbished to the same standard.

Currently we have a Large Ortho Basic back after refurbishment awaiting theatre approval.

Implications

Finance

- No capital required to fund purchase
- Revenue spend to fund refurbishment

CSSD

- Minimum of sets out of service due to rolling programme
- Less incomplete sets as items are like new on refurbished sets, not needing further repairs

Theatre Staff

- Increased Clinical confidence – instruments like new
- Not subject to shortage of sets during process
- Reduction in procurement process – process agreed then rolling work plan
- Clinical staff sign-off regarding quality

The refurbishment of the theatre sets has allowed high usage instrumentation to be brought back up to a standard equal to new, this has been met with appreciation from theatre staff and has ensured clinical requirement for sets has not been compromised.

Fraser Bishop, Facilities Clinical Services Manager Trust Decontamination Lead,
North Devon District Hospital

An Overview On

Forcep Jaw Types

You will see that forceps in our catalogue will have either a traditional serrated jaw or a different design which is known as atraumatic (or non-traumatic).

Traditional Serrated Jaw

The traditional serrated jaw is generally more robust and used on forceps where the areas are not as delicate.

Atraumatic Jaw

Atraumatic jaws will be mainly found in delicate surgery areas such as vascular and cardiothoracic. The design is such, that the surface area gripped is reduced, ensuring less trauma without the loss of grip.

Guide for Gold and Black Bows

It's important to know the difference for the intended use of each scissor:

2 Gold Bows
Tungsten carbide insert or padding for a scissor

2 Black Bows
Supercut edge

1 Black and 1 Gold Bow
Supercut tungsten carbide

1 Black Bow (left ring)
Left-handed instrument carbide

Choosing the most suitable needle size

Our tungsten carbide inserts are available in a variety of styles. Choosing the most suitable needle size for each procedure helps give the surgeon maximum grip and control.

Coarse 0.65mm

For powerful needle holder patterns and wire twisters. Maximum holding capabilities for heavy needles or wire.

Micro 0.2-0.3mm

For micro needle holders such as Castroviejo, Microvascular and Mini-Ryder. For delicate needles and sutures between 7-0 and 10-0.

Standard 0.5mm

Used, for example, in Mayo-Hegar, Mathieu Needle Holders. For needles 3-0 and larger.

Smooth

Smooth tungsten carbide surface reduces damage to delicate needles and suture of 6-0 and finer.

Fine 0.4mm

For delicate needle holders such as Crile-Wood and DeBakey. For needles and sutures between 4-0 and 6-0.

LONGER SIZES AVAILABLE

Tungsten Carbide Needle Holders

Features and Benefits

Jaw

Tungsten carbide inserts bonded into the jaws for a long lasting, secure grip

Bevelled Edges

Prevents suture from snagging

Laser Etching

Date and catalogue number are etched for easy re-ordering. Laser etch will not harm instrument like traditional methods

Satin Finish

Reduces glare

Ratchets

Precisely cut for effortless locking/unlocking

Teeth

Fine, hard teeth, diamond cut into an insert of hardened tungsten carbide for superior needle grasping and suture tying capabilities

Vacuum Brazing

Combines bonding of the tungsten carbide insert with the simultaneous vacuum hardening of the instrument for greater durability and longevity

Shanks

Precision balanced for comfort and control

Gold Handles

For easy identification

Endoscope Re-fibre

Surgical Holdings manufacture their own fibre bundles in house. We cover small and larger diameter scopes and only use high quality German fibre optic material and stainless steel tubing.

- Quality components, globally sourced:
- ✓ Medical grade stainless steel tubing
 - ✓ German engineered new glass fibre
 - ✓ New fibre cone as standard
 - ✓ New solderable sapphire distal window
 - ✓ New light post colour ring
 - ✓ New objective in 95% of cases
 - ✓ Replacement 'O' ring to prevent leakage

Our Manufacturing Partners

We're proud to be approved UK suppliers of the top global brands in surgical instruments, giving us access to thousands of both big-name and some of the more obscure, but nevertheless important, instruments.

+ Our strong relationships with these businesses go back many years. This means we can provide you with quality instruments from the brands you know, at very competitive prices.
