

Improvements to credit wanted (credit demand) listings

For accredited assessors and community users

The improvements are being made in stages. Information about Stage 1 of the improvements was attached to [BOS Update No. 11](#). Stage 2 of the improvements is now live in BOAMS.

Stage 2 improvements to credit demand listings

- Simplified the process to include a contact person in a credit demand listing. The process now ensures that complete and correct contact details are displayed.
- Require appropriate details in a listing based on whether the listing is made on behalf of an individual person or an organisation.

Future updates

The department will let you know when further improvements to credit demand listings are live in BOAMS.

The department is also working on an updated BOAMS user guide for accredited assessors and community users. These guides are expected to be published in 2023.
