THERMAL IMAGING FOR BUILDING PROFESSIONALS (E LEARNING)

Who is this course suitable for?

Any building professionals aiming to enhance their professional capabilities and begin utilising thermal imaging cameras in the built environment.

What can I expect to learn?

The fundamentals of thermal imaging for domestic and commercial buildings and bridges the gap between an introduction session and a full category 1 qualification.

Course content includes:

- Infrared Thermography
- Thermal Cameras
- Building Surveys

How long is the course?

The course typically takes 4 hours to complete

How and where do I study?

This is an e-learning course and can be started at any time. You can complete the learning at a time that suits you from the comfort of your own home or whilst at work. The learning materials are diverse and include presentations, reading assignments and quizzes. You will require a laptop or tablet to complete the learning online.

Are there any exams or assessments?

There is an online theory assessment that you will have to complete as part of the course.

Will I achieve a qualification or certificate?

Following a successful pass on the online theory exam you will then have to supply our tutor team with three thermal survey reports to ensure that you have an understanding, knowledge and competency in the subject before a certificate is issued.

Are there any costs

Yes employers are required to pay 20% contribution towards the costs of this course which is **£82.50**
