

## About Us

Since our founding in 1989, we have empowered our employees to develop solutions that break through barriers, inspire innovation, and build resiliency. Today, our motto of “Challenge Accepted” resonates through our work modernizing and securing legacy government IT systems, driving innovation for the U.S. Department of Defense and Intelligence Community, managing critical government facilities and infrastructure, delivering critical intelligence analysis, and supporting enforcement, humanitarian, and asylum operations at the border.

Yet, what sets SOSi apart is not what we do, but who we are. Our creative and spontaneous culture enables us to be bold, act fast, own and take responsibility for our results, and build and maintain relationships that matter. SOSi offers the depth, breadth, and infrastructure required for the most complex missions, coupled with the agility and innovation modern mission challenges demand.

## How are we “Veteran Friendly”?

Our core business areas are digital infrastructure, software, intelligence, logistics and human services. From protecting critical operations and infrastructure overseas to introducing cutting-edge cybersecurity capabilities into legacy network environments, SOSi’s core mission is to promote and protect the interests of the U.S. and its allies around the world. Historically, more than 25% of our employees are veterans. Military Friendly, Best for Vets Employers, Hire Vets Medallion Program and the ESGR are some of the awards we are proud to say make us a Veteran Friendly workplace.

## SkillBridge

SOSi is proud to be an approved DoD SkillBridge employer who can help service members find their path to employment after their military career. Active Service members can participate if they are within their last 180 days of active service. Ultimately, we are looking to place transitioning service members into meaningful, full-time employment upon completion of the program.
