

## **FAST EMS Training Solutions**

FAST EMS brings a military style education model to the First Responder Community. Providing time and cost-efficient training enables individuals and organizations to get the most out of their required training. We currently offer Emergency Medical Technician and American Heart Association courses.

## **How we help transitioning Rangers**

FAST EMS helps transitioning Rangers get started in their careers, whether it's in Emergency Medical Services, Fire Fighting, or adjacent, we offer training that can start and accelerate your career.

FAST EMS loves to hire Rangers and Veterans. These individuals understand the type of value we bring to the First Responder Community. We are currently hiring EMS professionals primarily as instructors, but as we grow, we look to bring veterans into our administration.

Our vision is to enhance the individual's career beyond simply providing them with a licensing avenue. FAST EMS partners with the [First Responder Liaison Network](#) (also founded by a Ranger veteran) in an effort to help mentor and connect professionals starting their career.

## **Where we are**

We are currently located in the Waco, Texas area but serve a national clientele. As we expand, we look to establish locations in DFW, Austin, then nationally. We understand that bringing Veterans into our administration will help us grow exponentially.

## **Contact Us**

Call or text Ranger Veteran and Founding Member Gramm Guillory directly at 254-326-8041 or email him at [gramm@fastemsts.com](mailto:gramm@fastemsts.com).
