

## **CAREER OPPORTUNITY** ***Transformer Specialist***

### **Join Our Team as a Transformer Specialist**

If you are transitioning out of the Ranger Battalion and seeking a respected, well-paying career, consider the power industry. Energy is the cornerstone of modern life, fueling homes, businesses, and vital services across the nation. In the power industry, your role is crucial ensuring that this essential infrastructure runs smoothly and efficiently. It's an opportunity to continue making a significant impact, securing a stable future for yourself while contributing to the well-being of our communities.

### **About the Role**

We are seeking Rangers to join our dynamic team as Transformer Specialists. This role is pivotal in maintaining and servicing electrical transformers across various industrial and utility environments. If you are looking for a career that pays very well and combines technical skills with hands-on experience, this is the perfect opportunity for you!

### **What We Offer**

- **Paid On-the-Job Training:** As there are no formal educational institutions dedicated exclusively to this technical field, APC will provide you with a comprehensive on-the-job training program. This program is designed to provide you with the essential skills and knowledge you need, allowing you to learn and earn simultaneously.
- **Comprehensive Benefits:** Benefit from health insurance, paid time off, and a 401(k) with matching contributions to help secure your financial future.
- **Competitive Compensation:** Enjoy a rewarding package that appreciates your hard work.
  - In the first year, you can expect to earn between \$75,000 and \$120,000.
  - Subsequent years offer the potential for increased earnings, ranging from \$120,000 to \$200,000 annually.

### **Key Responsibilities**

- **Maintenance and Inspection:** Conduct thorough inspections and perform preventative maintenance & testing on transformer components including gauges, devices, bushings, and cooling systems.
- **Servicing and Refurbishing:** Engage in detailed servicing tasks such as bushing replacement, leak repair, and ensuring proper functionality of all transformer parts.
- **Oil Processing and Testing:** Specialize in oil processing for FR3 and mineral oil insulated transformers to restore oil by removing impurities and ensuring optimal performance. Electrical testing to verify transformers condition.
- **Installation and Replacement:** Manage the removal, relocation, and installation of transformers.

### **Location of work**

Our clients are located in Texas (TX), Louisiana (LA), Arkansas (AR), Mississippi (MS), Alabama (AL), Georgia (GA), and Florida (FL). These states will serve as your primary operational areas. You will travel to various locations throughout the Southeast, wherever service is required. You'll perform on-site repairs or replacements of malfunctioning transformers. This allows you to live anywhere in the Southeast.

### **Ideal Candidate**

- Keen eye for detail, highly motivated and thrives when working in team settings. – Ranger

### **Interested? POC**

The specific POC for this opportunity is Ranger Jacque Ballay the Executive Vice President of APC and former 1/75 Ranger. Email: [Jacque.ballay@apcconstruction.com](mailto:Jacque.ballay@apcconstruction.com)
