

SPECIFICATION SHEET

Brentwood® Series Framed Recessed Double Toilet Paper Holder

Dimensions: See dimensions chart

Materials: Solid pine

Mounting: Recessed versions can be mounted with construction adhesive or screwed to the studs on either side. Can also be mounted in the side of a vanity if you have clearance inside.

Finish: Multiple finishes available

Features:

- ✓ Solid wood construction – screwed together to last a lifetime, especially in a humid bathroom environment!
- ✓ Handcrafted right here in the USA, in sunny Sarasota, Florida!
- ✓ Easy installation
- ✓ Spring loaded roller is raised off center so that even a brand new roll won't drag on the bottom
- ✓ Recesses nearly the whole roll in the wall – all competitors “recessed” toilet paper holder don't really recess very much because they don't use the whole depth of the wall.
- ✓ Optional colored rollers are available to change the look as desired
- ✓ Fits any size roll on the market today

NOTE: If you already have an opening in your wall from a previous “recessed” toilet paper holder, it will NOT be large enough to accommodate ANY of these models. Your opening MUST be enlarged in order to fit these models in your wall space. If your wall opening has framing on any of the four sides, that must be removed to fit these in. Rough opening sizes are shown in the dimensions chart (last page). All models are designed for standard 2x4 wall depth.

SPECIFICATION SHEET

Brentwood® Series Framed Recessed Double Toilet Paper Holder

All Brentwood models can use single, double, and ALL OTHER SIZE rolls on the market today, handling them all with ease because they were designed for it!

Brentwood-12

Brentwood-18

SPECIFICATION SHEET

Brentwood® Series Framed Recessed Double Toilet Paper Holder

Brentwood-22 uses a frame which is only 3/8" thick, the thinnest frame we offer.

SPECIFICATION SHEET

Brentwood® Series Framed Recessed Double Toilet Paper Holder

Side View of Toilet Paper Holder

FRAMED 3.5" deep models (4.25" overall depth)

All models have a frame which is at least $\frac{3}{4}$ " larger all the way around than the cabinet box itself which is there to cover the edges of your rough opening in the drywall.

Total projection from the wall surface is $\frac{3}{4}$ " on most frame styles except Brentwood-22 which have a $\frac{3}{8}$ " projection because the frame is thinner on those models.

These models can be secured either using construction adhesive on the back side of the frame overhang, or by screwing to the studs on both sides. Either way works equally well and will support much more weight than you could ever put in the holder.
