

# AOL Series - Industrial Air Cooled Brazed Aluminum Coolers

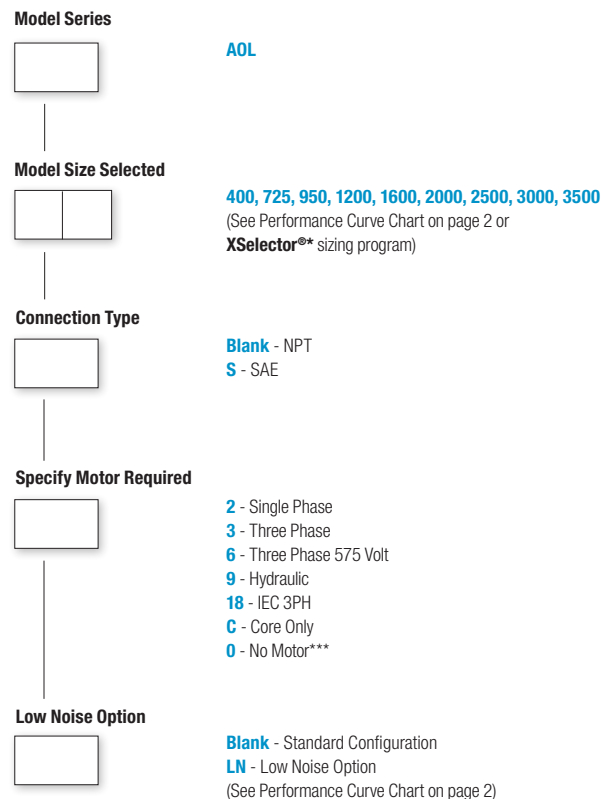

0124

AOL Series provides outstanding heat dissipation for extreme heat loads in a rugged, lightweight and compact design. Designed for vertical air flow, which helps preventing warm air blowing at operators or equipment, but up and away. Available with a variety of AC or hydraulic fan motors, all feature proven brazed aluminum bar and plate core technology engineered with an aggressive turbulator that produces ultra-high heat transfer.

TTP's XSelector® sizing program can be used to help optimize the sizing of the cooler for better performance and value.\*

## How to Order

## Features

Bar and plate brazed aluminum core technology

Provides the best heat transfer per given envelope size while minimizing pressure drop

Air-side fin design minimizes fouling and static pressure ensuring long-term, reliable performance

Welded fittings/ports and manifolds ensure structural integrity

Standard SAE or NPT available

Customized units are available to meet your OE specific performance requirements

Low noise versions offer reduced speed motors for lower dBA levels

## Ratings

**Maximum Operating Pressure**  
 250 PSI (17 BAR)

**Maximum Operating Temperature**  
 300°F (150°C)

**\*CRN Rating**  
 235 PSI at 250°F (121°C)

**Heat Rejection**  
 5 HP (4kW) to 500 HP (372kW)

**Flow Rates**  
 10 GPM (22 LPM) to 260 GPM (570 LPM)

## Materials

**Standard Core**  
 Aluminum

**Shroud**  
 Steel

**Fan**  
 Aluminum Hub, Plastic Blades

**Legs**  
 Steel

**Motor**  
 TEFC

## Fluid Compatibility

Petroleum/mineral oils  
 Oil/water emulsion  
 Water/ethylene glycol

\*To register for XSelector® please go to [www.thermaltransfer.com/get-in-touch/](http://www.thermaltransfer.com/get-in-touch/) and complete the XSelector® Inquiry form and submit.

Download the XSelector® for both Apple and Android formats by searching for XSelector® in their App Stores. You must first register for XSelector® before using it on mobile devices.

\*\*\* 0 - No Motor option includes NEMA mounting and fan compatible component. For IEC version, please contact factory

# Performance Curves

For additional sizing information consider using TTP's **XSelector**® online sizing Program.\*

Note: Derate heat rejection values 15% if using 50 HZ motors.

## Low Noise Option

Available in 60 HZ Nema Frame only.

\*To register for **XSelector**® please go to [www.thermaltransfer.com/get-in-touch/](http://www.thermaltransfer.com/get-in-touch/) and complete the **XSelector**® Inquiry form and submit. Download the **XSelector**® for both Apple and Android formats by searching for **XSelector**® in their App Stores. You must first register for **XSelector**® before using it on mobile devices.

AOL-2500-3PH-LN	5	213TC	1160	11700	331.31	230/460	60	85
AOL-3000-3PH-LN	5	215TC	1160	13500	382.28	230/460	60	93
AOL-3500-3PH-LN*	10	256TCZ	1160	16200	458.73	230/460	60	91

Available in 60 HZ Nema Frame only.

Low noise ratings are lab tested in a 1/4 spherical pattern. Additional nearby objects can increase the sound level.

## Hydraulic Motor Information

Model	Oil Flow Required GPM (LPM)	Minimum Pressure Required PSI (BAR)	Motor IN <sup>3</sup> /REV (CM <sup>3</sup> /REV) Displacement	Sound dB(A) at 3 FT
AOL-400	3.3 (12.49)	425 (29.31)	0.22 (3.6)	97
AOL-725	3.3 (12.49)	675 (46.54)	0.22 (3.6)	100
AOL-950	10.1 (38.23)	300 (20.68)	1.4 (22.94)	92
AOL-1200	10.1 (38.23)	725 (50.00)	1.4 (22.94)	94
AOL-1600	10.1 (38.23)	1100 (75.84)	1.4 (22.94)	98
AOL-2000	10.1 (38.23)	1650 (113.76)	1.4 (22.94)	98
AOL-2500	10.1 (38.23)	1650 (113.76)	1.4 (22.94)	98
AOL-3000	10.1 (38.23)	2000 (137.90)	1.4 (22.94)	102
AOL-3500	10.1 (38.23)	2000 (137.90)	1.4 (22.94)	102

Notes: Maximum Pressure is 2000 PSI. Stated Minimum Operating Pressure is at Inlet Port of Motor. 1000 PSI Allowable Back Pressure.

# Selection Procedure

Performance Curves based on 100°F (55.56°C) ETD or Entering Temperature Difference (E.T.D = Entering oil temperature minus ambient air temperature). SAE #10 oil @ 200°F (93.33°C).

## Oil pressure drop coding:

- X = 5 PSI (.345 BAR)
- = 10 PSI (.689 BAR)
- ◆ = 15 PSI (1.03 BAR)
- ▲ = 20 PSI (1.38 BAR)
- = 30 PSI (2.10 BAR)

## ETD temperature correction formula:

### ENGLISH Version

$$HP_{\text{Curve}} = HP_{\text{To Be Removed}} \times \frac{100}{\text{Desired E.T.D (}^\circ\text{F)}}$$

### Conversion

$$HP = \frac{KW}{0.745}$$

Note: We reserve the right to make reasonable design changes without notice. All dimensions are in inches (millimeters) unless noted otherwise.

## Notes

- A three-way thermostatic valve is recommended to bypass the cold oil around the heat exchanger during start up.
- Support piping as needed. Flexible connectors must be properly installed to validate warranty.
- Coolers should not operate in ambient temperatures below 35°F (1°C). Consult factory for recommendations.
- The fan cannot be cycled.
- AOL coolers operated outdoors must be protected from weather. Consult factory for recommendations.
- If duct work or additional static resistance is added to the cooler airstream, an auxiliary air mover may be required.
- Can be mounted for horizontal air flow, with oil in at bottom port.

## Maintenance

Periodic cleaning of the fins with compressed air is needed to remove the accumulation of dirt and dust. If the inside of the tubes need to be cleaned of oil and carbon, use a chlorinated solvent. Do not use strong solvents. Do not use acids or caustic cleaners.
