

## **COMBAT BOUND LLC**

Combat Bound LLC is an innovative Warfighter Capabilities generation and services company based in Hampton Roads, Virginia. We are a minority owned SDVOSB founded in 2019 on the heels of four years of invention and prototyping based on combat experienced gaps, seams, and redundancies. We build for the battlefield, focusing on greater capability, less weight, lower cognitive load, and at less cost, with input solicited from current Warfighters across the Joint Force. Our process is based on current DoD guidance and requirements, and Service methodologies to streamline acquisition as well as a focus on Foreign Military Sales to National strategic partners.

Combat Bound's wholly owned subsidiary, Legion Consulting Solutions, is focused on providing services in support of USG Cyber Contracts as well as a recently won NATO cyber effort.

As a whole, we strive to lead the market at the bleeding edge. We work to hyper-enable operators on the battlefield because we are Warfighters supporting Warfighters.

### **How We Help Transitioning Rangers**

Our company is owned and operated by Veterans, employs primarily Veterans, and continues to support our community through charitable efforts and mentoring. While we continue to lead the way by innovating beyond what the current market sees. We are looking to add the next generation who may be looking at starting the next phase of his or her professional life. If you see yourself transitioning into the world of technology, as so many of us have after years of service, being in a cutting-edge organization is the logical next step.
