

### **Darley Defense, a W.S. Darley Company**

Darley Defense specializes in distributing commercial-off-the-shelf services to military and first responder customers. We have unique and standing contracts with the Department of Defense and Defense Logistics Agency to fulfill customer demands quickly. These unique contracts mean that customers can get products as soon as they are commercially available.

#### **What does that mean for transitioning Rangers?**

We hire mostly Veterans of the military and the fire service because they know our customers. Our culture is based on the values and ethics familiar to those who serve and wish to continue to serve. We understand that business acumen and defense procurement is knowledge that can be learned, and we are prepared to teach you. You have worked besides many different MOS's and branches, we do the same here.

#### **What do we expect from you?**

Bring the Ranger Creed to our business. Bring your tenacity to complete the mission to work every day. That is a trait that cannot be taught. If you are passionate and motivated about equipping firefighters and the military with cutting-edge gear and technology, then we want you on our team.
