# PANEL PERFORMANCE

## PATTERN CONSISTENCY

“3D feature wall crafted with reclaimed White Oak that would add a natural element, while maintaining continuity of design.” – Stephanie Boswell, LEED GA and Sr. Interior Designer for Cushing Terrell

## COORDINATION ACROSS APPLICATIONS

“We do a lot of acoustic panel installations and are often needing to match [wood ceilings to] other woods in the space.”

## INSTALLATION SPEED

“The time savings were astronomical. 4:1... maybe more. I’d have to calculate the time to mill the pieces, let alone the installation.” – Brandon Wiggins of Buda Woodworks
