COMPONENTS:

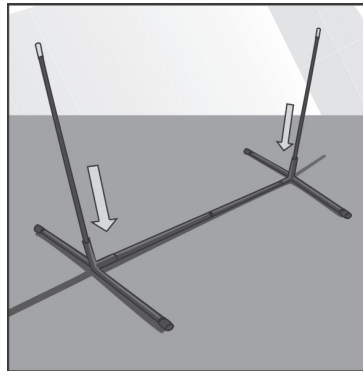

- A. Straight Pipes x 2
- B. Legs x 2
- C. Vertical Tube, lower with female coupling.... x 2
- D. Vertical Tube, upper with grooved coupling... x 2
- E. Metal Stakes..... x 4
- Netting (not pictured).....x 1
- Carrying Bag (not pictured)..... x 1

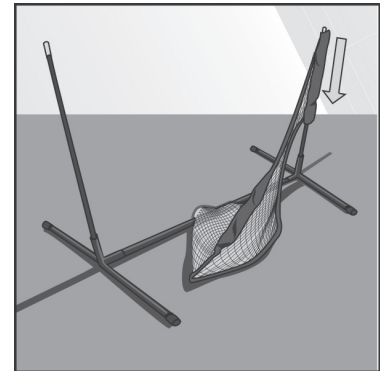

NET ASSEMBLY INSTRUCTIONS

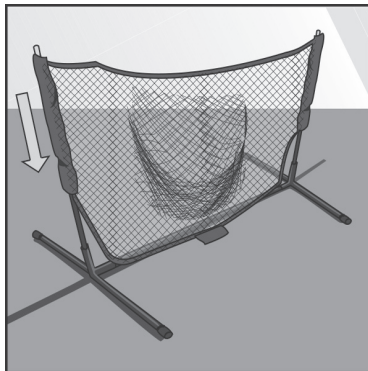

1. Join the two straight pipes together (Fig. A). Then attach both end legs. (Fig. B).

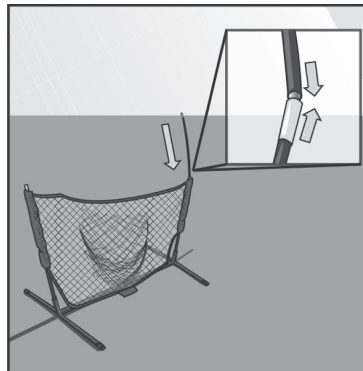

2. Install the two lower tubes up into the angled pipes.

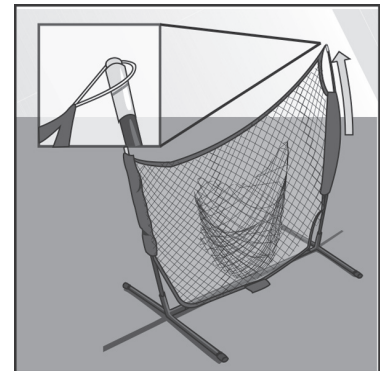

3. Thread net over one of the lower tubes, making sure that the logo is not upside down.

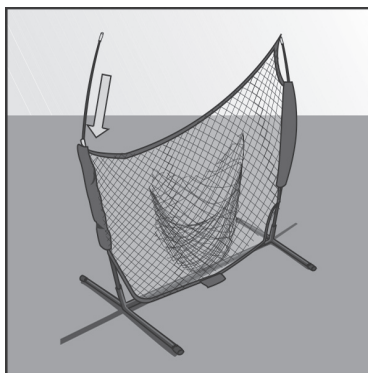

4. Repeat threading the net on the opposite lower tube.

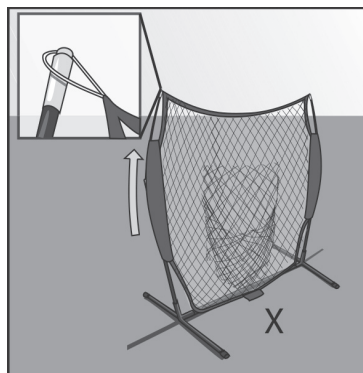

5. Insert the upper tube into the lower tube.

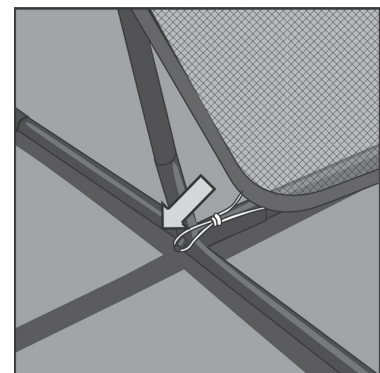

6. Angle the tube towards the center of the net and loop the white cord over the top of the tube.

7. Insert the last top tube to the other side of the net.

8. Loop the white cord over the top of the last tube. (X in Fig. 8).

9. Place elastic loops over each stud on the legs.

10. Wrap velcro around frame. (X in Fig. 8).
